Revision History

Ver.	Date	Description of Change	Prepared By	Approved By
1.0	2025	Original issue — Land Security Operations Policy, Kikori Development Project.	Security Manager	Managing Director
2.0	1 Aug 2026	Full revision and re-issue for the Papua LNG Project. Legal and regulatory framework, human rights (VPSHR) provisions, risk-based planning, incident classification matrix, journey management, vetting and licensing, assurance and audit provisions added. Naming and terminology standardised throughout.	Security Manager	Managing Director

Authorisation

This Policy is issued under the authority of the Managing Director of Southern Cross Strategic Holdings Pte Limited and takes effect from the date recorded above. It is mandatory for every person to whom it applies. No person may vary, suspend or waive any requirement of this Policy except in writing and with the prior approval of the Document Owner.

Interpretation

- In this Policy, "shall" and "must" denote a mandatory requirement; "should" denotes a strong recommendation from which departure requires documented justification; and "may" denotes a permitted option.
- Headings are for convenience only and do not affect interpretation.
- Where this Policy conflicts with a mandatory requirement of Papua New Guinea law, or with a binding requirement of the Client's security management system, the higher standard shall prevail and the conflict shall be reported immediately to the Document Owner.

TABLE OF CONTENTS

1. PURPOSE

This Policy establishes the principles, standards, accountabilities and minimum procedures governing all land security operations conducted by Southern Cross Strategic Holdings Pte Limited ("the Company") in support of the Papua LNG Project ("the Project").

The purpose of this Policy is to:

- Protect the life, safety and welfare of all personnel working on or visiting Project sites;
- Safeguard Project assets, plant, materials, infrastructure and information against theft, damage, sabotage, unauthorised access and misuse;
- Ensure that security is delivered lawfully, proportionately and with full respect for the human rights and dignity of host communities;
- Provide a single, auditable standard against which the performance of security personnel may be measured, assured and improved; and
- Support uninterrupted Project execution through disciplined, intelligence-informed and risk-based security management.

2. SCOPE AND APPLICATION

2.1 Persons Covered

This Policy applies to:

- All Company employees, officers and management assigned to the Project, whether permanent, fixed-term or casual;
- All subcontracted security personnel operating under the Company's supervision or licence;
- All Company personnel in transit to, from or between Project locations; and
- So far as it governs conditions of entry and conduct on site, all contractors, suppliers, visitors, government officials and community representatives requiring access to areas under Company control.

2.2 Locations Covered

This Policy applies to all land-based areas placed under the security responsibility of the Company within the Papua LNG Project footprint and its associated corridor, including:

- Upstream production and well-pad areas and associated access roads;
- Gas conditioning, processing and utility facilities;
- Pipeline right-of-way, spread camps and river-crossing works within the designated land corridor;
- Downstream liquefaction and plant-site areas and their approaches;
- Logistics bases, supply bases, laydown yards and the landward interface of marine and barge facilities;
- Perimeter fence lines, gatehouses, guardhouses, towers and access-control points;
- Heavy equipment and machinery yards and workshops;
- Warehouses, stores, containerised storage and materials laydown areas;
- Office blocks, control rooms and communications facilities;
- Accommodation camps, messing facilities and recreational areas;
- Fuel farms, chemical stores and hazardous materials compounds; and
- Transport yards, vehicle holding areas and helipads or airstrips under Company guarding.

2.3 Exclusions

This Policy does not govern maritime and offshore security duties, canine (K9) operations, close personal protection or border and checkpoint operations, each of which is addressed by its own subordinate policy and standard operating procedures. Where those functions interface with land security, the requirements of this Policy apply to the land-side component.

3. DEFINITIONS AND ABBREVIATIONS

Term	Meaning
Client	The Project operator and any joint-venture participant, together with their appointed representatives, to whom the Company provides security services.
Company	Southern Cross Strategic Holdings Pte Limited, a private security provider licensed under the laws of Papua New Guinea.
DOB	Daily Occurrence Book — the bound, sequentially numbered register maintained at every guarded post.
Incident	Any event, or attempted event, that causes or has the potential to cause harm to persons, loss or damage to assets, disruption to operations, breach of security, or reputational damage.
LOU / Landowner	Landowner Unit, clan or incorporated land group holding recognised customary or registered interests in land affected by the Project.
Post	Any fixed or mobile position at which a security officer is deployed on duty.
Restricted Area	Any area to which entry is limited to specifically authorised persons and which is designated as such by the Client or the Company.
RPNGC	Royal Papua New Guinea Constabulary.
Security Officer	A person employed or engaged by the Company to perform security duties and holding a current security guard permit.
SIA	Security Industries Authority of Papua New Guinea.
Use of Force	Any physical measure applied to control, restrain or repel a person, ranging from physical presence and verbal direction to the lawful application of restraint.
VPSHR	Voluntary Principles on Security and Human Rights.

4. LEGAL, REGULATORY AND STANDARDS FRAMEWORK

Security operations under this Policy shall be conducted in full compliance with the laws of Papua New Guinea and with the standards adopted by the Project. The framework includes, but is not limited to:

4.1 Papua New Guinea Legislation

- **Constitution of the Independent State of Papua New Guinea** — in particular the guaranteed rights to life, liberty, freedom from inhuman treatment, and freedom from arbitrary search and entry.
- **Security (Protection) Industry Act 2004** — licensing of security operators by the Security Industries Authority, the issue of security guard permits, and compliance with the industry Code of Conduct. The Company shall hold and maintain the appropriate class of operator licence, and no person shall be deployed on duty without a current, valid guard permit.
- **Criminal Code Act 1974 and the Arrest Act** — the limits of lawful detention, arrest without warrant by a private person, and the offences of assault, unlawful confinement and wilful damage.

- **Firearms Act** — firearms remain a matter for the Registrar of Firearms (the Commissioner of Police). No firearm shall be carried, stored or used by Company personnel on the Project unless expressly authorised in writing under that Act and by the Client.
- **Employment Act and Industrial Relations legislation** — terms and conditions of employment, hours of work and minimum wage requirements.
- **Occupational Health and Safety legislation** — the duty to provide and maintain a safe working environment for security personnel.
- **Oil and Gas Act 1998 and the Environment Act 2000** — statutory obligations attaching to petroleum project areas, licence areas and the pipeline corridor.
- **Informal Sector Development and Control Act, Summary Offences Act and provincial liquor legislation** — where relevant to conduct on and adjacent to Project land.

4.2 International and Project Standards

- **Voluntary Principles on Security and Human Rights (VPSHR)** — the governing framework for risk assessment, engagement with public and private security, and the use of force in the extractives sector.
- **United Nations Basic Principles on the Use of Force and Firearms by Law Enforcement Officials, and the UN Code of Conduct for Law Enforcement Officials** — the benchmark for necessity and proportionality.
- **UN Guiding Principles on Business and Human Rights** — the corporate responsibility to respect human rights and to provide access to remedy.
- **IFC Performance Standard 4 (Community Health, Safety and Security) and the Equator Principles** — as applied by the Project and its lenders.
- **ISO 18788** — management system for private security operations, adopted as the Company's model for continual improvement.
- **Client security requirements** — all contract security schedules, site security plans, bridging documents and standing instructions issued by the Client.

Statutory references in this Section are provided for guidance. The Document Owner shall verify current citations and amendments with in-country legal counsel at each scheduled review.

5. POLICY STATEMENT

Southern Cross Strategic Holdings Pte Limited is committed to the delivery of professional, lawful and human-rights-compliant land security services on the Papua LNG Project. The Company will:

- Place the preservation of human life above the protection of property in all circumstances;
- Apply a risk-based approach in which the deployment of personnel and resources is determined by documented threat and vulnerability assessment rather than by custom or convenience;
- Deploy only personnel who are lawfully permitted, properly vetted, adequately trained and demonstrably fit for duty;
- Maintain zero tolerance of corruption, bribery, extortion, collusion in theft, intoxication on duty, harassment and any form of sexual exploitation or abuse;
- Engage host communities and Landowner Units with courtesy, consistency and cultural respect, while enforcing site rules without favour; and
- Record, report, investigate and learn from every incident, and provide accessible channels through which employees and community members may raise grievances without fear of reprisal.

6. SECURITY OBJECTIVES

No.	Objective	Primary Measure
1	Maintain a safe and secure working environment for all Project personnel and visitors.	Zero security-related injuries to personnel.
2	Prevent unauthorised access to Project facilities and restricted areas.	100% of entrants logged and verified; nil unauthorised entries.
3	Protect assets, plant, materials and fuel from theft, vandalism and sabotage.	Reduction in reported loss value against baseline.
4	Prevent disturbance, roadblock and unrest events from escalating into operational disruption.	Early-warning reports raised before escalation; nil unplanned shutdowns.
5	Ensure all security action is lawful, proportionate and human-rights compliant.	Nil substantiated use-of-force or human rights complaints.
6	Maintain full regulatory and contractual compliance.	100% of deployed officers holding current permits; nil regulatory findings.
7	Deliver accurate, timely and complete security reporting.	100% of incidents reported within the times set in Section 11.

7. GUIDING PRINCIPLES

- **Life first.** The protection of human life takes precedence over the protection of property in every situation, without exception.
- **Legality.** Every security action must have a lawful basis. Where the lawful basis is unclear, personnel shall observe, record and escalate rather than act.
- **Minimum necessary force.** Force is a last resort, and only such force as is reasonable, necessary and proportionate may be used.
- **Deterrence through presence.** A visible, alert, well-presented and professional security posture is the Company's primary preventive control.
- **Zero tolerance of unauthorised access.** No person, vehicle or item enters a controlled area without verified authorisation, irrespective of the seniority, familiarity or insistence of the person seeking entry.
- **Respect for communities.** Landowners and host communities are stakeholders in the Project, not adversaries. Firmness in enforcing rules is never a licence for discourtesy.
- **Impartiality.** Company personnel shall not take sides in clan, tribal, political, family or landowner disputes, and shall not use their position to advance any personal or clan interest.
- **Accountability and transparency.** Every act of security is recorded. Records are accurate, contemporaneous, legible and never altered after the fact.
- **Confidentiality.** Security information is disclosed only to those with a legitimate need to know.
- **Continuous improvement.** Lessons from incidents, audits and community feedback are captured and used to strengthen controls.

8. ORGANISATION, COMMAND AND ACCOUNTABILITY

8.1 Chain of Command

The Company operates a single, unbroken chain of command. Instructions are issued and reports are rendered through that chain. No person may bypass the chain of command except where an immediate threat to life requires direct action or direct notification of emergency services.

Position	Principal Accountabilities
Managing Director	Ultimate accountability for the Company's compliance, licensing and conduct. Approves this Policy and any deviation from it.
Operations Director	Contract performance, resourcing, and interface with Client senior management. Chairs the crisis management team.
Security Manager (Papua LNG Operations)	Overall command of land security operations on the Project. Owner of this Policy. Approves security plans, post orders and deployment tables; authorises escalation to the RPNGC; leads major incident response.
Deputy Security Manager	Day-to-day operational delivery, supervision, rostering, discipline and assurance. Deputises for the Security Manager in their absence.
Site Security Coordinator / Area Supervisor	Command of a defined site or corridor sector; liaison with site management; verification of post standards and records.
Shift Supervisor (Day / Night)	Command of the shift; posting and relief of officers; briefing and de-briefing; first response to incidents; accuracy and completeness of shift records.
Control Room Operator	Communications watch, alarm and CCTV monitoring, incident logging, activation of the notification cascade.
Security Officer	Frontline execution of post orders; observation, reporting, access control, patrolling and first response within authority.

8.2 Post Orders

Every post shall have written Post Orders, approved by the Security Manager, held at the post and reviewed at least annually. Post Orders shall state the purpose of the post, its boundaries, hours, manning, specific duties, prohibitions, equipment, communications call-signs, emergency actions and escalation contacts. No officer shall assume a post before reading and signing the current Post Orders for that post.

8.3 Shift Handover

No post shall be left unmanned. Relief shall take place on post, face to face, and shall include a formal handover covering the situation, outstanding tasks, defects, keys, equipment, detained items and any standing instructions. Both officers shall sign the handover entry in the Daily Occurrence Book.

8.4 Interface with Public Security Forces

Where members of the RPNGC, the Papua New Guinea Defence Force or other lawful authority are present on or adjacent to Project sites:

- Company personnel shall cooperate courteously and shall not obstruct the lawful exercise of authority;
- Company personnel remain under Company command at all times and shall not accept operational tasking from public security forces;
- Any request by public security forces for Company support, information, access, transport or accommodation shall be referred immediately to the Security Manager for decision;
- Any observed or alleged human rights concern involving public security forces shall be recorded factually and reported through the chain of command and to the Client Security Focal Point without delay; and
- Company personnel shall not participate in, assist or conceal any unlawful act.

8.5 Client Interface

The Security Manager is the single point of contact with the Client Security Focal Point. Routine reporting, incident notification, security advisories and requests for additional resources shall pass through that

channel. Subordinate personnel shall not brief, commit or correspond with the Client on security matters except as expressly authorised.

9. SECURITY RISK ASSESSMENT AND PLANNING

Security deployment shall be driven by documented risk assessment, not assumption.

- A Security Risk Assessment shall be prepared for each site, camp, corridor sector and recurring high-risk activity, using a consistent threat, vulnerability, likelihood and consequence methodology.
- Each assessment shall be reviewed at least every twelve months, and immediately following any major incident, significant change in the threat environment, change in scope or footprint, or material milestone in landowner or benefit-sharing negotiations.
- Identified risks shall be recorded in a Security Risk Register with named owners, agreed treatments and target dates, and shall be reviewed monthly by the Security Manager.
- A Site Security Plan shall be maintained for each location, aligned to the risk assessment and to Client requirements, and shall define deployment strength, post locations, patrol regimes, technology, response arrangements and escalation triggers.
- The Company shall maintain a structured intelligence and early-warning process drawing on patrol observations, community feedback, open sources, Client advisories and liaison with authorities, and shall issue periodic security advisories to the Client and to supervisory staff.
- Threat levels shall be graded, communicated and matched to pre-agreed posture changes, so that escalation and de-escalation are planned rather than improvised.

10. CORE SECURITY FUNCTIONS

10.1 Perimeter Security

Security teams shall:

- Conduct foot and mobile patrols of the perimeter at irregular intervals, avoiding predictable timing patterns, and record each patrol on completion;
- Inspect fence lines, gates, locks, lighting, signage and clear zones at least once daily and after every period of heavy weather, and raise a defect report for any deficiency;
- Give particular attention to blind spots, drainage crossings, vegetation encroachment, culverts and areas of previous breach;
- Prevent unauthorised approach to restricted boundaries and direct persons to the designated access point;
- Report immediately any gathering, marker, structure, garden, signage or vehicle placed at or near the boundary that may indicate a developing landowner or access dispute; and
- Maintain perimeter integrity during construction works by requesting temporary controls whenever a fence line is opened.

10.2 Gate and Access Control

At all designated entry and exit points, security personnel shall:

- Verify the identity of every person by current Project identification card, permit or visitor pass, and refuse entry where identification is absent, expired, altered or does not match the bearer;
- Record in the Access Control Log the full name, organisation, purpose, host, time in and time out for every person;

- Record vehicle registration, driver, occupants, cargo description and manifest reference for every vehicle, and verify outbound loads against a signed gate pass or material release note;
- Conduct bag, person and vehicle checks in accordance with the site search standard, courteously, in view of a witness, and with searches of female persons conducted only by female officers;
- Enforce the prohibited items list, including weapons, alcohol, illicit drugs, unauthorised recording devices and unauthorised drones;
- Deny access to any person who is unauthorised, who refuses a lawful search, or who appears to be under the influence of alcohol or drugs, and report the refusal immediately;
- Manage queues, traffic flow and pedestrian separation safely, and never permit tailgating of vehicles or persons; and
- Maintain a professional, visible and disciplined presence at all times.

Access control records shall be retained in accordance with Section 17 and made available for audit on request.

10.3 Machinery and Heavy Equipment Protection

- Maintain surveillance of equipment yards, laydowns and parked plant, with particular attention to hours of darkness and shutdown periods;
- Verify that keys are returned to and issued from the controlled key point, and that key registers are signed;
- Prevent any person from operating, entering or interfering with plant without documented authorisation;
- Conduct after-hours patrols of machinery yards and check seals, hour meters, batteries, tyres, fuel caps and attachments;
- Report immediately any evidence of tampering, siphoning, unexplained movement, missing components or unauthorised repair activity; and
- Escort and observe the movement of plant into and out of controlled areas.

10.4 Warehouse, Stores and Materials Security

- Guard inventory areas, container stacks and high-value stores, and enforce the two-person rule for entry to high-value cages where directed;
- Observe all loading and unloading and verify that movements are supported by authorised documentation;
- Check container and trailer seals on arrival and departure, record seal numbers, and report any discrepancy before the seal is broken;
- Verify that only authorised personnel enter storage areas and that doors, cages and gates are secured on completion of work;
- Support scheduled and unannounced stock checks conducted by the Client or Logistics; and
- Report shortages, damaged packaging, repeated after-hours access requests and other theft indicators as security concerns, not merely administrative matters.

10.5 Accommodation, Camp and Office Security

- Control access to living quarters, messing areas and recreational facilities, and enforce room allocation and curfew rules;
- Maintain good order among residents, intervene early in disputes, and de-escalate rather than confront;

- Escort Human Resources, Medical or Administration staff during disputes, terminations, demobilisations or welfare interventions when requested;
- Protect offices, documents, IT equipment, servers and confidential information, and challenge any unescorted person in an office area outside working hours;
- Verify daily that fire exits, muster points, emergency lighting, extinguishers and evacuation routes are unobstructed and serviceable, and report defects to HSSE;
- Enforce the prohibition on alcohol, illicit substances, gambling and weapons in camp in accordance with Client rules; and
- Provide a respectful environment for female personnel, including secure accommodation zoning and prompt response to any report of harassment.

10.6 Asset and Property Protection

- Guard all fixed and movable property within the area of responsibility;
- Provide security support to Logistics during the movement of high-value or sensitive assets;
- Maintain a Property Damage and Loss Log and reconcile it monthly with the Client;
- Ensure that storage areas, offices, cabins and workshops are locked, sealed or monitored when unoccupied; and
- Conduct end-of-shift lock-up checks and record them.

10.7 Fuel, Chemical and Hazardous Materials Security

- Restrict access to fuel farms, generator sets, chemical stores and explosive or radioactive source stores to specifically authorised personnel only;
- Witness and record fuel issues where required, and report any discrepancy between issue records and dispensed volume;
- Enforce no-smoking, no-hot-work and no-mobile-phone controls at fuel and chemical points;
- Report any spillage, leak, damaged bund or unsecured container immediately to HSSE and the Shift Supervisor; and
- Treat fuel theft as a serious security incident requiring immediate escalation, given its safety, environmental and community consequences.

10.8 Journey Management and Convoy Escort

- No security movement shall take place outside a controlled area without an approved journey management plan where the Client's journey management system so requires;
- Departure, waypoint and arrival calls shall be made to the Control Room, and overdue vehicle procedures shall be initiated without delay;
- Escort teams shall carry communications, first aid, water, recovery equipment and current route threat information;
- Routes, timings and halts shall be varied to avoid predictability, and vehicles shall not stop at unplanned locations except in an emergency;
- On encountering a roadblock, crowd or hostile gathering, teams shall not force passage; they shall halt at a safe distance, report, and await instruction; and
- All movements shall comply with Project driving standards, including speed limits through villages, seat belts, fatigue limits and the prohibition on night driving where imposed.

10.9 Control Room, Communications and Security Technology

- A Control Room shall maintain a continuous communications watch and a single, sequential master incident log;
- Radio discipline shall be enforced, with authorised call-signs, plain language and no discussion of sensitive information over open channels;
- CCTV, alarm, access-control and lighting systems shall be tested on a documented schedule, and faults shall be raised as security defects with target rectification times;
- CCTV recordings shall be retained in accordance with Section 17, released only on the authority of the Security Manager, and used solely for legitimate security and investigative purposes; and
- Backup communications shall be identified and tested, and no single point of failure shall be accepted in the notification cascade.

10.10 Key, Lock and Seal Control

- All keys shall be held in a controlled key press, issued against signature, and accounted for at every shift change;
- Duplicate keys shall be produced only with the written approval of the Security Manager;
- Loss of any key shall be reported immediately and shall trigger a documented risk assessment and, where warranted, re-keying; and
- Seal stocks shall be held securely, issued sequentially and reconciled monthly.

11. INCIDENT MANAGEMENT AND EMERGENCY RESPONSE

11.1 Immediate Actions

On becoming aware of an incident, security personnel shall apply the following sequence:

- Remain calm, take cover or withdraw to a safe position if there is a threat to life;
- Preserve life first — render or summon first aid before considering property;
- Raise the alarm and notify the Shift Supervisor and Control Room immediately;
- Secure and isolate the area, preserve the scene and prevent the loss or contamination of evidence;
- Identify witnesses and record their details before they disperse;
- Do not confront, pursue or detain where doing so would create a greater risk; and
- Record all facts contemporaneously, accurately and without opinion or speculation.

11.2 Incident Classification and Notification

Level	Description	Initial Notification	Written Report
Level 3 — Major/Crisis	Fatality or life-threatening injury; armed attack; hostage or abduction; major fire or explosion; sustained roadblock or blockade halting operations; large-scale unrest; loss of a firearm; any event with media, regulatory or national implications.	Immediately by voice to Security Manager, who notifies the Operations Director, Managing Director and Client Security Focal Point.	Preliminary written report within 1 hour; full report within 24 hours.
Level 2 — Serious	Assault or injury requiring medical treatment; theft of significant value; forced entry; sabotage or tampering; vehicle ambush or stoning; credible threat against personnel; use of force by	Immediately by voice to Shift Supervisor and Control Room; Security Manager informed without delay.	Written report within 4 hours.

Level	Description	Initial Notification	Written Report
	a Company officer; detention of any person.		
Level 1 — Minor	Petty theft; trespass without aggravation; fence or lighting defect; access-control breach without loss; verbal dispute resolved on site; loss of a pass or key.	To Shift Supervisor before end of shift.	Written report within 12 hours.

Every incident, without exception, shall also be entered in the Daily Occurrence Book at the time of occurrence. Where an incident level is uncertain, personnel shall report it at the higher level.

11.3 Specific Response Protocols

11.3.1 Landowner Roadblocks, Demonstrations or Attempted Entry

- Notify the Shift Supervisor, Control Room and Security Manager immediately;
- Maintain a safe distance; do not remove barriers, seize property or attempt to disperse a crowd;
- Do not photograph or film individuals except where authorised and safe to do so;
- Do not engage in negotiation — negotiation is the responsibility of the Client's Community Affairs function and Project management;
- Secure the nearest gate or facility, account for personnel, and hold or reroute movements; and
- Record numbers, leaders identified, demands stated, timings and any acts of violence, factually and without judgement.

11.3.2 Theft or Attempted Theft

- Secure the scene and preserve physical evidence;
- Identify and record witnesses;
- Where a suspect is present, exercise the powers described in Section 12 and no more;
- Notify the Shift Supervisor immediately and complete an Incident Report; and
- Refer the matter to the RPNGC only on the authority of the Security Manager, in consultation with the Client.

11.3.3 Violence, Clan Conflict or Disorderly Behaviour

- Withdraw personnel to a safe position and account for all staff;
- Do not intervene in inter-clan or community violence beyond the protection of Project personnel and the securing of Project assets;
- Alert the RPNGC through the Security Manager and inform the Client immediately;
- Consider lockdown, muster or controlled evacuation in conjunction with the emergency response organisation; and
- Maintain a continuous log of events and decisions.

11.3.4 Fire, Medical or Safety Emergency

- Raise the alarm and initiate the site emergency procedure;
- Notify Emergency Response and the Medical facility immediately;
- Control access, clear routes for emergency vehicles and prevent re-entry to affected areas;
- Support muster point control and headcount reporting to the Emergency Coordinator; and
- Hand over scene control to the Incident Commander on arrival.

11.3.5 Bomb Threat, Suspect Item or Unexploded Ordnance

- Do not touch, move or approach the item;
- Record the exact wording of any threat and the caller's details;
- Establish a cordon at the distance directed and evacuate away from the item using safe routes; and
- Notify the Security Manager, Client and RPNGC immediately, and await specialist attendance.

11.4 Crisis Management and Business Continuity

A Level 3 incident shall trigger activation of the Company's crisis management arrangements in support of the Client's Emergency Response and Crisis Management structure. Contact directories, call-out cascades, alternate communications and lockdown, shelter-in-place and evacuation plans shall be maintained current, and shall be exercised at least annually with the results documented.

11.5 Investigation and Post-Incident Review

- All Level 2 and Level 3 incidents shall be investigated by a competent person appointed by the Security Manager and independent of the post concerned;
- Investigations shall establish the facts, identify root causes and system failures, and avoid premature attribution of blame;
- Findings shall be translated into corrective actions with named owners and due dates, tracked to closure in the Security Action Register; and
- Lessons learned shall be circulated in briefings and incorporated into training, post orders and risk assessments.

12. USE OF FORCE, DETENTION AND RULES OF ENGAGEMENT

Security personnel are civilians. They hold no police powers. The following rules are mandatory and no instruction from any person may override them.

12.1 Graduated Response

Force shall be applied only as a last resort, only where no lesser means will suffice, and only to the minimum degree and for the minimum duration necessary. The graduated response is:

- Professional presence and observation;
- Clear verbal direction and warning;
- Withdrawal, containment and summoning of assistance;
- Defensive physical measures, strictly limited to self-defence or the defence of another person from imminent harm.

12.2 Prohibited Conduct

Security personnel shall not, under any circumstances:

- Carry or use any firearm, unless expressly and individually authorised in writing under the Firearms Act and by the Client;
- Carry or use any unauthorised weapon, improvised weapon, bush knife, chemical spray or restraint device;
- Use force as punishment, retaliation or to obtain a confession, information or payment;
- Strike, kick, threaten, humiliate, sexually harass or verbally abuse any person;

- Use force against a person who is complying, restrained, injured or fleeing without threat;
- Discharge any warning shot or make any threat involving a firearm; or
- Solicit or accept any payment, gift, favour or inducement in connection with their duties.

12.3 Detention

- Company personnel may detain a person only where the law permits arrest by a private person, and only where detention is necessary to prevent harm, prevent escape or preserve evidence pending the arrival of the RPNGC;
- Any detention shall be reported to the Shift Supervisor and Security Manager immediately and shall be for the shortest possible period;
- A detained person shall be kept in a safe, observed, ventilated location, shall be offered water and access to a toilet, and shall not be held in a container, cell, vehicle or unlit room;
- A detained person shall never be questioned under pressure, searched by an officer of the opposite sex, or held incommunicado;
- A detained minor or a person requiring medical attention shall be given immediate priority, with medical support summoned and a responsible adult or guardian notified; and
- A detention register entry shall be completed recording the time, place, grounds, treatment, welfare provided and time and manner of release or handover.

12.4 Reporting of Force

Every application of force, however minor, and every detention shall be reported as a Level 2 incident, investigated, and reported to the Client. Failure to report the use of force is itself a serious disciplinary offence.

13. HUMAN RIGHTS, COMMUNITY AND LANDOWNER RELATIONS

13.1 Human Rights Commitment

The Company adopts the Voluntary Principles on Security and Human Rights as the governing framework for its conduct on the Project. Human rights risks shall be assessed as part of every Security Risk Assessment, and human rights training shall be a condition of deployment.

13.2 Community Engagement Conduct

- Maintain respectful, consistent and honest dialogue with landowners, community leaders and adjacent villages;
- Report community tension, grievance, rumour or expectation early, so that it can be addressed before it escalates;
- Remain strictly neutral in clan, family, political and benefit-distribution disputes;
- Support, but never substitute for, the Client's Community Affairs and Landowner Liaison functions;
- Observe local custom, protocol and sacred or restricted sites, and seek guidance where uncertain;
- Never make promises, offer employment, discuss compensation or benefits, or comment on royalty, equity or benefit-sharing matters; and
- Recognise that a high proportion of security incidents in the Project environment originate in unmet expectations and poor communication, and that prevention is therefore a communication task as much as a physical one.

13.3 Prohibited Conduct Toward Communities

The following are gross misconduct and will result in immediate removal from the Project and, where applicable, referral to the authorities:

- Any form of sexual exploitation, sexual abuse or transactional sexual conduct involving community members, and any sexual conduct involving a minor;
- Solicitation or acceptance of bribes, or facilitation of unauthorised access in exchange for payment or favour;
- Collusion in theft, fuel siphoning or the removal of Project property;
- Discrimination or abusive conduct on the basis of clan, province, ethnicity, gender, religion or disability; and
- Unauthorised discharge of firearms or the introduction of weapons into the Project area.

13.4 Grievance Mechanism

The Company shall maintain, publicise and support an accessible grievance mechanism through which employees, contractors and community members may raise concerns about security conduct. Grievances shall be logged, acknowledged, investigated impartially and resolved within defined timeframes, and shall be reported to the Client. Retaliation against any person who raises a grievance in good faith is prohibited and is itself a disciplinary offence.

14. UNIFORM, APPEARANCE AND EQUIPMENT

14.1 Uniform and Appearance

Security personnel represent the Company and the Project. Uniform shall be complete, clean, correctly worn and readily identifiable, and shall display the Company name and the officer's identification number. Personnel shall not wear military-pattern clothing, unauthorised insignia or any item suggesting a police or military role. Personal appearance shall be neat and shall comply with Project HSSE requirements.

14.2 Minimum Equipment

The following shall be issued to every officer on duty:

- Company uniform, identification card and safety footwear;
- Personal protective equipment as required by the site risk assessment, including high-visibility vest;
- Serviceable torch with spare batteries;
- Two-way radio, charged, with spare battery and correct channel setting;
- Notebook and pen;
- Whistle; and
- Wet-weather clothing and drinking water appropriate to the post and climate.

14.3 Additional Equipment for Designated Posts

- Handheld and walk-through metal detectors;
- Body-worn cameras, where approved and operated under an approved usage and privacy standard;
- Vehicle search mirrors, seals and inspection tools;
- Access-control readers, log terminals and visitor pass equipment;

- Batons or restraint devices, only where individually approved in writing and only for personnel certified in their use; and
- First aid kit, fire extinguisher and emergency contact card at every static post.

14.4 Care and Accountability

All equipment is Company property, issued against signature and accounted for at every shift handover. Loss, damage or malfunction shall be reported immediately. Defective safety-critical equipment shall be replaced before the post is manned.

15. RECRUITMENT, VETTING, LICENSING AND FITNESS FOR DUTY

- No person shall be deployed on the Project until pre-employment screening is complete, including verified identity, employment history, character references, a police clearance and confirmation of a current security guard permit;
- The Company shall maintain a register of personnel licences and permits, with expiry dates monitored so that no officer works on an expired permit;
- Personnel shall declare any conflict of interest, including landowner status, clan affiliation to an affected LOU, or a family relationship with a person under investigation, and shall not be posted where the conflict is material;
- All personnel shall complete Project induction and site-specific orientation before first deployment;
- Personnel shall be medically fit for the duties assigned and shall report any condition affecting fitness for duty;
- Fatigue shall be managed through rostering that complies with Project hours-of-work limits; no officer shall work consecutive shifts without an approved rest period, and no fatigued officer shall be posted; and
- The Company enforces a zero-tolerance drug and alcohol standard and shall support random and for-cause testing in accordance with Client requirements.

16. TRAINING AND COMPETENCY

Deployment is conditional upon competence. The following are mandatory before or immediately upon first deployment, and shall be refreshed at the intervals stated:

Training Module	Frequency	Applies To
Project induction and site-specific orientation	On mobilisation	All personnel
This Policy, post orders and reporting standards	On mobilisation, then annually	All personnel
Human rights and VPSHR awareness	On mobilisation, then annually	All personnel
Use of force, detention and legal powers	Annually	All personnel
Conflict resolution and de-escalation	Annually	All personnel
Community and LOU engagement, cultural awareness	Annually	All personnel
Access control, search and documentation	Annually	Gate and access personnel
First aid and emergency response	Every two years	All personnel; minimum one certified per shift
Fire safety and evacuation	Annually	All personnel

Training Module	Frequency	Applies To
Radio procedure and control room operation	Annually	Control room and supervisory personnel
Report writing, evidence handling and investigation	Annually	Supervisors and above
Incident command and crisis response exercise	Annually	Supervisors and above
Prevention of sexual exploitation, abuse and harassment	Annually	All personnel

Training records shall be maintained for every individual, with attendance, assessment outcome and expiry date recorded. A competency matrix shall be maintained by the Deputy Security Manager and reviewed monthly.

17. RECORDS, INFORMATION SECURITY AND CONFIDENTIALITY

17.1 Mandatory Records

- Daily Occurrence Book (DOB) — bound, sequentially numbered, written in ink, with no erasure; errors corrected by single strike-through and initial;
- Shift Handover Report;
- Access Control Log and Visitor Register;
- Vehicle and Cargo Movement Log;
- Patrol Log;
- Incident Report Forms and Investigation Reports;
- Detention Register;
- Use of Force Register;
- Key and Seal Register;
- Property Damage and Loss Log;
- Equipment Issue and Defect Register; and
- Training, Licence and Permit Registers.

17.2 Standards for Records

Records shall be contemporaneous, factual, legible and complete. They shall record what was observed, not what was assumed. Falsification, back-dating, alteration or destruction of a security record is gross misconduct and may constitute a criminal offence.

17.3 Retention and Release

Security records shall be retained for a minimum of seven years, or for such longer period as the Client or the law requires, and shall be stored securely with controlled access. CCTV footage shall be retained for the period specified in the Site Security Plan. No record, photograph, footage or report shall be released to any third party, including media, social media, community representatives or public authorities, except on the written authority of the Security Manager.

17.4 Confidentiality and Information Handling

- Security information shall be shared strictly on a need-to-know basis;
- Personnel shall not discuss Project security matters, movements, incidents or vulnerabilities with any unauthorised person;

- Personnel shall not post any image, video, location or commentary concerning the Project or its security to social media;
- Personal data collected through access control and CCTV shall be used only for the purpose collected, held securely and not disclosed unlawfully; and
- The confidentiality obligation continues after employment ends.

18. INTEGRATION WITH HEALTH, SAFETY AND ENVIRONMENT

Security is an element of the Project's integrated HSSE system, not a parallel one. Accordingly:

- Security personnel shall comply with all site HSSE rules, permits and life-saving rules, and shall report unsafe acts and conditions;
- Every security officer holds Stop Work Authority and shall exercise it where a security-related activity presents an imminent danger;
- Security shall support emergency mustering, headcount, traffic management and access control during drills and real events;
- Security tasks presenting their own hazards — night patrol, river crossings, lone working, wildlife and heat exposure — shall be risk-assessed and controlled; and
- Security incidents with a safety or environmental dimension shall be reported into both the security and HSSE reporting systems.

19. PERFORMANCE MONITORING, ASSURANCE AND AUDIT

Assurance Activity	Frequency	Responsibility
Post and patrol verification checks	Every shift	Shift Supervisor
Documentation and register review	Weekly	Deputy Security Manager
Site security inspection	Monthly	Security Manager
Performance report to Client (KPIs, incidents, trends, actions)	Monthly	Security Manager
Security drill or exercise	Quarterly	Security Manager
Internal audit against this Policy	Six-monthly	Operations Director
Management review of the security management system	Annually	Managing Director

Performance shall be measured against the objectives in Section 6 and against agreed key performance indicators, including post coverage and punctuality, patrol completion, report timeliness and quality, training currency, permit compliance, incident and loss trends, close-out of corrective actions, and the number and resolution of community grievances. Results shall be reported to the Client and used to drive corrective action.

20. COMPLIANCE, DISCIPLINE AND NON-COMPLIANCE

Compliance with this Policy is a condition of employment and of continued deployment on the Project. Breaches shall be dealt with fairly, consistently and in accordance with the Company's disciplinary procedure and Papua New Guinea employment law, with the right to be heard before any sanction is imposed.

Sanction	Typical Application
Verbal warning (recorded)	Minor first breach, such as incomplete records or uniform standards.
Written warning	Repeated minor breach or a first breach of a substantive requirement.
Final written warning	Serious breach, or repetition following a written warning.
Suspension pending investigation	Any allegation of gross misconduct, or where continued presence would prejudice an investigation.
Immediate removal from the Project	Conduct incompatible with continued deployment, at the Client's or Company's direction.
Termination of employment	Gross misconduct.
Referral to the RPNGC and the Security Industries Authority	Conduct constituting a criminal offence or a breach of the industry Code of Conduct.

Without limiting the foregoing, the following are gross misconduct: sleeping on duty; abandoning a post; intoxication on duty; theft or collusion in theft; solicitation or acceptance of a bribe; falsification of records; unauthorised use of force; unauthorised possession of a weapon; sexual exploitation, abuse or harassment; unauthorised disclosure of security information; and failure to report a serious incident.

21. REVIEW, AMENDMENT AND CONTINUOUS IMPROVEMENT

This Policy shall be reviewed:

- At least every twelve months as a scheduled review;
- Immediately following any Level 3 incident, or any Level 2 incident that reveals a systemic weakness;
- On any material change to the Project footprint, phase, workforce size or contractual scope;
- On any material change in the threat environment, including changes arising from landowner, benefit-sharing or development forum processes;
- On any change to applicable law, licensing conditions or Client security requirements; and
- On the recommendation of an internal or external audit.

Amendments shall be approved by the Managing Director, recorded in the Revision History, issued with a new version number, and communicated to all personnel through briefing. Superseded versions shall be withdrawn from circulation and marked accordingly.

Southern Cross Strategic Holdings Pte Limited is committed to continuous improvement and operational excellence in the delivery of security services to the Papua LNG Project, and to doing so lawfully, safely and with respect for the people and communities of Papua New Guinea.

ANNEXURE A — MINIMUM STATIC POST STANDARD

Requirement	Standard
Post Orders	Current, approved, held at post, signed by every officer assuming the post.
Manning	As per approved deployment table; post never left unmanned; relief on post.
Records	DOB, access log, patrol log and handover entries maintained in ink, contemporaneously.
Communications	Serviceable radio, correct channel, radio check at start of shift and hourly thereafter.
Lighting and visibility	Serviceable lighting; defects reported same shift.
Emergency provision	First aid kit, fire extinguisher, emergency contact card, muster point knowledge.
Welfare	Drinking water, shelter from sun and rain, access to sanitation, scheduled breaks.
Presentation	Full uniform, identification displayed, alert bearing, no mobile phone use for personal purposes.

ANNEXURE B — ACKNOWLEDGEMENT AND UNDERTAKING

To be completed by every person to whom this Policy applies and retained on the individual's personnel file.

I confirm that I have received, read and had explained to me the Land Security Operations Policy (SCSH-POL-LSO-001, Version 2.0) for the Papua LNG Project. I understand its requirements, including the rules governing the use of force and detention, my human rights obligations, and my duty to report incidents. I undertake to comply with this Policy at all times, and I understand that a breach may result in disciplinary action up to and including dismissal and referral to the authorities.
