

PRIVATE SECURITY DETAIL (PSD)

SECURITY POLICY

Papua LNG Project Corridor

Gulf, Central and Southern Highlands Provinces — Independent State of Papua New Guinea

Field	Detail
Document Number	SCSH-SEC-PSD-001
Version	2.1 (Final — Reviewed July 2026)
Classification	Company Confidential — Controlled Copy
Effective Date	01 January 2026 (as revised 25 July 2026)
Review Cycle	Annual, or upon material change to operations, contract, threat or law
Document Owner	General Manager — Integrated Security Solutions
Approving Authority	Board of Directors, Southern Cross Strategic Holdings Pte Limited
Supersedes	PSD Security Policyv2.0 (Papua LNG Project Corridor) and v1.0 (Gulf & Central Provinces)

Head Office: Kerema, Gulf Province | Operational Base: Kikori, Gulf Province

Registered Office: Suva, Republic of Fiji

Revision History

Version	Date	Prepared / Amended By	Summary of Change
1.0	Nov 2025	PSD Manager	Initial issue covering Gulf and Central Provinces PSD operations.
2.0	Jan 2026	Integrated Security Solutions Division	Comprehensive revision: alignment to Papua LNG project corridor requirements; incorporation of the Voluntary Principles on Security and Human Rights; addition of risk management, journey management, operations-room interface, incident investigation, assurance and business-continuity provisions; correction of legacy entity references; addition of annexes.
2.1	Jul 2026	Integrated Security Solutions Division	Mid-cycle review aligning the Policy to the current status of the Papua LNG project (pre-Final Investment Decision engineering and Development Forum phase) and to the prevailing Papua New Guinea security environment. Additions: project-phase and mobilisation security (Section 15); enhanced corridor threat picture and firearms-proliferation context (Section 9); Development Forum, landowner-identification and benefit-distribution provisions (Section 24); refreshed legal and contractual references; strengthened public-security-liaison and vulnerable-persons provisions.

Approval and Authorisation

This Policy is issued under the authority of the Board of Directors of Southern Cross Strategic Holdings Pte Limited (the “Company”) and is mandatory for all persons to whom it applies. No deviation, exemption or local variation is permitted except by the written authority of the General Manager — Integrated Security Solutions, endorsed by the Managing Director.

Distribution and Control

- This document is a controlled copy. Printed or electronically forwarded copies are uncontrolled unless stamped and registered by the Document Controller.
- The master copy is retained by the Company Document Controller, Kerema. A current copy shall be held at each Operations Room, guard house, and PSD team-leader position.
- This document is classified Company Confidential. It shall not be reproduced, transmitted or disclosed to any third party without the written approval of the General Manager — Integrated Security Solutions, other than to the Client, the Project Operator and regulatory authorities in the lawful discharge of their functions.

Table of Contents

1. Purpose

This Security Policy establishes the operational standards, command arrangements, rules, controls and minimum procedures governing all Private Security Detail (PSD) operations conducted by Southern Cross Strategic Holdings Pte Limited within the Independent State of Papua New Guinea, with specific application to the Papua LNG project corridor during its pre-Final Investment Decision, mobilisation and construction phases.

The objectives of this Policy are to:

- Protect the life, health and safety of Client personnel, Company employees, contractors, visitors and members of the host community.
- Safeguard Client and Company assets, infrastructure, cargo, equipment and information against loss, damage, theft, sabotage, interference and unauthorised access.
- Ensure that all security activity is lawful, proportionate, accountable and consistent with internationally recognised human-rights standards.
- Assure continuity of project operations by preventing, detecting, deterring and responding effectively to security incidents and disruption.
- Provide a single, auditable standard against which PSD performance may be measured, assured and reported to the Client, the Project Operator and regulators.
- Preserve the Company's licence to operate through disciplined conduct, community respect and transparent reporting.

2. Scope and Application

This Policy applies to all PSD activity undertaken by or on behalf of the Company, at all times and in all locations at which the Company holds a security mandate.

2.1 Persons Covered

- All PSD personnel, whether engaged on static, mobile, close-protection, escort, marine, aviation-support or specialist tasking.
- Supervisors, team leaders, shift commanders, operations officers, managers and executives exercising authority over PSD operations.
- Subcontractors, auxiliary personnel, casual and locally engaged staff performing security functions for the Company.
- Company personnel seconded to, or embedded within, Client or Project Operator security structures.
- Public-security personnel operating in liaison with Company PSD teams, to the extent set out in Section 22 and permitted by law.

2.2 Locations Covered

This Policy applies across the Papua LNG project corridor and supporting logistics chain, including but not limited to:

- Papua LNG upstream and downstream facilities, plant sites, wellpads and associated rights of way, including the Elk-Antelope development area.
- Kimu and Barikewa gas-field locations and associated exploration and development sites.
- Uramu Marine Base and all Company-supported marine and river interfaces.
- Kikori operational area, Kerema headquarters, provincial offices, warehouses, laydown yards, fuel farms and accommodation camps.

- Pipeline corridors, access roads, airstrips, helipads, barge landings, jetties and river routes used in support of the project.
- All Company vehicles, vessels, convoys and movements between the above locations.

2.3 Relationship to Other Instruments

This Policy is subordinate to the Company's Group governance instruments and is to be read together with the Border Security Policy, Lands Security Operations Policy, Sea Marshal Security Policy, K9 Operations Policy, Quick Response Team (QRT) Policy, Operations Room Policy, Transport Policy, Logistics and Stores Policy, and the Zero-Tolerance Conduct, Ethics and Prohibited Behaviour Policy (SCSH-HR-GOV-001). Where a Client or Project Operator security requirement imposes a higher standard than this Policy, the higher standard prevails. Where any provision of this Policy conflicts with the law of Papua New Guinea, the law prevails, and the conflict shall be reported immediately to the General Manager — Integrated Security Solutions for correction of this Policy.

3. Policy Statement

The Company will deliver private security services that are professional, lawful, unarmed by default, human-rights compliant and demonstrably fit for the risk environment of the Papua LNG project corridor. The Company holds that no operational objective, contractual expectation or commercial consideration justifies unlawful conduct, disproportionate force, discrimination, corruption, or disregard for the safety or dignity of any person.

Every PSD officer is personally accountable for the lawfulness of their own actions. Every supervisor is additionally accountable for the conduct of their team, for the accuracy of their reporting, and for the escalation of matters beyond their authority. The Company will support personnel who act correctly under pressure and will act decisively against those who do not.

4. Definitions and Abbreviations

Term	Meaning
Client	The entity contracting the Company for the provision of security services on the Papua LNG project.
Project Operator	The operator of the Papua LNG project and associated joint-venture participants.
PSD	Private Security Detail — a formed body of Company security personnel assigned a defined protective task.
Close Protection (CP)	The protection of a designated principal from assault, kidnap, harassment, embarrassment or injury.
Use of Force (UoF)	Any physical action applied to another person to control, restrain, repel or prevent an act.
RUF	Rules for the Use of Force — the authorised force framework issued at Annex A.
VPSHR	Voluntary Principles on Security and Human Rights.
Op-Room	The Company Operations Room providing 24/7 command, control, communications and movement monitoring.
JMP	Journey Management Plan.
DOB	Daily Occurrence Book.
SITREP	Situation Report.
IMT	Incident Management Team.

Term	Meaning
Development Forum	The statutory, State-convened forum under the Oil and Gas Act at which benefit-sharing among the State, provincial and local-level governments and project-area landowners is negotiated and agreed.
LOBID / SMLOI	Landowner Identification / Social Mapping and Landowner Identification studies used to determine beneficiary landowners of the project.
SARV	Sorcery-Accusation-Related Violence — violence directed at persons accused of sorcery, a recognised protection concern in Papua New Guinea.
Public Security	The Royal Papua New Guinea Constabulary, Papua New Guinea Defence Force and other State security agencies.
LOU	Landowner Unit — a recognised local landowner grouping or association.

5. Legal, Regulatory and Contractual Framework

PSD operations shall at all times be conducted in compliance with the laws of Papua New Guinea and with the standards adopted by the Company. The following instruments are of primary application.

5.1 Papua New Guinea Law

- The Constitution of the Independent State of Papua New Guinea, in particular the Basic Rights provisions.
- Security (Protection) Industry Act and Regulations, and the licensing requirements of the Security Industries Authority.
- Firearms Act and associated Regulations, together with all Royal Papua New Guinea Constabulary licensing conditions and any prevailing controls arising from national firearms-management measures.
- Criminal Code Act, in particular the provisions governing self-defence, defence of another, defence of property and arrest.
- Employment Act, Industrial Relations legislation and applicable wage determinations.
- Industrial Safety, Health and Welfare legislation and workers' compensation requirements.
- Oil and Gas Act and any project-specific regulatory instruments, licences, development-forum agreements and permits.
- Environment Act, and Customs, Immigration, Land, Maritime and Civil Aviation legislation, as applicable to the task.

Note: Statutory titles, amendments and commencement dates shall be verified annually by the Company's legal adviser in Papua New Guinea, and this Section updated accordingly. Personnel are not required to interpret legislation; they are required to comply with the lawful instructions and standing orders issued under it.

5.2 International and Industry Standards

- The Voluntary Principles on Security and Human Rights (VPSHR).
- The United Nations Basic Principles on the Use of Force and Firearms by Law Enforcement Officials, and the UN Code of Conduct for Law Enforcement Officials, as adapted to private security.
- The UN Guiding Principles on Business and Human Rights.
- IFC Performance Standard 4 (Community Health, Safety and Security) and Performance Standard 2 (Labour and Working Conditions).
- The International Code of Conduct for Private Security Service Providers (ICoC), as a guiding standard.
- ISO 18788 (Security Operations Management Systems) and ISO 31000 (Risk Management), as management-framework references.

5.3 Contractual Obligations

- The security requirements, site rules, golden rules and life-saving rules of the Client and the Project Operator.
- All Company Standard Operating Procedures, Standing Orders, Post Orders and Special Instructions issued under this Policy.
- Community, landowner and provincial-government undertakings entered into by the Company or the Project, including commitments arising from the Papua LNG Development Forum and associated benefit-sharing, local-content and community-development agreements.

6. Governance, Command and Control

6.1 Chain of Command

PSD operations are conducted under a single, unambiguous chain of command. Every officer shall know their immediate superior, their alternate, and the escalation path above them. Instructions received from any person outside the chain of command — including Client staff, community leaders, public-security personnel or third parties — shall not be acted upon unless they concern immediate life safety, and shall be reported to the Operations Room without delay.

Level	Position	Principal Accountability
1	Managing Director / Board	Policy approval, resourcing, corporate accountability, external representation.
2	General Manager — Integrated Security Solutions	Policy ownership, contract performance, assurance, discipline authority, Client interface.
3	PSD Manager	Command of all PSD operations, compliance oversight, risk acceptance within delegated limits.
4	Operations Officer / Op-Room Controller	Daily tasking, mission planning, movement control, reporting, first-line escalation.
5	Site Supervisor / Shift Commander	Site-level command, post inspection, shift handover, welfare, immediate response.
6	Team Leader	Direct supervision of officers, briefing, discipline at first instance, accuracy of records.
7	PSD Officer	Execution of duties in accordance with Post Orders, this Policy and the RUF.

6.2 Delegation and Absence

- Command shall never be vacant. Every commander shall nominate a competent alternate in writing before departing their area of responsibility.
- Delegation of authority does not delegate accountability. A commander remains accountable for decisions taken under their delegation.
- Handover between shifts and rotations shall be conducted face to face wherever practicable, recorded in the Daily Occurrence Book and signed by both parties.

6.3 Standing Orders and Post Orders

- Every PSD post shall hold current, site-specific Post Orders approved by the PSD Manager, describing the task, boundaries, threats, permissions, prohibitions, communications, escalation and emergency actions applicable to that post.
- Post Orders shall be reviewed at least six-monthly, and immediately following any significant incident or change of threat.

- No officer shall assume a post until they have read, or had read to them in a language they understand, the Post Orders for that post, and have signed the acknowledgement register.

7. Roles and Responsibilities

Role	Key Responsibilities
General Manager — Integrated Security Solutions	Owens this Policy; approves exemptions; chairs the Security Review Board; reports assurance outcomes to the Board and Client; authorises armed-tasking submissions.
PSD Manager	Commands PSD operations; approves operational orders and journey-management plans; maintains the risk register; convenes incident investigations; certifies personnel competence.
Operations Officer	Issues daily tasking; maintains the Op-Room battle rhythm; controls movement tracking; compiles SITREPs; activates escalation and emergency response.
Site Supervisor	Enforces Post Orders; conducts documented post inspections each shift; manages equipment accountability; monitors fitness for duty and welfare.
Team Leader	Briefs and debriefs the team; leads by example; verifies documentation accuracy; reports misconduct without delay.
PSD Officer	Performs assigned duties lawfully and diligently; maintains alertness, appearance and discipline; reports all incidents, hazards and observations truthfully.
HSSE Manager	Provides safety assurance, incident-classification support, medical and emergency-response integration, and welfare oversight.
Human Resources Manager	Manages recruitment, vetting, contracts, grievance handling and disciplinary-process administration.
Training Manager	Delivers and records mandatory training; maintains the competency matrix; withdraws authorisation from personnel not current.
Community Liaison Officer	Manages landowner and community engagement, grievance intake and cultural advice to PSD commanders.

8. Security Risk Management

8.1 Risk Assessment

- A documented Security Risk Assessment shall be maintained for every site, route and recurring task, and shall address criminality; tribal and clan conflict; landowner grievance and compensation disputes; benefit-distribution and landowner-identification disputes; civil unrest; labour disputes; roadblocks and illegal levies; theft and pilferage; sabotage and interference with infrastructure; kidnap and extortion; armed robbery; cyber and information threats; and natural hazards including seismic events, flooding and landslip.
- Risk assessments shall be reviewed at least quarterly, and immediately upon any significant incident, change of threat, change of task or change of location.
- Where residual risk exceeds the Company's tolerance, the task shall not proceed until additional controls are approved by the PSD Manager or, for high residual risk, the General Manager.

8.2 Threat and Security Levels

The Company shall operate a graduated security-level system, aligned where possible with the Client and Project Operator, defining posture, movement permissions and manning at each level.

Level	Descriptor	Indicative Posture
GREEN	Normal	Routine operations; standard manning; normal movement; routine patrolling.
YELLOW	Elevated	Heightened vigilance; increased patrols; movement subject to Op-Room clearance; enhanced access screening.
ORANGE	High	Non-essential movement suspended; convoy movement only; reinforced posts; standby response team; curfew of Company personnel.
RED	Critical	Lockdown or evacuation posture; movement prohibited except emergency; Incident Management Team activated; Client and public-security liaison engaged.

8.3 Stop-Work and Refusal Authority

Any person, of any rank, may stop or refuse a task they reasonably believe cannot be performed safely or lawfully. No person shall suffer detriment for the good-faith exercise of this authority. The matter shall be reported immediately to the Op-Room and resolved by the PSD Manager.

9. Operating Environment and Corridor Threat Picture

This Section provides the current context against which risk assessments, Post Orders and journey-management plans shall be prepared. It is indicative and shall be read together with the live threat assessment maintained by the PSD Manager; it does not replace site-specific analysis.

9.1 Project Context

The Papua LNG project, operated by the Project Operator on behalf of its joint-venture participants, is progressing through detailed engineering and the statutory Development Forum toward a Final Investment Decision. This period is characterised by heightened community expectation, the mobilisation of engineering, procurement and construction contractors, an increase in the movement of personnel, plant and materials along the corridor, and intensified public and political attention. Each of these factors carries security implications that PSD planning shall anticipate rather than merely react to.

9.2 Principal Threats

- **Firearms proliferation and organised violence.** Parts of the Highlands region adjoining the corridor experience tribal and clan conflict aggravated by the availability of high-powered and automatic firearms and, in some areas, the engagement of hired fighters. PSD teams shall treat any indication of armed group activity as a serious threat, avoid entanglement, and prioritise early warning, withdrawal and reporting over confrontation.
- **Landowner grievance and benefit disputes.** Disputes over landowner identification, clan boundaries, and the distribution of royalties, compensation and development benefits are a foreseeable source of tension, protest and access disruption, particularly during and after the Development Forum. Such matters are community and Project issues, not security matters, and shall be referred to the Community Affairs function.
- **Roadblocks, illegal levies and access denial.** Unlawful roadblocks and demands for informal payments may be encountered on access roads, provincial routes and at the approaches to sites. The standing response is: do not pay, do not confront, halt at a safe distance, report immediately and await instruction.
- **Criminality.** Opportunistic and organised theft, pilferage of fuel, copper and equipment, armed robbery, and vehicle-related crime are persistent risks to assets, cargo and personnel in transit.
- **Civil unrest and opportunistic disorder.** Wage disputes, political events and grievances can generate demonstrations and looting with little warning, including in urban centres through which

Company logistics pass. Company personnel shall not participate in, film or comment on such events.

- **Kidnap, extortion and coercion.** The value of the Project and of individual principals creates a residual kidnap-and-extortion risk to be managed under Section 26 (Crisis Management).
- **Sabotage and interference.** Interference with the pipeline right-of-way, wellpads, fencing, lighting and communications — whether criminal, protest-related or grievance-driven — shall be detected, reported and preserved for investigation without pursuit beyond the site boundary.
- **Sorcery-accusation-related violence and harm to vulnerable persons.** PSD personnel shall be alert to the risk of violence directed at accused persons, women, children and other vulnerable persons in surrounding communities, shall not participate in or facilitate such acts, and shall report credible threats to life to the Op-Room and, as appropriate, to public security.
- **Natural hazards.** The corridor is exposed to significant seismic activity, flooding, landslip and severe weather affecting both the Highlands and the low-lying Gulf terrain. Emergency arrangements under Section 14.6 shall address these hazards.
- **Information and cyber threats.** Elicitation, surveillance of movements, and compromise of manifests, itineraries and camera locations are treated as security threats under Section 19.

9.3 Interface with the State Security Environment

The capacity of State law-and-order agencies is constrained relative to the size and terrain of the country, and the Company therefore plans on the basis of self-reliance for prevention and early response, with public security engaged for armed response, arrest and prosecution. The Company supports and does not substitute for lawful State authority. Where national measures to reduce armed violence — including firearms-control and community-safety initiatives — affect Company operations, personnel shall comply and commanders shall reflect them in Post Orders and briefings.

10. Recruitment, Vetting and Accreditation

10.1 Minimum Requirements

- Lawful right to work in Papua New Guinea and verified identity documentation.
- Current Police Clearance Certificate and satisfactory criminal-record check, renewed in accordance with Company standards.
- Valid Papua New Guinea security-guard licence or registration as required by the Security Industries Authority.
- Verified employment history, a minimum of two independent character or professional references, and verification of claimed qualifications.
- Satisfactory pre-employment medical examination, fitness assessment and, where the task requires, substance screening.
- Successful completion of Company induction, site induction and the mandatory training set out in Section 11.
- Signed acknowledgement of this Policy, the Code of Conduct, the Rules for the Use of Force and the confidentiality undertaking.

10.2 Screening for Human-Rights Risk

In accordance with the Voluntary Principles, the Company shall not knowingly engage any person credibly implicated in human-rights abuses, unlawful violence, sexual exploitation or abuse, or serious criminality. Any such allegation arising during employment shall be investigated and, where substantiated, shall result in removal from all Project-related duties and referral to the appropriate authority.

10.3 Ongoing Suitability

- Vetting is continuous. Personnel shall notify the Company within twenty-four hours of any arrest, charge, conviction, licence suspension, or adverse change in medical fitness.
- Re-vetting shall occur at contract renewal, on promotion to a supervisory or armed position, and at intervals not exceeding two years.
- Local recruitment shall, wherever practicable, be undertaken transparently and in balanced proportion across affected landowner and community groups, in coordination with the Community Liaison Officer, to reduce grievance and perceived favouritism.

11. Training, Competency and Authorisation

No person shall perform a PSD task for which they are not trained, assessed as competent and currently authorised. The Training Manager shall maintain a competency matrix for every individual, and shall withdraw authorisation immediately where currency lapses.

Training Module	Applies To	Frequency
Company induction, Policy and Code of Conduct	All personnel	On engagement
Basic Security Training Levels 1–3	All PSD officers	On engagement; refresher 12 months
Rules for the Use of Force and de-escalation	All personnel	On engagement; refresher 6 months
Human rights and VPSHR awareness	All personnel	On engagement; refresher 12 months
First aid, CPR and casualty handling	All personnel; min. two per shift certified	24 months
Emergency response, evacuation and muster drills	All personnel	Drill each 6 months
Radio procedure, reporting and DOB discipline	All personnel	On engagement; refresher 12 months
Access control, search and screening technique	Static and gatehouse personnel	12 months
Defensive and off-road driving; convoy procedure	Drivers and mobile teams	24 months
Close-protection skills and principal handling	CP operators	12 months
Marine safety, sea survival and craft handling	Marine and river personnel	24 months
Helicopter and airstrip safety awareness	Aviation-support personnel	24 months
Firearms competency, safe handling and law	Licensed armed personnel only	6 months, with live assessment
Community engagement and cultural awareness	All personnel	12 months
Supervisory command, briefing and investigation	Team Leaders and above	24 months
Anti-bribery, fraud awareness and whistleblowing	All personnel	12 months

All training shall be documented with date, content, instructor, assessment outcome and trainee signature. Training records are auditable Client deliverables and shall be produced on request.

12. Uniform, Identification and Equipment

12.1 Standards of Appearance

- The approved Company uniform shall be worn complete, clean, serviceable and correctly fitted at all times on duty.
- Company photographic identification shall be worn visibly at all times on duty, and produced on lawful request.
- Uniform and identification shall not be worn off duty, in licensed premises, or for any private purpose, and shall be surrendered on cessation of employment.
- Wearing, displaying or imitating public-security or military uniform, insignia, rank or accoutrement is strictly prohibited.

12.2 Issued Equipment

- Radios, satellite communications and mobile telephones as allocated to the post or task.
- Torch, notebook, pen, whistle, and current Post Orders and RUF card.
- Personal protective equipment appropriate to the task, including high-visibility clothing, safety footwear, eye protection, hearing protection and, where the risk assessment requires, ballistic protection.
- Personal flotation devices for all marine, river, jetty and over-water tasking, worn at all times when afloat or working at the water's edge.
- First-aid kit, fire extinguisher and emergency equipment at each post and in each vehicle and vessel.
- Search, screening and detection equipment as issued, including hand-held detectors and, where deployed, canine capability under the K9 Operations Policy.

12.3 Accountability

- All issued equipment shall be signed for, recorded in the equipment register, inspected at each shift handover, and returned on completion of duty or employment.
- Loss, damage or malfunction shall be reported immediately. Deliberate damage, unauthorised modification or private use may result in disciplinary action and recovery of cost.
- The carriage or use of unauthorised weapons, tools, chemical agents, restraints or personal equipment is strictly prohibited and constitutes serious misconduct.

13. Use of Force

13.1 Governing Principle

The Company's operating posture is preventive and unarmed by default. The primary tools of the PSD officer are observation, presence, communication, negotiation, de-escalation and withdrawal. Force is a measure of last resort, to be used only where no lawful alternative exists.

13.2 Mandatory Tests

Any use of force must simultaneously satisfy all of the following tests. If any test fails, force shall not be used:

- **Lawful** — permitted by the law of Papua New Guinea and by this Policy.
- **Necessary** — no reasonable non-forceful alternative is available.
- **Reasonable** — objectively justifiable on the facts known at the time.
- **Proportionate** — the minimum degree and duration necessary to address the threat.

- **Accountable** — immediately reported, fully documented and open to independent review.

13.3 Prohibited Conduct

- Force used as punishment, retaliation, intimidation, coercion or to extract information or confession.
- Force against any person who has ceased resistance, is restrained, or is in custody.
- Force against children, the elderly, pregnant women or persons with evident disability, except where strictly unavoidable to protect life.
- Any form of torture, cruel, inhuman or degrading treatment, sexual harassment, sexual exploitation or abuse.
- Firing warning shots, firing at or from a moving vehicle, or firing where the backdrop cannot be identified.
- Use of force to protect property alone, where no threat to life exists.

13.4 Lethal Force

Lethal force may be used only where there is an imminent threat of death or serious bodily harm to the officer or another person, no lesser means will suffice, and the action is lawful under Papua New Guinea law. Where circumstances permit, a clear warning shall be given and time allowed for compliance.

13.5 Detention and Arrest

- PSD officers hold no special powers of arrest beyond those available to any citizen under Papua New Guinea law.
- Any person detained shall be treated humanely, shall not be searched by a person of the opposite sex, shall be kept in view of a second officer, and shall be handed to the Royal Papua New Guinea Constabulary at the earliest opportunity.
- Detention shall be recorded from the first moment, with time, location, grounds, treatment, injuries observed and handover details, and reported immediately to the Op-Room.

13.6 Post-Incident Obligations

- Render or summon medical assistance without delay to any person injured, irrespective of their conduct.
- Report to the Op-Room immediately by the fastest available means, and submit a written statement before going off duty.
- Preserve the scene, secure evidence, and identify and record witnesses.
- Personnel involved shall be withdrawn from operational duty pending review, and offered welfare and psychological support. Withdrawal is a precaution, not a finding of fault.
- Every use of force is reportable to the General Manager within twenty-four hours and to the Client in accordance with contractual notification requirements.

14. Weapons and Ammunition Management

14.1 Default Unarmed Posture

PSD operations on the Papua LNG project corridor shall be conducted unarmed unless armed tasking is separately assessed, approved in writing by the General Manager, permitted under Papua New Guinea firearms licensing, and accepted by the Client and Project Operator. Where an armed response is required, the default course of action is to request the support of public security.

14.2 Conditions Where Firearms Are Authorised

- Only individually licensed, certified and currently assessed personnel may be issued a firearm, and only for the specific task and period authorised.
- Firearms and ammunition shall be stored in an approved armoury with a documented key and access-control regime, separate secure storage for ammunition, and a nominated Armourer accountable for stock.
- Issue and return shall be recorded in the Armoury Register with weapon serial number, ammunition count, time, purpose, and the signatures of both the issuing and receiving persons.
- A physical stock check shall be conducted at each shift change, with a full audit monthly and reconciliation by the PSD Manager.
- Weapons shall be carried, transported and handled in accordance with the standing safety rules at all times, including muzzle discipline, trigger discipline, condition of readiness and clearing procedures at designated unloading points.

14.3 Prohibitions and Enforcement

- Carriage of any firearm, ammunition, edged weapon or improvised weapon without written authority is strictly prohibited.
- A negligent discharge, loss of a weapon or ammunition, unauthorised carriage, or any misuse shall result in immediate suspension, formal investigation, notification to the Royal Papua New Guinea Constabulary where required, and may result in termination and criminal referral.
- Alcohol or any substance impairing judgement absolutely prohibits the issue or handling of a firearm.

15. Project-Phase and Mobilisation Security

The security posture shall be tailored to the phase of the Project. As the Project advances from engineering and the Development Forum into construction mobilisation, the Company shall anticipate the security consequences of a rapidly changing footprint.

- **Contractor and workforce mobilisation.** The arrival of engineering, procurement and construction contractors and their workforces increases the number of persons, vehicles and movements requiring access control, screening and journey management. PSD planning shall be coordinated with contractor security arrangements to avoid gaps and duplication.
- **In-migration and camp perimeters.** Large projects attract an influx of job-seekers, informal settlement and associated social pressures around camps, laydown yards and access points. Perimeter security, access control and community-liaison arrangements shall be strengthened accordingly, without recourse to unlawful or disproportionate measures.
- **Labour and industrial risk.** Disputes over recruitment, wages, local content and demobilisation are foreseeable. PSD teams shall maintain a neutral, lawful posture, protect life and property, and refer the substance of disputes to Human Resources and Community Affairs.
- **Expanding footprint and new sites.** Each new site, route or interface shall have a Security Risk Assessment and Post Orders in place before occupation. Annex C shall be updated by the PSD Manager as the footprint changes.
- **Logistics surge.** Increased movement of fuel, plant and high-value materials raises the risk of theft, diversion and interference; convoy, escort and stores controls shall be scaled to the surge in coordination with the Logistics and Stores Policy and the Transport Policy.

16. PSD Operational Procedures

16.1 Static Guarding and Access Control

- Control all entry and egress; verify identity, authorisation and purpose; issue, record and recover visitor passes.
- Conduct lawful, consistent and courteous search and screening of persons, bags, vehicles and cargo in accordance with published site rules and the consent of the person searched. Searches of women shall be conducted by female officers.
- Maintain perimeter integrity; conduct documented perimeter and internal patrols at irregular intervals; report defects in fencing, lighting, gates and barriers.
- Monitor CCTV, alarms and detection systems where installed; log all activations and the action taken.
- Control the movement of tools, materials and equipment through gate passes and material-release procedures, in coordination with the Logistics and Stores Policy.
- Maintain the Daily Occurrence Book contemporaneously; entries shall be legible, in ink, sequential, timed and signed, with no erasure.

16.2 Mobile and Response Patrols

- Patrol only in approved, roadworthy vehicles fitted with communications and tracking, with a minimum crew of two.
- Vary patrol timings, routes and patterns; never establish a predictable routine.
- Report position and status to the Op-Room at the prescribed interval; a missed report triggers the overdue procedure.
- Maintain a designated response capability at readiness at each manned location during operational hours, with defined response times.
- Do not pursue offenders beyond the site boundary; observe, record and report.

16.3 Close Protection (VIP and Executive)

- Conduct advance reconnaissance of routes, venues and reception points, with primary and alternate routes and identified safe havens and medical facilities.
- Prepare a written protective plan and threat assessment for each task, approved by the PSD Manager.
- Employ appropriate escort formation, embus and debus drills, defensive driving and anti-surveillance measures proportionate to the assessed threat.
- Maintain low-profile posture as the default; ostentatious or intimidating protective display is prohibited.
- Coordinate with public security, the Op-Room and the Client's travel-management function; confirm medical-evacuation arrangements before movement.

16.4 Convoy and Escort Operations

- All escort tasks require an approved Journey Management Plan and Op-Room clearance before departure.
- Conduct a documented pre-movement brief covering route, timings, order of march, communications, actions on breakdown, ambush, roadblock, accident and medical emergency.
- Maintain convoy discipline, spacing and speed appropriate to road condition; the convoy commander alone authorises halts.

- At an unlawful roadblock or illegal levy: do not pay, do not confront, stop at a safe distance, report immediately, and await instruction. De-escalation and withdrawal take precedence over the schedule.

16.5 Marine, River and Aviation Support

- Marine and river movements shall comply with vessel-safety requirements, manifest control, life-jacket discipline and daylight-movement rules unless otherwise authorised, in coordination with the Sea Marshal Security Policy.
- Jetty, barge-landing and Uramu Marine Base operations shall maintain access control, cargo screening and boarding control consistent with the Border Security Policy.
- Helipad and airstrip security shall include perimeter control, foreign-object-debris discipline, crowd control during aircraft movement, passenger and baggage screening, and cordon maintenance.

16.6 Emergency Response

- Emergency-response arrangements shall address medical emergency, fire, security incident, civil disturbance, armed intrusion, evacuation, earthquake, flood, landslip and severe weather.
- Muster points, evacuation routes, headcount procedures and casualty-collection points shall be established, published and exercised at every location.
- PSD teams support but do not replace the Client's emergency-response organisation; roles shall be defined in the site emergency-response plan.
- Drills shall be conducted at least six-monthly, recorded, debriefed, and corrective actions tracked to closure.

17. Journey Management and Movement Control

- No Company movement outside a controlled site shall commence without Op-Room clearance and an approved Journey Management Plan appropriate to the risk of the route.
- The JMP shall record vehicle and vessel details, crew and passenger manifest, cargo, route, departure and expected arrival times, check-in schedule, communications plan, and actions on emergency.
- Movement shall normally be conducted in daylight hours. Night movement requires the specific approval of the PSD Manager on the basis of a documented risk assessment.
- Positive check-in and check-out with the Op-Room is mandatory. Failure to report within the prescribed window shall initiate the overdue vehicle or vessel procedure without delay.
- Movement is prohibited at security level ORANGE and above except for convoy or emergency movement authorised by the PSD Manager.
- All movement control shall be conducted in accordance with the Transport Policy and the Operations Room Policy.

18. Communications and Operations Room Interface

- The Operations Room is the single point of command, coordination and information for all PSD activity, operating twenty-four hours daily.
- Personnel shall use approved radio procedure, authorised call signs and prescribed codes; plain language shall be used for emergency traffic.
- Communications checks shall be conducted at the commencement of every shift and at prescribed intervals; communications failure shall be reported and a fallback means activated.

- Reporting requirements: immediate voice report of any incident; written Incident Report before going off duty; shift SITREP to the Op-Room; consolidated Daily Security Report to the PSD Manager; weekly and monthly security reports to the Client.
- Radios, satellite devices and Company communications equipment shall not be used for private purposes.

Category	Notify	Timeframe
Life-threatening emergency, use of force, weapon discharge, fatality	Op-Room, PSD Manager, General Manager, Client	Immediately by voice; written within 4 hours
Serious incident — assault, armed intrusion, major theft, detention, roadblock	Op-Room, PSD Manager	Immediately; written within 12 hours
Significant incident — trespass, minor theft, vehicle accident, protest	Op-Room, Site Supervisor	Within 1 hour; written within 24 hours
Observation, hazard, near miss, intelligence indicator	Op-Room	Same shift; recorded in DOB

19. Incident Management, Reporting and Investigation

19.1 Principles

- All incidents shall be reported. Concealment, delay, falsification or alteration of a report is serious misconduct.
- Reports shall be factual, contemporaneous and objective, distinguishing clearly between what was seen, what was heard, and what was assumed or inferred.
- Personnel shall not speculate as to cause, apportion blame, or make admissions of liability on behalf of the Company.

19.2 Investigation

- Every serious incident shall be investigated by a competent person independent of the operational chain involved, appointed by the PSD Manager or, for the most serious matters, by the General Manager.
- Investigations shall establish the sequence of events, immediate and underlying causes, adequacy of controls, and corrective and preventive actions, and shall be closed out with tracked actions.
- Allegations of human-rights abuse, sexual exploitation or abuse, corruption, or unlawful use of force by Company personnel or by public-security personnel operating in support of the Project shall be recorded and escalated to the General Manager and reported to the Client in accordance with the Voluntary Principles.
- Nothing in this Policy prevents any person from reporting a criminal matter directly to the Royal Papua New Guinea Constabulary.

19.3 Records Retention

Security records shall be retained for a minimum period of seven years, or such longer period as law, contract or the requirements of an investigation may demand. Records shall be legible, secured against unauthorised access, and produced to the Client, the Project Operator or lawful authority on request.

20. Information Security and Confidentiality

- All Client, Project and Company information — including security plans, manifests, movement schedules, principal itineraries, camera locations, incident details, personnel data and commercial terms — is confidential.

- Personnel shall not discuss, photograph, film, record or publish any aspect of operations, personnel, incidents or facilities, and shall not post any such material to social media or messaging platforms.
- Personal mobile telephones and cameras are prohibited in designated restricted areas, and their use on duty is restricted to authorised purposes.
- Information shall be shared strictly on a need-to-know basis. Requests from media, researchers, non-governmental organisations, politicians or third parties shall be referred without comment to the General Manager.
- Suspected information compromise, loss of a device, or attempted elicitation shall be reported immediately.
- Personal data shall be collected, held and used only for lawful purposes connected with employment or security operations, and protected against unauthorised disclosure.
- Confidentiality obligations survive the termination of employment or engagement indefinitely.

21. Code of Conduct and Professional Standards

Personnel shall uphold the Company values of Integrity, Loyalty and Service, and shall at all times conduct themselves so as to merit the confidence of the Client, the community and their colleagues.

- Treat every person with courtesy, impartiality and respect, without discrimination on any ground.
- Be punctual, alert, correctly dressed, and remain at the assigned post until properly relieved.
- Sleeping on duty, unauthorised absence from post, and use of the post for private business are prohibited.
- Neither solicit nor accept any bribe, gift, commission, favour or inducement; report every such offer.
- Do not levy, permit or facilitate any unlawful payment, informal charge or private arrangement in connection with access, cargo, employment or movement.
- Declare any conflict of interest, including familial, clan, landowner or commercial associations bearing on the performance of duty.
- Do not engage in, facilitate or conceal theft, fraud, harassment, bullying, sexual exploitation or abuse, trafficking, or the trade in alcohol, drugs or illicit goods.
- Do not engage in political activity, tribal advocacy or community dispute while on duty or in uniform.
- Report the misconduct of others. The Company operates a protected-disclosure channel and prohibits retaliation against a person who reports in good faith.

This Section is supplementary to, and shall be read with, the Group Zero-Tolerance Conduct, Ethics and Prohibited Behaviour Policy (SCSH-HR-GOV-001), which prevails in the event of inconsistency.

22. Fitness for Duty, Fatigue and Substance Control

- No person shall commence or remain on duty while impaired by alcohol, illicit drugs, or medication affecting judgement, alertness or coordination.
- The Company applies a zero-tolerance standard to alcohol and illicit substances on all Project sites, in Company accommodation and in Company vehicles and vessels.
- Personnel shall declare prescribed medication that may affect performance to the HSSE Manager in confidence.
- Random, for-cause and post-incident testing may be conducted in accordance with law, contract and the Client's site rules.

- Maximum shift length, minimum rest between shifts and maximum consecutive days worked shall comply with law and the Client's fatigue-management standard; supervisors shall not roster or permit work in breach of these limits.
- Personnel shall report their own fatigue or unfitness without fear of penalty; supervisors shall remove any person assessed as unfit from duty.

23. Human Rights, Public-Security Liaison and Community Engagement

23.1 Voluntary Principles Commitment

The Company conducts its security operations in a manner that respects the human rights and fundamental freedoms of all persons, consistent with the Voluntary Principles on Security and Human Rights. Security shall be provided in a way that does not create, exacerbate or become entangled in community conflict.

23.2 Interaction with Public Security

- Company personnel do not command, direct or task public-security personnel. Coordination shall be conducted through the PSD Manager and the Client's designated liaison arrangements.
- Any support provided to public security — including transport, accommodation, rations, fuel or equipment — shall be pre-approved, documented, provided only under an approved arrangement, and shall never take the form of a cash payment to individuals.
- Company personnel shall not participate in, assist or acquiesce in any act by public security that they believe to be unlawful, and shall record and report any such act to the PSD Manager immediately.
- Credible allegations of human-rights abuse by public security in connection with Project operations shall be recorded and reported to the Client and, as appropriate, to the competent authority.

23.3 Community Engagement

- Engage respectfully with landowner units, ward and village leaders, church leaders, women's representatives and youth groups, in coordination with the Community Liaison Officer.
- Understand and observe local custom, clan boundaries, sacred sites and cultural sensitivities; seek advice before acting where custom is engaged.
- Avoid confrontation. Community disputes, compensation claims and landowner grievances are not security matters and shall be referred to the Community Affairs function.
- Support a functioning community grievance mechanism: receive grievances courteously, record them accurately, provide the complainant with a receipt or reference, and forward them without filtering or delay.
- Take particular care in interactions involving women, children and vulnerable persons, including persons at risk of sorcery-accusation-related violence; a second officer shall be present wherever practicable, and credible threats to life shall be reported without delay.

24. Development Forum, Landowner and Benefit-Distribution Interface

The Papua LNG Development Forum and the associated processes of landowner identification and benefit distribution are central features of the current operating environment and a recognised source of both opportunity and grievance. While these are State and Project matters rather than security functions, they bear directly on the security posture, and PSD commanders shall plan for their consequences.

- PSD personnel shall not take sides in, mediate, or express any opinion on landowner identification, clan-boundary or benefit-distribution matters, and shall refer all such contact to the Community Liaison Officer and Community Affairs function.

- Heightened tension, protest or access disruption may be expected around the timing of forum sessions, the publication of landowner-identification outcomes, and the commencement or delay of benefit payments; risk assessments and Post Orders shall reflect this.
- Local recruitment, procurement and community-development activity shall be handled transparently and equitably to reduce perceptions of favouritism among landowner and community groups, in coordination with the Community Liaison Officer.
- Company personnel shall neither facilitate nor obstruct lawful movement of recognised landowner representatives and officials in connection with the forum, and shall report any attempt to use Company assets or access for private advantage.
- Threats, intimidation or violence connected with benefit disputes shall be reported to the Op-Room and, where life is at risk, to public security, and shall be recorded for investigation.

25. Health, Safety, Environment and Welfare

Southern Cross Strategic Holdings Pte Limited commits to protecting the health, safety and welfare of its personnel to a standard no less than that applied to the Client's own workforce.

- Provide a safe place of work, safe systems of work, and the training, supervision and equipment necessary to perform duties without unacceptable risk.
- Provide sanitary, secure accommodation, adequate potable water, nutrition and shelter appropriate to remote and field conditions.
- Ensure medical support, first-aid coverage, casualty-evacuation arrangements and access to primary healthcare at every operating location.
- Manage malaria, tuberculosis, water-borne disease and other endemic health risks through prevention, awareness and access to treatment.
- Provide access to confidential welfare, counselling and post-incident psychological support, particularly following violent or traumatic incidents.
- Ensure prompt payment of correct wages and entitlements, defined rotation cycles, and reliable leave and travel arrangements.
- Comply with all Project environmental requirements, including waste management, spill prevention and reporting, and prohibitions on hunting, fishing, logging and the taking of flora or fauna.

26. Disciplinary Framework

Discipline shall be applied fairly, consistently, proportionately and without discrimination, following a documented process in which the individual is informed of the allegation, given the opportunity to respond, and afforded a right of appeal.

Category	Examples	Indicative Outcome
Minor	Lateness; incomplete DOB entry; uniform deficiency; failure to conduct a radio check.	Counselling; verbal warning; retraining.
Serious	Absence from post; sleeping on duty; failure to report an incident; unsafe driving; insubordination.	Written warning; final written warning; suspension; removal from post.
Gross	Use of force in breach of this Policy; theft; bribery; falsification of records; alcohol or drugs on duty; unauthorised weapon; harassment or assault; breach of confidentiality; sexual exploitation or abuse; concealment of an incident.	Summary termination; withdrawal of site access; referral to police; recovery of loss; regulatory notification.

- Suspension may be applied as a neutral precautionary measure pending investigation and does not imply a finding of guilt.
- Where conduct discloses a criminal offence, the matter shall be reported to the Royal Papua New Guinea Constabulary irrespective of the internal outcome.
- A register of disciplinary outcomes shall be maintained by Human Resources and reviewed by the General Manager for consistency.

27. Performance Monitoring, Audit and Assurance

- Key performance indicators shall be defined, measured and reported monthly, including post-manning compliance, patrol completion, response times, training currency, incident closure, report timeliness and audit findings closed.
- Supervisors shall conduct documented post inspections each shift; managers shall conduct unannounced inspections, including at night and at weekends.
- Internal audit of compliance with this Policy shall be conducted at least annually at each site, and the results reported to the General Manager and the Board, in coordination with the Audit, Quality Assurance and Compliance function.
- The Company shall support Client, Project Operator and lender audits and inspections, and shall provide access to records, sites and personnel as contractually required.
- A Security Review Board chaired by the General Manager shall meet at least quarterly to review risk, incidents, trends, assurance findings and corrective actions.
- Lessons identified shall be converted into changes to Post Orders, training or this Policy, and communicated to all personnel.

28. Crisis Management and Business Continuity

- An Incident Management Team shall be constituted and maintained at readiness, with defined roles, activation criteria, a designated crisis facility and tested communications.
- Contingency plans shall be maintained and exercised for armed intrusion, kidnap and extortion, civil unrest, prolonged site lockdown, mass casualty, evacuation and relocation, loss of communications, and natural disaster.
- Kidnap-and-extortion incidents shall be managed exclusively by the Incident Management Team in coordination with the Client and competent authorities; no other person shall negotiate, communicate with perpetrators or brief the media.
- Media and external communication during a crisis is the sole responsibility of the Managing Director or a nominated spokesperson.
- Contingency plans shall be exercised at least annually and revised following each exercise or activation.

29. Policy Review, Amendment and Acknowledgement

- This Policy shall be reviewed annually by the General Manager — Integrated Security Solutions, and additionally upon material change to the operating environment, the law, Client requirements, or following a significant incident.
- Amendments shall be approved by the Board, allocated a new version number, recorded in the Revision History, and communicated to all affected personnel before taking effect.
- Superseded versions shall be withdrawn from circulation and marked accordingly; one archive copy shall be retained by the Document Controller.

- Every person to whom this Policy applies shall sign the acknowledgement at Annex D. Failure to hold a signed acknowledgement does not excuse non-compliance.

Annex A — Rules for the Use of Force (Pocket Card)

The following card shall be issued to and carried by every PSD officer on duty.

#	Rule
1	Your first duty is to prevent harm. Observe, report, communicate, de-escalate and withdraw.
2	You are unarmed unless specifically authorised in writing for the task.
3	Force is the last resort. Before you act, ask: is it lawful, necessary, reasonable, proportionate, and can I account for it?
4	Use only the minimum force needed, for the shortest time needed. Stop as soon as the threat stops.
5	Never use force as punishment, revenge or to obtain information.
6	Never use force to protect property alone.
7	Lethal force only where there is an imminent threat to life and no other option exists.
8	Give a clear warning if the situation allows.
9	Treat every person humanely — including a person who has attacked you.
10	Provide or summon first aid immediately for anyone injured.
11	Report at once. Write it down before you go off duty. Tell the truth.
12	If in doubt — do not act. Withdraw, report, and ask.

Annex B — Mandatory Documentation Register

Record	Maintained By	Frequency	Retention
Daily Occurrence Book (DOB)	Post / Team Leader	Continuous	7 years
Incident Report	Officer involved / Supervisor	Per incident	7 years
Use of Force Report	Officer involved	Per event	7 years
Shift Handover Record	Shift Commander	Per shift	3 years
Patrol Record	Patrol commander	Per patrol	3 years
Visitor and Pass Register	Gatehouse	Continuous	3 years
Vehicle Logbook and Pre-Use Check	Driver	Per movement	3 years
Journey Management Plan	Op-Room	Per movement	3 years
Armoury Register (where armed)	Armourer	Per issue / shift	7 years
Equipment Issue Register	Store / Supervisor	Per issue	3 years
Training and Competency Record	Training Manager	Per event	Employment + 7 years
Vetting and Personnel File	Human Resources	Per person	Employment + 7 years
SITREP and Daily Security Report	Op-Room	Daily	3 years
Grievance and Community Contact Log	Community Liaison Officer	Continuous	7 years
Inspection and Audit Report	Supervisors / Management	Per inspection	7 years

Annex C — Areas of Responsibility

Location	Province	Primary PSD Task
Kerema Head Office	Gulf	Static guarding, access control, administrative security.
Kikori Operational Base	Gulf	Static guarding, mobile patrol, response, logistics interface.
Papua LNG facilities and plant sites	Gulf / Central	Access control, perimeter security, screening, escort support.
Kimu Gas Field	Gulf	Static guarding, patrol, community interface.
Barikewa Gas Field	Gulf	Static guarding, patrol, community interface.
Uramu Marine Base	Gulf	Marine access control, jetty and cargo security, boarding control.
Pipeline corridor and rights of way	Gulf / Central / Southern Highlands	Patrol, surveillance, interference reporting.
Airstrips, helipads and barge landings	Corridor-wide	Cordon, screening, movement control.
Accommodation camps and laydown yards	Corridor-wide	Static guarding, access control, asset protection.

This Annex shall be updated by the PSD Manager as the project footprint changes, including on mobilisation of new construction sites. Amendment of this Annex does not require reissue of the whole Policy.

Annex D — Personnel Acknowledgement

I acknowledge that I have received, read, or had explained to me in a language I understand, the Private Security Detail (PSD) Security Policy (SCSH-SEC-PSD-001, Version 2.1) of Southern Cross Strategic Holdings Pte Limited.

I understand my obligations under this Policy, including the Rules for the Use of Force, the Code of Conduct, my reporting duties and my confidentiality obligations. I understand that I am personally accountable for my conduct, that breaches may result in disciplinary action up to and including termination, and that criminal conduct will be referred to the appropriate authority.
