## Statement of Authority

This Policy is issued under the authority of the Chief Executive Officer of Southern Cross Strategic Holdings Pte Limited and is mandatory for all personnel to whom it applies. It takes precedence over any local practice, verbal instruction or historical custom that is inconsistent with it. Where any provision of this Policy conflicts with the laws of the Independent State of Papua New Guinea, the laws of Papua New Guinea prevail, and the conflict must be reported immediately to the Head of Compliance, Risk and Human Rights for resolution.

## 1. Purpose

The purpose of this Policy is to establish, govern and sustain a disciplined, highly mobile and professionally trained Quick Response Team (QRT) capability within Southern Cross Strategic Holdings Pte Limited (“the Company”) in support of security operations across the Papua LNG project corridor.

The QRT is the Company’s primary tactical reserve. It exists to respond rapidly to security incidents, reinforce static posts under pressure, manage emergencies, protect life and project assets, and stabilise situations that exceed the capability of routine guarding — at all times through lawful, proportionate and rights-respecting means.

This Policy further ensures that the QRT capability is aligned with:

- the laws of the Independent State of Papua New Guinea, in particular the regulatory regime governing the private security industry;
- the Voluntary Principles on Security and Human Rights (VPSHR) and IFC Performance Standard 4, which the Papua LNG Project and its lenders apply to security arrangements in the project area;
- client security requirements and the security management system of the Project operator and its contractors;
- the customary authority, clan structures and landowner sensitivities of the Gulf and Central Provinces; and
- the Company’s own values, governance framework and duty of care to its employees.

This Policy is to be read together with the Company’s Lands Security Operations Policy, Border Security Policy, Private Security Details (PSD) Policy, K9 Operations Policy, Transport Policy, Operations Room Policy, Logistics and Stores Policy, and the Zero-Tolerance Conduct, Ethics and Prohibited Behaviour Policy (SCSH-HR-GOV-001).

## 2. Scope and Application

This Policy applies to:

- all personnel selected, assigned, seconded or attached to a QRT, whether on a permanent, rotational or surge basis;
- all security supervisors, shift commanders, field coordinators and Operations Room personnel who may request, authorise, direct, monitor or stand down a QRT;
- the Project Security Manager (PSM), Security Operations Coordinator and all Company management with security accountabilities;
- subcontracted security providers performing QRT or QRT-equivalent functions on behalf of the Company; and
- visitors, contractors and client personnel to the extent that they are escorted, evacuated or otherwise assisted by a QRT.

Geographically, this Policy applies across the Company’s area of responsibility in the Papua LNG project corridor, including the Kerema headquarters, the upstream operational area in Gulf Province (including the Purari River logistics corridor and forward bases), the Kimu and Barikewa gas field locations, the Uramu Marine Base, the Kikori operational area, road and river movement corridors, aviation points of entry, and any Central Province or Port Moresby location to which QRT personnel are lawfully deployed.

**Non-application.** Nothing in this Policy authorises QRT personnel to perform functions reserved by law to the Royal Papua New Guinea Constabulary (RPNGC), the Papua New Guinea Defence Force (PNGDF) or any other State authority.

### 3. Definitions and Abbreviations

| Term            | Meaning                                                                                                                             |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------|
| Activation      | A formal instruction, issued by an authorised officer, directing a QRT to deploy from its readiness location to a task or incident. |
| AOR             | Area of Responsibility — the geographic area assigned to the Company under contract.                                                |
| Call-out        | The notification transmitted to a QRT initiating an activation.                                                                     |
| CLO             | Community Liaison Officer.                                                                                                          |
| De-escalation   | The deliberate use of communication, positioning, time and negotiation to reduce tension without resort to force.                   |
| Incident        | Any event that harms, or has the potential to harm, persons, assets, operations, the environment or the Company's reputation.       |
| KDP             | Kikori Development Project — the upstream area of operations within the Papua LNG corridor.                                         |
| Operations Room | The Company's 24/7 command, control and communications facility (also "Op-Room" or Security Control Room, SCR).                     |
| PSD             | Private Security Detail — close protection element.                                                                                 |
| PSM             | Project Security Manager.                                                                                                           |
| QRT             | Quick Response Team — the Company's dedicated tactical reserve established under this Policy.                                       |
| Readiness state | The declared notice-to-move condition of a QRT (see Section 9).                                                                     |
| ROE             | Rules of Engagement — the authorised limits on QRT conduct, including the use of force.                                             |
| RPNGC           | Royal Papua New Guinea Constabulary.                                                                                                |
| Standing down   | The formal instruction terminating an activation and returning a QRT to readiness.                                                  |
| VPSHR           | Voluntary Principles on Security and Human Rights.                                                                                  |
| 2IC             | Second-in-Command (Deputy Team Leader).                                                                                             |

### 4. Legal, Regulatory and Standards Framework

QRT operations are conducted within, and are subordinate to, the following legal and normative framework. QRT personnel are not empowered by this Policy beyond what these instruments permit.

#### 4.1 Papua New Guinea Law

- The Constitution of the Independent State of Papua New Guinea, in particular the Basic Rights provisions.
- The Security (Protection) Industry Act and its subordinate regulations, including licensing of security firms and individual guards.
- The Criminal Code Act, including the lawful limits on self-defence, defence of others, defence of property, and citizen's arrest.
- The Firearms Act and associated controls. QRT personnel do not carry firearms except where a specific, current and lawful authorisation exists (see Section 12.3).
- The Employment Act, Industrial Safety, Health and Welfare legislation, and applicable occupational health and safety instruments.

- The Oil and Gas Act and the Papua LNG Gas Agreement, including landowner benefit-sharing arrangements determined through the Development Forum process.
- Land legislation governing customary land, and the requirement to obtain lawful authority before entering customary land.

## 4.2 International and Industry Standards

- **Voluntary Principles on Security and Human Rights (VPSHR)** — risk assessment, interaction with public security, and interaction with private security.
- **IFC Performance Standard 4 (Community Health, Safety and Security)** — in particular the requirements on security personnel, proportionality, screening, training and grievance handling.
- **UN Basic Principles on the Use of Force and Firearms by Law Enforcement Officials and the UN Code of Conduct for Law Enforcement Officials** — applied by analogy to private security.
- **International Code of Conduct for Private Security Service Providers (ICoC)** — as a benchmark for conduct, vetting, reporting and accountability.
- **ISO 31000 (Risk Management) and ISO 45001 (Occupational Health and Safety)** — as the basis for the Company's risk and safety methodology.

## 4.3 Client and Project Requirements

QRT operations shall additionally comply with the security management requirements, permit-to-work systems, journey management rules, life-saving rules, drug and alcohol standards and incident reporting timelines imposed by the Project operator and by the principal contractor to whom the Company's services are provided. Where a client requirement is more stringent than this Policy, the client requirement applies.

# 5. Operating Context — Papua LNG

This Policy is issued at a specific and demanding point in the Project lifecycle. QRT posture, staffing and readiness assumptions are calibrated to the following conditions, which shall be reassessed at each policy review.

## 5.1 Project Status

- The Project is an integrated upstream, midstream and downstream development, with gas produced in Gulf Province and liquefied for export at the downstream site near Port Moresby in Central Province.
- Engineering, procurement and construction arrangements were concluded in the first half of 2026, and the joint venture partners have signalled that a Final Investment Decision is targeted for the fourth quarter of 2026.
- A State-convened Development Forum involving landowners, the Gulf Provincial Government and the Central Provincial Government has been progressed during mid-2026 as a precondition to development approvals.
- Early works, survey, camp expansion, river logistics and site preparation activity continue across the upstream corridor, with the Purari River logistics chain acting as the principal supply artery into the field.

## 5.2 Security Implications of the Current Phase

The pre-FID to early-construction transition is historically the highest-risk phase of a project of this type. The following implications shape QRT tasking:

| Driver                                                          | Security implication                                                                                                              | QRT posture                                                                                              |
|-----------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|
| Benefit-sharing and landowner identification processes          | Elevated risk of disputes between and within clans, contested representation, and protest directed at project assets as leverage. | Prioritise de-escalation, CLO support and protective presence; never take sides in a dispute.            |
| Expectation of employment and contracting opportunity           | Gate crowding, unsolicited job-seeker presence, and grievance where expectations are unmet.                                       | Crowd management support to static posts; early warning reporting; no promises made by QRT personnel.    |
| Mobilisation surge and increased plant, fuel and cargo movement | Higher exposure to theft, opportunistic crime, roadblocks and illegal tolling on movement corridors.                              | Convoy escort, route reconnaissance, and rapid recovery response.                                        |
| Riverine and remote logistics dependence                        | Single-point-of-failure corridors; delayed response and casualty evacuation times.                                                | Forward-positioned elements and riverine response capability; realistic response-time standards by zone. |
| Wet-season and terrain conditions                               | Vehicle immobilisation, flooding, landslip, isolation of posts.                                                                   | All-weather readiness, recovery equipment, and pre-planned alternate routes.                             |
| Community expectations of the security provider                 | Perception risk; any use of force is amplified and may become a project-level issue.                                              | Strict VPSHR compliance, body-worn evidence capture, and immediate reporting of any use of force.        |

QRT Team Leaders shall be briefed on the current Project status at each rotation, and the PSM shall issue a written threat and posture update at least monthly, or immediately upon a material change in Project circumstances.

## 6. Objectives of the QRT

The QRT is established to deliver the following outcomes:

- Provide a rapid, controlled deployment capability across all assigned operational zones within published response standards.
- Reinforce static guard posts confronted by hostility, crowd pressure, intrusion or complex risk.
- Contain and stabilise escalating incidents before they extend to project personnel, assets or operations.
- Support the safe extraction and evacuation of employees, contractors and visitors.
- Respond to landowner disputes, roadblocks, protest actions and suspected sabotage with professionalism, restraint and cultural sensitivity.
- Conduct deliberate high-visibility patrols as a deterrent and as a source of ground-truth intelligence.
- Maintain readiness to support medical emergencies, casualty evacuation, vehicle recovery, natural hazard events and search and rescue.
- Provide a trained, disciplined interface with the RPNGC and other State authorities when public security involvement is required.
- Generate accurate, timely reporting that improves the Company's threat picture and prevents recurrence.

## 7. QRT Organisation and Structure

## 7.1 Position within the Organisation

The QRT is a dedicated unit under the authority of the Project Security Manager. It is not a general labour pool and shall not be assigned to routine static guarding, administrative duties or non-security tasks except by written direction of the PSM, and never in a manner that reduces readiness below the declared state.

## 7.2 Standard Team Composition

| Position                         | Establishment                      | Principal accountability                                                                                          |
|----------------------------------|------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| QRT Team Leader (Sergeant level) | 1                                  | Tactical command of the team; on-scene decision-making within ROE; reporting.                                     |
| Deputy Team Leader / 2IC         | 1                                  | Assumes command in the Team Leader's absence; accountability for equipment, communications and casualty handling. |
| QRT Officer                      | 4 – 6                              | Task execution; observation and reporting; first aid; evidence capture.                                           |
| Driver / Operator                | 1 (where not double-hatted)        | Vehicle serviceability, defensive and recovery driving, journey management compliance.                            |
| Medical Responder (embedded)     | 1 (minimum one qualified per team) | Advanced first aid and trauma response; medevac liaison.                                                          |

A QRT shall not deploy below a minimum strength of four personnel, including a Team Leader or 2IC, except for a life-threatening emergency authorised in real time by the PSM and recorded in the Operations Room log.

## 7.3 Laydown Across the Corridor

QRT elements shall be positioned to meet response standards rather than for administrative convenience. The indicative laydown is:

| Location                                | Element                      | Primary tasks                                                                      |
|-----------------------------------------|------------------------------|------------------------------------------------------------------------------------|
| Kerema (Headquarters)                   | 1 x QRT + reserve            | Corridor-wide reserve, VIP escort, provincial liaison, surge to forward locations. |
| Upstream forward base (Purari corridor) | 1 x QRT                      | Early works protection, river logistics escort, community interface support.       |
| Kimu Gas Field                          | 1 x QRT (or on-call element) | Site response, perimeter incident, reinforcement of static posts.                  |
| Barikewa Gas Field                      | 1 x QRT (or on-call element) | Site response, access control support, remote-post reinforcement.                  |
| Uramu Marine Base                       | 1 x QRT (marine-capable)     | Marine and riverine response, wharf and cargo security, waterborne escort.         |
| Kikori operational area                 | 1 x QRT                      | Road corridor response, roadblock management support, community-sensitive tasking. |

The PSM may vary the laydown in response to the threat picture. Any variation lasting more than seven days shall be recorded in a written posture direction.

## 7.4 Selection Criteria for QRT Personnel

Selection to the QRT is a privilege and is conditional on continued performance. Candidates must:

- hold a valid and current PNG security guard licence and Company identification;
- have completed a minimum of twelve months' satisfactory service in a security role, with no substantiated disciplinary finding in the preceding twelve months;
- pass the Company's physical fitness and medical assessment, and be certified fit for arduous and remote-area duty;
- pass a documented pre-assignment screening covering criminal record, prior use-of-force incidents, and any credible allegation of human rights abuse (VPSHR and IFC PS4 requirement);
- demonstrate calm judgement, emotional control and sound decision-making under tension, assessed through scenario-based evaluation;
- hold a current first aid certification and a valid PNG driving licence appropriate to the vehicle class where assigned as a driver;
- be able to communicate clearly in English and Tok Pisin, and preferably in a relevant local language; and
- complete the full QRT induction and advanced training syllabus at Section 16 prior to first independent deployment.

## 7.5 Disqualifying and Suspending Factors

A person shall not be selected for, and shall be immediately withdrawn from, QRT duty where any of the following applies:

- involvement, or family or clan involvement of a nature creating a material conflict of interest, in an active tribal, clan or land dispute within the AOR;
- any credible allegation of unlawful violence, sexual exploitation or abuse, or human rights abuse, pending investigation;
- failure of a drug or alcohol test, or refusal to submit to testing;
- loss, suspension or expiry of the individual security licence;
- failure to maintain training currency under Section 16; or
- any conduct constituting a serious breach of SCSH-HR-GOV-001.

Withdrawal from QRT duty pending investigation is a precautionary administrative measure and is not, of itself, a disciplinary sanction or a finding of guilt.

## 8. Command, Control and Communications

### 8.1 Chain of Command

| Level                  | Appointment                     | Authority                                                                                                       |
|------------------------|---------------------------------|-----------------------------------------------------------------------------------------------------------------|
| Overall command        | Project Security Manager (PSM)  | Policy application, posture, escalation to client and State authorities, authorisation of exceptional measures. |
| Operational control    | Security Operations Coordinator | Allocation of tasks between elements, cross-site coordination, resourcing.                                      |
| Tactical command       | QRT Team Leader                 | Conduct of the task on the ground within ROE; the sole authority for tactical decisions at the scene.           |
| Communications control | Operations Room Supervisor      | Logging, tracking, radio discipline, escalation notification, activation records.                               |

### 8.2 Principles of Command

- There is one tactical commander at any incident. Where a superior arrives on scene, command transfer must be explicit, verbal and logged with the Operations Room.
- Every QRT movement — departure, arrival, phase change, stand-down and return — shall be logged with the Operations Room. An unlogged movement is a reportable breach.
- No QRT element shall accept tasking from a client representative, contractor or third party directly. All tasking flows through the Operations Room to the Team Leader.
- Where communications are lost, the Team Leader shall apply the last lawful instruction, adopt the most conservative course of action consistent with the safety of life, and re-establish communications as the first priority.

### 8.3 Interface with Public Security

The QRT is a private security capability. Where an incident involves firearms, serious injury, an alleged criminal offence, or exceeds the Company's lawful capacity, the RPNGC shall be notified immediately and shall assume primacy.

- The PSM or the PSM's nominated delegate is the sole authorised point of liaison with the RPNGC and PNGDF for incident matters.
- QRT personnel shall not direct, instruct or task public security personnel, and shall not participate in any operation conducted by public security.
- Where public security personnel are transported in Company vehicles, this shall be authorised in advance, recorded, and conducted in accordance with the Company's VPSHR commitments.
- Any use of force by public security personnel observed by QRT members shall be recorded factually and reported to the PSM and the Head of Compliance, Risk and Human Rights within two hours.
- QRT personnel shall not surrender custody of any person, or transfer any detained person, other than to the RPNGC, and shall record the handover.

## 9. Readiness States and Response Standards

### 9.1 Readiness States

The PSM shall declare the readiness state for each QRT element. The declared state shall be displayed in the Operations Room and confirmed at each shift handover.

| State             | Description                                                                                                                                          | Notice to move        |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| READY (Alpha)     | Team assembled, briefed, equipped, vehicle loaded and running-check complete. Applied during heightened threat, protest activity or major movements. | Immediate — 3 minutes |
| STANDBY (Bravo)   | Team on location, equipment staged, personnel available and contactable. Normal daytime operating state.                                             | 5 minutes             |
| ON-CALL (Charlie) | Team resting within the camp footprint, recall by radio or siren. Applied during low-threat night hours where a Bravo element is held elsewhere.     | 15 minutes            |
| COMMITTED         | Team deployed on task. A reserve or adjacent element assumes the readiness obligation.                                                               | Not applicable        |
| NON-EFFECTIVE     | Team unable to deploy (fatigue, casualty, vehicle failure, strength below minimum). Must be reported to the PSM immediately with a recovery plan.    | Not applicable        |

A NON-EFFECTIVE declaration is a mandatory notification. It shall never be concealed, and no manager shall pressure a Team Leader to declare a team effective when it is not.

## 9.2 Response Time Standards

Response times are measured from the moment the Operations Room transmits the call-out to the moment the team departs (“time to move”), and separately to the moment of arrival on scene (“time on scene”). Arrival standards are indicative and are always subordinate to safe driving and route conditions.

| Zone                                                             | Time to move | Target time on scene                              |
|------------------------------------------------------------------|--------------|---------------------------------------------------|
| Within camp or fenced facility footprint                         | 3 minutes    | 10 minutes                                        |
| Within 10 km of the responding base by sealed or maintained road | 5 minutes    | 30 minutes                                        |
| Remote road corridor beyond 10 km                                | 5 minutes    | By risk assessment; Operations Room to advise ETA |
| Riverine or marine tasking                                       | 15 minutes   | By risk assessment; craft and tide dependent      |
| Night, adverse weather or flooded route                          | As above     | Extended; movement subject to PSM approval        |

**Overriding rule.** No response time standard justifies unsafe speed, unsafe river transit, night movement on an unassessed route, or deployment into a situation the team is not equipped or authorised to manage. A Team Leader who declines a movement on safety grounds shall be supported, and the decision recorded.

## 10. Incident Classification and Escalation

All incidents shall be classified on first report and reclassified as the situation develops. Classification drives notification, resourcing and reporting obligations.

| Level              | Description                                                                                                     | Typical examples                                                                                                        | Notification                                                                                            |
|--------------------|-----------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|
| Level 1 — Minor    | Contained; no injury; managed by static guards with QRT advisory support.                                       | Petty theft, minor trespass, verbal dispute at a gate.                                                                  | Operations Room log; shift report.                                                                      |
| Level 2 — Moderate | Requires QRT deployment; potential for escalation; minor injury or asset loss.                                  | Aggressive crowd at a gate, minor road obstruction, vehicle accident without serious injury, unauthorised entry.        | Operations Room; Security Operations Coordinator; PSM within 1 hour.                                    |
| Level 3 — Serious  | Significant threat to life, operations or assets; multi-element response; external involvement likely.          | Roadblock with hostility, sabotage of infrastructure, serious injury, protest occupation of a site, missing person.     | PSM immediately; GM ISS; client security focal point; RPNGC as required; written report within 2 hours. |
| Level 4 — Critical | Life-threatening, fatality, armed incident, mass disturbance, or event with corporate or national significance. | Armed threat, fatality, kidnap or hostage situation, aviation or marine emergency, natural disaster affecting the site. | PSM and GM ISS immediately; CEO; client crisis management; RPNGC; Crisis Management Team activated.     |

Where there is doubt as to classification, the higher level shall be applied. Under-classification of an incident is itself a reportable failing.

## 11. Activation of the QRT

### 11.1 Routine Activation

- Escort of client representatives, project managers, technical staff and approved visitors.
- Planned high-risk patrols in areas subject to recent threat reporting.
- Security presence at planned community engagements, awareness sessions or Development Forum-related activity, at the request of the CLO function and with PSM approval.
- Escort of fuel, plant, high-value cargo and sensitive equipment.
- Pre-planned reinforcement of posts during shift changes, payroll movements or major deliveries.

### 11.2 Emergency Activation

- Landowner tension, protest, roadblock, illegal tolling or blockade affecting project operations.
- Threat to, or interference with, project infrastructure, pipeline corridor, camps, wharves or plant.
- Hostile or threatening behaviour, including by intoxicated persons or opportunistic offenders.
- Vehicle, plant, marine or aviation accident involving project personnel.
- Medical emergency requiring escort, extraction or casualty evacuation support.
- Fire, flood, landslide, severe weather or other natural hazard affecting personnel or assets.
- Missing person, overdue vehicle or overdue river movement.
- Armed threat or suspected criminal offence — the RPNGC must be informed immediately and simultaneously.

### 11.3 Authorised Activating Officers

| Officer                             | Routine activation   | Emergency activation                                                                 | Cross-site / multi-team activation |
|-------------------------------------|----------------------|--------------------------------------------------------------------------------------|------------------------------------|
| Project Security Manager            | Yes                  | Yes                                                                                  | Yes                                |
| Security Operations Coordinator     | Yes                  | Yes                                                                                  | Yes, with PSM notification         |
| Senior Supervisor / Shift Commander | Yes, within own site | Yes, within own site                                                                 | No                                 |
| Operations Room Supervisor          | No                   | Yes, for immediate threat to life, with immediate PSM notification                   | No                                 |
| QRT Team Leader (self-activation)   | No                   | Yes, only where a threat to life is directly witnessed; must report within 5 minutes | No                                 |

### 11.4 Activation Procedure

1. The Operations Room receives and records the report, capturing location, nature, persons involved, injuries, and reporting source.
2. The Operations Room applies an initial incident classification under Section 10 and alerts the appropriate QRT element.

3. The activating officer issues the call-out and confirms the authority for the activation.
4. The Team Leader delivers a rapid orders brief: situation, mission, route, actions on arrival, communications, medical and evacuation plan, and applicable ROE reminder.
5. The team confirms strength, equipment and vehicle serviceability and departs, reporting “mobile” with the time recorded.
6. The Operations Room maintains contact at intervals of not more than 15 minutes and tracks the movement.
7. On arrival, the Team Leader reports a situation assessment and confirms or revises the incident classification.
8. The team acts within ROE, prioritising the preservation of life, then de-escalation, then protection of assets.
9. The activating officer or the PSM issues the stand-down when the incident is stabilised or handed over.
10. The team returns, conducts an immediate hot debrief, restores equipment and readiness, and submits reports under Section 19.

### 11.5 Stand-Down and Recovery

A stand-down shall be explicit and logged. Following any Level 3 or Level 4 activation, the Team Leader shall conduct a structured debrief within 24 hours, and the PSM shall consider stand-down of the team from operational duty pending welfare assessment, particularly where the team has been exposed to violence, serious injury or fatality.

## 12. Rules of Engagement and Use of Force

### 12.1 Governing Principles

- **Legality** — any action taken must be lawful under the laws of Papua New Guinea.
- **Necessity** — force may only be used where no lesser means is available and effective.
- **Proportionality** — any force used must be proportionate to the threat faced and must cease the moment the threat ceases.
- **Precaution** — planning, positioning, timing and communication shall be used to make force unnecessary.
- **Accountability** — every use of force is reportable, reviewable and subject to investigation.
- **Preservation of life** — the safety of human life takes absolute precedence over the protection of property or the continuity of operations. No asset is worth a life.
- **Non-discrimination** — QRT personnel shall act without distinction as to clan, ethnicity, gender, religion, political affiliation or nationality.

### 12.2 Use of Force Continuum

QRT personnel shall operate at the lowest effective level of the continuum and shall de-escalate as soon as circumstances permit.

| Level        | Response                                                                               | Application                                                        |
|--------------|----------------------------------------------------------------------------------------|--------------------------------------------------------------------|
| 1 — Presence | Visible, disciplined, professional presence in uniform.                                | Default posture at all times.                                      |
| 2 — Verbal   | Calm instruction, negotiation, warning, and de-escalation in the appropriate language. | The primary tool of the QRT. Most incidents must be resolved here. |

| Level                          | Response                                                                                       | Application                                                                                            |
|--------------------------------|------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|
| 3 — Withdrawal / containment   | Repositioning, cordon, controlled withdrawal, removal of the trigger for the confrontation.    | Preferred over physical engagement wherever life is not at immediate risk.                             |
| 4 — Defensive physical control | Blocking, disengagement, escorting a person away, restraint of a person committing an offence. | Only where necessary and proportionate; only by trained personnel.                                     |
| 5 — Defensive equipment        | Use of authorised defensive equipment where issued and authorised.                             | Only where there is an immediate threat of injury and no lesser option; immediate reporting mandatory. |
| 6 — Force to protect life      | Force reasonably necessary to prevent death or grievous bodily harm.                           | Absolute last resort. Immediate notification to the PSM and the RPNGC.                                 |

### 12.3 Firearms

The QRT operates as an unarmed capability. QRT personnel shall not carry, handle, store or transport firearms or ammunition unless a specific, current, written and lawful authorisation exists under PNG law and has been approved by the CEO. Where any armed protection requirement is identified, it shall be met through the RPNGC or another lawfully mandated State body, arranged by the PSM. Improvised weapons are prohibited.

### 12.4 Detention, Search and Handover

- QRT personnel have no power of arrest beyond that available to any citizen under the Criminal Code Act.
- Any person detained shall be detained for the minimum period necessary, treated humanely, kept in view of a second officer, protected from harm, and handed to the RPNGC without delay.
- Detention of a person shall be logged immediately with the Operations Room and reported to the PSM.
- Searches shall be conducted only where lawfully permitted, with consent where required, and a female may only be searched by a female officer.
- Persons under the age of 18 shall not be detained other than to prevent immediate harm, and the PSM and a CLO shall be notified immediately.
- Handcuffs may be used only by trained and authorised personnel, only where necessary to prevent injury or escape, and their use must be reported.

### 12.5 Prohibited Actions

- Striking, assaulting, threatening or humiliating any landowner, community member, employee or detained person.
- Any form of retaliation, punishment or collective sanction against a community, clan or family.
- Damaging, removing or interfering with cultural, tribal or sacred property, or entering a restricted cultural site.
- Engaging in local, provincial or national politics, or expressing partisan views while on duty or in uniform.
- Taking sides in a clan, land or benefit-sharing dispute, or offering any opinion on landowner identification or benefit entitlement.
- Pursuing any person onto customary or tribal land without RPNGC authority.
- Consuming, possessing or being under the influence of alcohol or illicit substances at any time while on duty, on call, or in Company accommodation in breach of the applicable standard.

- Soliciting or accepting any payment, gift, favour or benefit from any community member, contractor or third party.
- Any form of sexual exploitation, abuse or harassment, or any relationship with a community member that exploits a position of power.
- Photographing or recording persons for any purpose other than lawful evidence capture, and sharing operational imagery on social media.
- Discussing operational matters, incidents or client information with any unauthorised person.

## 12.6 Mandatory Post-Incident Procedure Following Any Use of Force

11. Render or arrange first aid to any injured person, without distinction as to their role in the incident.
12. Notify the Operations Room and the PSM immediately; notify the RPNGC where an offence or injury is involved.
13. Preserve the scene and secure all evidence, including body-worn and vehicle camera footage, which shall not be deleted or edited.
14. Record the names and contact details of witnesses.
15. Submit individual written statements from every officer present before going off duty.
16. Remove the officers involved from operational duty pending an initial review, as a precautionary and non-punitive measure.
17. Refer the matter to the Head of Compliance, Risk and Human Rights for review against the VPSHR and IFC PS4 requirements, and notify the client security focal point.

## 13. Operational Duties

### 13.1 Rapid Incident Response

- Deploy within the notice-to-move applicable to the declared readiness state.
- Conduct a dynamic risk assessment on approach and on arrival; do not enter a scene that cannot be safely managed.
- Secure personnel first, then contain the incident, then protect assets.
- Establish a safe cordon and a single point of contact for any community representatives present.
- Confirm the incident classification and report the threat level to the PSM.

### 13.2 High-Risk and Deterrent Patrols

- Conduct day and night patrols in accordance with the current threat matrix and patrol programme, avoiding predictable timings and routes.
- Conduct vehicle, foot and perimeter sweeps, including of vulnerable infrastructure, laydown areas and fuel storage.
- Record and report suspicious activity, ground disturbance, unfamiliar structures, new access tracks and changes in community mood.
- Verify the welfare, alertness and communications state of static posts visited.

### 13.3 Convoy, Escort and Movement Support

- Comply with the Company Transport Policy and the applicable journey management plan; no movement without an approved journey plan and Operations Room clearance.
- Conduct route reconnaissance and hazard briefing before high-risk movements.

- Maintain convoy discipline, spacing, communications and agreed actions-on drills.
- Never abandon an escorted vehicle or its occupants; recovery and personnel safety take precedence over cargo.

### 13.4 Community and Landowner Interface Support

- Provide a low-profile protective presence during CLO engagements, awareness sessions and negotiations.
- Escort CLOs and community affairs personnel to and from meeting locations.
- Support, but never lead, peaceful negotiation; the QRT is a security enabler, not a negotiating party.
- Withdraw or reduce visible presence where the CLO advises that the security posture is aggravating tension, subject to the safety of personnel.

### 13.5 Roadblock, Blockade and Protest Response

18. Report immediately and accurately: location, numbers, mood, weapons observed, stated grievance, and identity of any spokesperson.
19. Halt project movement short of the obstruction and establish a safe holding area.
20. Do not attempt to force, dismantle or drive through a blockade.
21. Request CLO and PSM attendance; the resolution of grievance is a community affairs function, not a security function.
22. Where the situation involves an offence, violence or weapons, notify the RPNGC and await their primacy.
23. Maintain a factual, time-stamped record and, where safe and lawful, evidential imagery.

### 13.6 Marine and Riverine Support

- Support wharf, barge, jetty and cargo security at the Uramu Marine Base and river logistics points.
- Provide waterborne response only in craft that are certified, fuelled, equipped and crewed by a qualified coxswain.
- Ensure that all personnel wear serviceable personal flotation devices at all times on the water, without exception.
- Do not conduct river movement at night, in flood conditions, or outside the approved marine operating envelope without PSM authorisation.

### 13.7 Support to Operations

- Reinforce weak, isolated or pressured static posts.
- Escort fuel, plant, equipment and sensitive cargo.
- Monitor vehicle movement on high-risk and degraded terrain.
- Provide controlled extraction of personnel from an unsafe location.

### 13.8 Emergency, Medical and Crisis Support

- Provide first aid and trauma care to the level of the responder's certification, and arrange casualty handover.
- Support casualty evacuation by road, river or air, including securing and marking a landing site where directed.
- Control traffic and secure the scene at vehicle breakdowns and accidents.

- Support evacuation and accountability of personnel during flood, fire, landslip or severe weather.
- Assist search and rescue for missing or overdue personnel under the direction of the PSM.
- Support the Company's Crisis Management Team on activation, providing ground liaison and reporting.

## 14. Human Rights, Community and Landowner Sensitivity

### 14.1 Voluntary Principles Commitment

The Company commits to conducting all QRT activity in a manner consistent with the Voluntary Principles on Security and Human Rights and IFC Performance Standard 4. In practical terms this requires that:

- security risk assessments explicitly consider human rights risk to communities, not only risk to the Project;
- all QRT personnel are screened before assignment and re-screened annually for any credible allegation of abuse;
- all QRT personnel receive documented human rights and use-of-force training before first deployment and annually thereafter;
- any allegation of abuse by Company personnel is investigated, recorded and, where substantiated, results in disciplinary action and, where a criminal offence is alleged, referral to the RPNGC; and
- interactions with public security are recorded, and any observed unlawful conduct is reported through the Company and, where appropriate, to the client.

### 14.2 Cultural Protocols

Kikori and the wider Gulf and Central Province corridor are culturally complex. QRT personnel shall:

- understand the clan structures, customary boundaries and leadership arrangements relevant to their area of operation, as briefed by the CLO function;
- never enter a restricted, sacred or disputed cultural site without express permission obtained through the CLO;
- address community members and leaders respectfully at all times, and use the appropriate language where possible;
- avoid confrontation during disputes and support dialogue in preference to force;
- show particular care during periods of mourning, compensation ceremonies, feasts and other customary events; and
- factor landowner sensitivity into the route, timing, visibility and posture of every movement.

### 14.3 Community Grievance Mechanism

Any community member may raise a grievance concerning the conduct of QRT personnel. QRT members shall not attempt to resolve, discourage, settle or pay off a grievance. The correct action is to record the complainant's name and contact details, explain the grievance process, and refer the matter to the CLO function and the PSM the same day. Grievances shall be registered, acknowledged, investigated and closed out in accordance with the Project grievance procedure, and shall be reported in the monthly security report.

### 14.4 Vulnerable Persons

- Particular care shall be taken in any interaction involving women, children, elderly persons or persons with a disability.

- Any suspected case of gender-based violence, sexual exploitation or abuse, or child protection concern shall be reported immediately to the PSM and the designated safeguarding focal point, and shall not be investigated by QRT personnel.
- QRT personnel shall not transport unaccompanied minors except to preserve life, and shall report any such instance immediately.

## 15. Communications Protocol

### 15.1 Standing Requirements

- All QRT elements shall maintain continuous radio contact with the Operations Room while deployed.
- Radio checks shall be conducted before departure and at intervals of not more than 15 minutes while on task.
- Incident information shall be relayed immediately and factually; assessment and opinion shall be clearly distinguished from observation.
- Radio language shall be clear, professional and disciplined. Slang, emotional commentary, personal names of community members and speculation are prohibited on open channels.
- Sensitive information — casualty identity, client information, law enforcement matters — shall be passed only by secure means or restricted channel.
- Personal mobile telephones shall not be used as the primary operational communications means, and shall not be used to photograph or share operational material.

### 15.2 PACE Communications Plan

| Tier        | Means                                                               | Application                                                |
|-------------|---------------------------------------------------------------------|------------------------------------------------------------|
| Primary     | VHF/UHF radio on the assigned operational channel                   | All routine and incident traffic.                          |
| Alternate   | Secondary radio channel or repeater                                 | Where the primary channel is degraded or congested.        |
| Contingency | Company mobile telephone / cellular where coverage exists           | Where radio is unavailable; not for sensitive traffic.     |
| Emergency   | Satellite telephone or satellite messenger with the Operations Room | Remote areas, marine tasking, and loss of all other means. |

Every deployed QRT shall carry a working means from at least two tiers. A team unable to do so shall not deploy beyond the camp footprint without PSM authorisation.

### 15.3 Loss of Communications

Where the Operations Room loses contact with a deployed team, a lost-communications procedure shall be initiated at the 30-minute point: attempt on all PACE tiers, alert the adjacent element, notify the PSM, and prepare a search response. The team, for its part, shall move to the nearest known communications point, avoid unnecessary risk, and where possible return to base.

## 16. Training, Competency and Certification

No person shall perform QRT duty without holding current certification in the mandatory modules below. Training records shall be maintained by the PSM and shall be auditable by the client at any time.

| Module                                                                  | Frequency                                               | Certification                                     |
|-------------------------------------------------------------------------|---------------------------------------------------------|---------------------------------------------------|
| Advanced security operations and tactical awareness                     | Initial, then annually                                  | Internal assessment and practical evaluation      |
| Human rights, VPSHR and use of force (including ROE examination)        | Initial, then annually — mandatory                      | Written examination, minimum pass 80%             |
| Conflict management, negotiation and verbal de-escalation               | Initial, then annually                                  | Scenario-based assessment                         |
| Landowner relations and cultural awareness (Gulf and Central Provinces) | Initial, then annually                                  | CLO-delivered, attendance and assessment recorded |
| First aid and trauma management                                         | Initial, then every 2 years (refresher every 12 months) | Recognised external certification                 |
| Defensive driving, convoy procedure and vehicle recovery                | Initial, then every 2 years                             | Practical driving assessment                      |
| Marine safety and personal survival (marine-tasked personnel only)      | Initial, then every 2 years                             | Recognised external certification                 |
| Emergency response, evacuation and crisis procedures                    | Initial, then annually                                  | Exercise participation recorded                   |
| Incident reporting, evidence handling and documentation                 | Initial, then annually                                  | Written assessment                                |
| Radio and communications procedure                                      | Initial, then annually                                  | Practical assessment                              |
| Fitness and medical fitness assessment                                  | Every 6 months                                          | Company medical standard                          |
| Consolidated QRT refresher and skills validation                        | Every 3 months                                          | Team-level exercise, recorded by the PSM          |

Lapse of a mandatory certification results in immediate removal from QRT tasking until currency is restored. The PSM shall report the training compliance percentage in the monthly security report.

In addition, each QRT shall conduct a minimum of one no-notice call-out exercise per month and shall participate in at least one joint exercise with client emergency response and medical services per quarter.

## 17. Equipment, Personal Protective Equipment and Vehicles

### 17.1 Standard Team Equipment

- High-visibility tactical uniform, Company identification and current security licence carried at all times on duty.
- Boots suitable for wet, muddy and rugged terrain; wet-weather clothing.
- Handheld radio per officer with spare batteries; team satellite communications device.
- Torches and headlamps with spare batteries.
- Team trauma kit and individual first aid kits.
- Body-worn camera per officer where issued, and a team camera for evidence capture.
- Restraints (handcuffs) for authorised and trained personnel only, for lawful detention only.
- Defensive equipment only where specifically authorised in writing, with the holder trained and certified.
- Incident notebooks, activation log forms, marker tape, and scene preservation materials.

- Vehicle recovery kit: tow strap, shackles, jump starter, shovel, traction boards, basic tools.
- Drinking water and rations sufficient for the planned duration plus a contingency margin.

## 17.2 Vehicles and Craft

- Four-wheel-drive vehicles appropriate to the terrain, fitted with communications, first aid kit, fire extinguisher, recovery points and tracking device.
- Vehicles shall be refuelled to full before the commencement of every shift and after every task.
- A daily pre-use inspection checklist shall be completed and signed; defects shall be reported and a defective vehicle shall not be deployed.
- No unauthorised passengers. Every occupant shall be recorded on the movement log.
- Seat belts shall be worn by all occupants at all times; speed limits and journey management rules are non-negotiable.
- Marine craft shall be certified and equipped with flotation devices, communications, navigation lights, anchor, bailer and emergency provisions.

## 17.3 Accountability

All equipment shall be signed for, inspected at each shift handover, and accounted for on return. Loss, damage or malfunction of any item — particularly communications, cameras or restraints — shall be reported immediately. Body-worn camera footage is Company evidence and shall be downloaded, retained and protected in accordance with Section 19; deletion or alteration of footage is a serious disciplinary offence.

## 18. Health, Safety, Welfare and Fatigue Management

- QRT duty is physically and psychologically demanding. Managers hold a duty of care that is not displaced by operational pressure.
- Maximum shift duration, minimum rest periods and rotation cycles shall comply with the Company's fatigue management standard and applicable PNG employment law.
- A Team Leader shall declare a team NON-EFFECTIVE where fatigue makes safe deployment impossible, and shall not be penalised for doing so.
- Malaria prophylaxis, hydration, hygiene and heat management shall be actively managed, and medical support shall be accessible from every location.
- Following exposure to violence, serious injury, fatality or a traumatic scene, the Company shall provide access to psychological support and shall consider stand-down from operational duty.
- Drug and alcohol testing shall be conducted on a random and for-cause basis in accordance with Company and client standards.
- Accommodation, food, water, sanitation and rest facilities for QRT personnel at forward locations shall meet the Company minimum welfare standard, and deficiencies shall be reported to the PSM.

## 19. Reporting, Records and Information Management

### 19.1 Mandatory Reports

After every activation, the QRT Team Leader shall submit:

- a QRT Activation Log (Annex A);
- a Post-Incident Report (Annex B), including a chronology, actions taken and outcomes;
- individual written statements from every officer involved in any use of force, detention or injury;

- a Risk Assessment Update where the incident alters the threat picture; and
- recommendations to prevent recurrence.

Reports shall be submitted within two hours of the closure of the activation and entered into the Security Incident Database. Where the Team Leader is unable to meet this timeline due to ongoing operations, an interim verbal report shall be given to the Operations Room and the reason recorded.

## 19.2 Standards for Reporting

- Reports shall be factual, chronological, and shall clearly distinguish observation from assessment.
- Names of community members shall be recorded only where necessary and shall be handled as personal information.
- No report shall be altered after submission; corrections shall be made by a numbered addendum.
- Falsification, omission or backdating of a report is a serious disciplinary offence and may constitute a criminal offence.

## 19.3 Records, Retention and Confidentiality

- Activation logs, incident reports, statements, camera footage and training records shall be retained for a minimum of seven years, or longer where litigation or investigation is foreseeable.
- All operational information is Company Confidential and, where it concerns the client, is subject to the confidentiality provisions of the services contract.
- Records shall be made available to the client, to auditors and to lawful authorities on proper request and with the approval of the PSM or GM ISS.

## 20. Performance Measurement

The PSM shall report the following indicators monthly to the GM ISS and, where contractually required, to the client.

| Indicator                                                    | Target |
|--------------------------------------------------------------|--------|
| Compliance with time-to-move standards (all activations)     | ≥ 95%  |
| Activations resolved without any use of force                | ≥ 98%  |
| Post-incident reports submitted within 2 hours               | 100%   |
| Mandatory training currency across QRT establishment         | 100%   |
| No-notice call-out exercises conducted per team per month    | ≥ 1    |
| Community grievances relating to QRT conduct — substantiated | 0      |
| Vehicle incidents attributable to QRT driving                | 0      |
| Readiness state maintained as declared (audited)             | ≥ 98%  |
| Human rights or VPSHR non-conformances                       | 0      |

Indicators are management information, not a basis for discouraging reporting. A rise in reported incidents may reflect improved reporting culture and shall be interpreted accordingly.

## 21. Conduct and Discipline

QRT personnel are the most visible expression of the Company's standards. They shall at all times uphold:

- discipline, punctuality, bearing and turnout;
- confidentiality regarding Company, client and community information;
- professional and respectful behaviour toward colleagues, clients and communities;
- complete impartiality in tribal, clan, land and political matters;
- zero tolerance of substance abuse, bribery, harassment and exploitation; and
- honesty in reporting, including the reporting of their own errors.

Breach of this Policy shall be addressed under the Zero-Tolerance Conduct, Ethics and Prohibited Behaviour Policy (SCSH-HR-GOV-001) and the Conduct, Ethics and Misconduct Case Management SOP (SCSH-SOP-GOV-001). Depending on gravity, outcomes may include counselling, retraining, removal from the QRT, suspension, termination of employment, and referral to the RPNGC.

The following are treated as gross misconduct: unlawful violence; sexual exploitation, abuse or harassment; falsification of records or camera footage; deployment while intoxicated; solicitation of a bribe; and concealment of an incident or of a use of force.

### 21.1 Protection for Those Who Report

Any person who reports a breach of this Policy in good faith shall be protected from retaliation. Retaliation against a person who reports in good faith is itself gross misconduct.

## 22. Policy Governance, Review and Continuous Improvement

- This Policy shall be reviewed every six months, and immediately following any Level 3 or Level 4 incident, any substantiated human rights allegation, any material change in the Project status such as a Final Investment Decision, or any material change in PNG law.
- The review shall be conducted by the PSM, endorsed by the Head of Compliance, Risk and Human Rights, and approved by the GM ISS.
- Lessons identified from debriefs, exercises, audits and client feedback shall be captured in a lessons register and closed out with named owners and due dates.
- Superseded versions shall be withdrawn from circulation and archived; only the current controlled copy is authoritative.
- An annual assurance audit of QRT readiness, training currency, records and human rights compliance shall be conducted and reported to the CEO.

### Approval

| Role                                            | Name | Signature | Date |
|-------------------------------------------------|------|-----------|------|
| Project Security Manager (Custodian)            |      |           |      |
| Head of Compliance, Risk and Human Rights       |      |           |      |
| General Manager — Integrated Security Solutions |      |           |      |
| Chief Executive Officer, SCSH                   |      |           |      |

## Annex A — QRT Activation Log (Minimum Data Set)

| Field                                                         | Entry |
|---------------------------------------------------------------|-------|
| Activation reference number                                   |       |
| Date and time of call-out                                     |       |
| Activating officer and authority                              |       |
| Initial incident classification (Level 1–4)                   |       |
| Location (grid / description)                                 |       |
| Team designation, Team Leader and strength deployed           |       |
| Vehicle / craft registration and odometer or hours            |       |
| Time mobile / time on scene / time stood down / time returned |       |
| Communications means used and check-in record                 |       |
| Situation on arrival                                          |       |
| Actions taken                                                 |       |
| Any use of force (Yes / No — if yes, attach statements)       |       |
| Any person detained (Yes / No — if yes, handover details)     |       |
| Injuries or damage                                            |       |
| RPNGC / client / CLO notified (time and person)               |       |
| Final incident classification                                 |       |
| Team Leader signature and time of submission                  |       |

## **Annex B — Post-Incident Report Structure**

24. Header: reference number, date, location, classification, reporting officer.
25. Executive summary — no more than five lines.
26. Chronology of events with time stamps.
27. Persons involved (roles, not opinions), and witnesses.
28. Actions taken by the QRT, in sequence.
29. Use of force: whether used, level applied, justification, and injuries.
30. Community and landowner dimension, including any grievance raised.
31. Notifications made: internal, client, RPNGC, CLO.
32. Damage, loss and operational impact.
33. Assessment of cause and contributing factors.
34. Recommendations to prevent recurrence, with owner and due date.
35. Attachments: statements, imagery reference, sketch, grievance form.

## Annex C — Rapid Orders Format for QRT Call-Out

| Heading             | Content                                                                                                                           |
|---------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| Situation           | What has happened, where, who is involved, mood and numbers, known hazards.                                                       |
| Mission             | A single clear statement of what this team is to achieve.                                                                         |
| Execution           | Route, order of march, actions on arrival, actions on contact, actions on roadblock, actions on vehicle failure, withdrawal plan. |
| Service support     | Vehicle, fuel, water, medical kit, recovery equipment, duration.                                                                  |
| Command and signals | Who commands, channel and callsigns, check-in interval, PACE tiers, emergency word.                                               |
| ROE reminder        | Unarmed posture, minimum force, de-escalation first, no entry to customary land without authority, everything is recorded.        |

## Annex D — Immediate Actions Aide-Mémoire

### On receiving a call-out

- Confirm location, nature, injuries, and who is on scene.
- Confirm team strength, equipment, communications and vehicle.
- Deliver rapid orders (Annex C). Report mobile.

### On arrival

- Stop short. Assess. Do not drive into a crowd or an unassessed obstruction.
- Report the situation and confirm or revise the classification.
- Identify a single community point of contact where one exists.
- Protect life, then contain, then protect assets.

### If tension rises

- Create distance and time. Reduce visible posture. Speak calmly.
- Request CLO and PSM. Do not argue about grievance, benefits or land.
- Withdraw rather than escalate where life is not at immediate risk.

### If force is used

- First aid to all injured. Notify Operations Room and PSM immediately.
- Preserve the scene, secure footage, record witnesses.
- Written statements before going off duty. Nothing is deleted.

— END OF POLICY —
