1.0 Introduction and Purpose

This Transport Policy establishes the standards and controls governing the safe, secure, efficient and lawful use of all vehicles and vessels operated on behalf of Southern Cross Strategic Holdings Pte Limited (“the Company”) in support of the Kikori Development Project along the Papua LNG project corridor in Papua New Guinea.

Company operations are conducted in a remote, high-risk operating environment characterised by challenging terrain, limited road and communications infrastructure, riverine and coastal movement requirements, and elevated law-and-order risk. Movement of personnel, escorts and materials is therefore treated as a controlled, planned and monitored activity rather than a routine one.

The objectives of this Policy are to:

- safeguard the lives and welfare of employees, sub-contractors, clients and members of the public;
- ensure full compliance with the laws of Papua New Guinea and the health, safety, environment and security requirements of the Project and its client;
- protect Company and client assets and control operational and insurance costs;
- embed a strong culture of driver accountability, discipline and professional conduct; and
- provide a clear framework for movement planning, incident response and continuous improvement.

2.0 Scope and Applicability

This Policy applies to all employees, contractors, sub-contractors and authorised persons of the Company who operate, are carried in, or are responsible for any Company-owned, leased, hired or privately owned vehicle or vessel while conducting official Company business across the Project area of operations.

The area of operations includes, without limitation, the Company headquarters at Kerema, the Papua LNG Facilities, the Kimu Gas Field, the Barikewa Gas Field, the Uramu Marine Base, and all associated access roads, tracks, rivers, coastal routes and staging points within the Gulf and Central Provinces corridor.

This Policy applies to road, riverine, coastal and, where relevant, air movement. It is to be read together with the Company Operations Room (Op-Room) Policy, Logistics and Stores Policy, Sea Marshal Security Policy, and the Company Health, Safety, Environment and Security procedures. Where a client or Project requirement is more stringent than this Policy, the more stringent requirement shall prevail.

3.0 Definitions and Abbreviations

Term / Abbreviation	Meaning
The Company	Southern Cross Strategic Holdings Pte Limited and its operating subsidiaries.
The Project / KDP	The Kikori Development Project, comprising Company security and support operations along the Papua LNG project corridor.
Sites	Papua LNG Facilities, Kimu Gas Field, Barikewa Gas Field and Uramu Marine Base, and the Company headquarters at Kerema, together with associated access routes and waterways.
Op-Room	The Company Operations Room providing 24/7 command, control, communications and movement tracking.
Transport IC / 2IC	The Transport In-Charge and Second-in-Charge responsible for the fleet and its administration.

Term / Abbreviation	Meaning
JMP	Journey Management Plan — the pre-movement risk assessment and authorisation for a road, river or air movement.
IVMS	In-Vehicle Monitoring System — GPS-based tracking and driver-behaviour monitoring fitted to Company vehicles.
CTP	Compulsory Third Party motor vehicle insurance required under PNG law.
RTA / MVIL	Road Traffic Authority and Motor Vehicles Insurance Limited — the PNG authorities responsible for registration, licensing and CTP insurance.
HSE	Health, Safety and Environment.

4.0 Legislative and Regulatory Framework

All transport activities shall comply with the applicable laws of the Independent State of Papua New Guinea and the requirements of the Project. The principal instruments include:

- the Road Traffic Act 2014 and the Road Traffic Rules 2017 (including the Licensing of Drivers, Registration of Motor Vehicles, Passenger and Goods Transport Licensing, Vehicle Standards and Compliance, and Road User Rules), administered by the Road Traffic Authority (RTA);
- the Motor Vehicles (Third Party Insurance) Act (Chapter 295), under which Compulsory Third Party (CTP) insurance is mandatory for every registered vehicle, provided through Motor Vehicles Insurance Limited (MVIL);
- the Road Traffic (Offences and Penalties) Regulation 2017;
- applicable maritime and small-craft safety requirements of the National Maritime Safety Authority (NMSA) for riverine and coastal movement; and
- the Occupational Health and Safety Act and the client's Project HSE and security management requirements.

The Company shall keep current registration and CTP insurance for every Company vehicle, and shall maintain the records necessary to demonstrate compliance. Drivers must satisfy themselves that these are valid before operating any vehicle.

5.0 Roles and Responsibilities

5.1 Management

Project and operational management are accountable for resourcing this Policy, endorsing journey management decisions, and ensuring that transport risk is managed as an integral part of Project delivery.

5.2 Transport IC and 2IC

The Transport In-Charge (IC), supported by the Second-in-Charge (2IC), is responsible for fleet administration, vehicle serviceability, driver authorisation and training records, scheduling, fuel accountability, and the investigation and reporting of transport incidents.

5.3 Operations Room (Op-Room)

The Op-Room authorises and tracks all movements, maintains communications with vehicles and vessels, monitors IVMS, holds journey management records, and coordinates the response to any breakdown, delay or security incident on a route.

5.4 Line Managers and Supervisors

Line managers ensure that only authorised drivers are tasked, that movements are properly planned and cleared, and that fatigue, hours of driving and welfare are actively managed.

5.5 Drivers

Drivers are personally responsible for the safe and lawful operation of the vehicle or vessel in their charge, for the safety of their passengers and load, for pre- and post-use checks, and for the immediate reporting of faults, hazards and incidents.

6.0 Driver Eligibility and Authorisation

No person shall operate a Company vehicle unless formally authorised in writing by the Transport IC. Authorisation requires all of the following:

1. possession of a current and valid Papua New Guinea driver's licence of the correct class for the vehicle operated, or a licence otherwise recognised as valid for use in PNG;
2. a satisfactory driving record, free of major moving violations, verified at authorisation and subject to periodic re-check by the Company;
3. successful completion of Company induction and mandatory defensive-driving, four-wheel-drive and journey-management training appropriate to the operating environment, prior to being tasked;
4. for riverine or coastal operators, the additional competencies required under the Sea Marshal Security Policy and applicable NMSA requirements;
5. medical fitness to drive, and confirmation that the person is not affected by any condition or medication that impairs safe operation; and
6. acknowledgement of, and agreement to comply with, this Policy.

Drivers must immediately notify their supervisor and the Transport IC of any change to their licence status (suspension, revocation, expiry or new endorsement) and of any traffic offence or moving violation, whether on or off duty. Driving privileges are suspended automatically on loss of a valid licence.

7.0 Driver Responsibilities and Conduct

Drivers must at all times exercise due care and attention and drive to the conditions of the road, weather and security environment. The following requirements are mandatory:

- **Compliance.** comply strictly with all PNG traffic laws, posted limits and Project speed limits, and reduce speed on unsealed, wet, congested or built-up sections;
- **Impairment.** never operate a vehicle or vessel while under the influence of alcohol, illegal substances or any impairing medication; the Company operates a zero-tolerance standard and reserves the right to test;
- **Safety Devices.** ensure seat belts are worn by all occupants at all times, and that approved life jackets are worn for all riverine and coastal movement;
- **Distraction.** not use a mobile phone or radio handset in the hand while driving; calls and messages are to be managed only when safely stopped in a secure location;
- **Fatigue.** manage fatigue actively, observe prescribed driving-hour limits and rest breaks, and never drive when tired;
- **Passengers & Loads.** carry only authorised passengers and authorised, correctly secured loads, and never carry unauthorised persons, weapons, or contraband;

- **Conduct.** maintain professional conduct and courtesy toward colleagues, clients, authorities and communities at all times, recognising that the driver represents the Company;
- **Vehicle Care.** keep vehicles clean, presentable and correctly equipped; and
- **Authorised Use Only.** not use Company vehicles for personal errands, private hire, or any non-Project activity without written authorisation.

8.0 Journey Management and Movement Control

Movement in the Project area is a planned and controlled activity. No road, river or air movement outside a secured facility shall commence without prior clearance from the Op-Room and, where required by risk, an approved Journey Management Plan (JMP).

8.1 Journey Management Plan (JMP)

A JMP records the purpose and authority for the movement, the route and alternates, departure and expected arrival times, occupants and load, communications and check-in schedule, the current security and weather picture, and the actions to be taken on delay or incident. The level of planning and control shall be proportionate to the assessed risk of the route.

8.2 Movement Clearance and Tracking

1. Drivers shall book out with the Op-Room before departure and book in on arrival, and shall maintain the agreed radio or telephone check-in schedule throughout the journey.
2. All vehicles shall be fitted with a functioning IVMS/GPS tracker; movement is not authorised in a vehicle whose tracker or communications are inoperative unless specifically risk-assessed and approved.
3. The Op-Room shall monitor movements against the JMP and initiate overdue-vehicle procedures if a vehicle fails to check in or arrive as planned.

8.3 Hours of Movement and Restrictions

Movement is normally conducted in daylight hours only. Night movement and travel during declared restrictions or curfews is prohibited unless authorised by management on the basis of an elevated JMP and appropriate escort. Routes may be closed, re-timed or re-routed by the Op-Room at any time in response to weather, road condition or security information.

9.0 Convoy and Escort Procedures

Higher-risk movements shall be conducted in convoy and, where warranted, with a security escort in accordance with the Company security policies.

- Convoys operate to a briefed order of march, with a lead and rear vehicle, maintained spacing, and a single convoy commander responsible for the movement.
- All convoy vehicles maintain continuous communications with each other and with the Op-Room, and no vehicle detaches from the convoy without authority.
- A pre-movement briefing shall cover the route, hazards, actions-on (breakdown, blockage, hostile act, medical), rally points, and safe havens along the route.
- The convoy does not stop in unsecured or ambush-prone locations except in emergency, and maintains momentum through built-up and choke-point areas consistent with safety and the law.

10.0 Vehicle Standards, Equipment and Maintenance

10.1 Roadworthiness and Standards

Every Company vehicle shall be registered, insured, roadworthy and fit for the terrain in which it operates. Vehicles used off the sealed network shall be of appropriate four-wheel-drive specification and correctly maintained for remote operation.

10.2 Standard Equipment

Vehicles shall carry, as a minimum and as applicable to the task: a functioning IVMS/GPS and communications set, first-aid kit, fire extinguisher, recovery equipment (tow strap, jack, spare wheel and tools), warning triangles, potable water, and the Company vehicle documents and incident forms.

10.3 Driver Checks and Maintenance

Drivers shall complete daily pre-use and post-use checks (tyres, fluids, lights, brakes, load security and communications) and record them as required. Servicing shall follow the scheduled maintenance plan through the approved maintenance provider [Vendor Name / Procedure].

10.4 Fault Reporting

Any defect, damage or mechanical concern shall be reported immediately to the Transport IC/2IC [Contact] using the Vehicle Defect Report Form. A vehicle assessed as unsafe shall be taken out of service until repaired.

10.5 Negligence

The Company may recover from an employee the cost of damage or loss arising from negligence, unauthorised use, or failure to follow this Policy and the maintenance requirements.

11.0 Fuel Management

Given the remoteness of the operating area, fuel is a controlled resource. Drivers shall draw fuel only from authorised sources against the approved fuel-accountability system, record every issue accurately, and safeguard fuel and fuel cards against loss or misuse. Vehicles departing on longer routes shall carry sufficient fuel, and approved reserve fuel where authorised, for the planned journey and a contingency. Any shortfall, discrepancy or suspected misuse shall be reported to the Transport IC.

12.0 Marine and Riverine Transport

Riverine and coastal movement to and from the Uramu Marine Base and other waterborne tasks shall be conducted in accordance with this Policy, the Sea Marshal Security Policy and applicable NMSA requirements. Only authorised, competent coxswains shall operate Company vessels.

- Approved life jackets shall be worn by all persons on board at all times.
- Vessels shall carry the required safety, communications and navigation equipment, and shall not be overloaded beyond their rated capacity.
- All waterborne movements shall be planned, cleared and tracked by the Op-Room in the same manner as road movements, with departure, check-in and arrival reporting.
- Movement shall be suspended in unsafe sea, river or weather conditions, or where the security picture requires.

13.0 Air Movement

Where personnel or materials are moved by helicopter or fixed-wing charter to remote Project locations, movement shall be arranged only through approved aviation providers and conducted in accordance with the operator's safety requirements and Project aviation procedures. Passenger manifests, weights and safety briefings shall be completed for every flight, and all air movements shall be recorded by the Op-Room.

14.0 Accident, Incident and Emergency Procedures

In the event of an accident involving a Company vehicle or vessel, or a private vehicle used on Company business, the driver shall:

1. stop, make the scene safe, check for injuries and render or summon first aid; call emergency services where required;
2. notify the Op-Room immediately, giving location, nature of the incident, casualties and assistance required;
3. report the accident to the Royal Papua New Guinea Constabulary as required by law, regardless of how minor the damage appears;
4. not admit fault, apportion blame, or discuss liability or insurance with other parties;
5. where it is safe to do so, gather the details of all parties, vehicles, insurers and witnesses, and photograph the scene;
6. comply with the direction of the Op-Room, escort or recovery team, prioritising personal safety over the vehicle or load; and
7. complete an internal Accident/Incident Report Form and submit it to the Transport IC within 24 hours.

Company insurance details, emergency contact numbers [Phone / Email] and incident forms shall be carried in every vehicle and vessel.

15.0 Security Incident Response

Given the operating environment, drivers and passengers must be prepared for security incidents such as roadblocks, hold-ups, hostile crowds, tribal disturbance or ambush. The overriding priority is the preservation of life.

- Where a threat is anticipated, and it is safe and lawful to do so, avoid the hazard, turn about and withdraw to the nearest safe haven, and report immediately to the Op-Room.
- Do not resist an armed hold-up; comply, stay calm, protect life, and preserve situational awareness for reporting.
- Follow the actions-on briefed for the route and the direction of the escort commander and Op-Room.
- As soon as safe, provide a full report to the Op-Room and Transport IC; a written incident report follows within 24 hours.

Detailed security response measures are set out in the Company Private Security Details (PSD), Quick Response Team (QRT) and Op-Room policies, which are to be read together with this Policy.

16.0 Community and Environmental Considerations

The Company operates within landowner communities along the Project corridor and depends on constructive community relations. Drivers shall operate with courtesy and restraint, obey speed limits through villages and populated areas, avoid raising dust and hazards near communities, and never engage in confrontation.

Vehicles and vessels shall be operated so as to minimise environmental impact; spills, leaks and any environmental incident shall be contained where safe and reported without delay.

17.0 Expense and Reimbursement Procedures

- **Logging.** All business mileage and vessel movements shall be accurately logged in the approved digital logbook, recording date, route, purpose and distance or hours.
- **Receipts.** Receipts for fuel, tolls and other approved travel expenses shall be retained.
- **Submission.** Expense claims with supporting receipts shall be submitted to Finance via the approved system on the prescribed cycle for timely reimbursement.
- **Non-Reimbursable.** Personal expenses such as non-business calls, refreshments or alcoholic beverages are not reimbursable.

18.0 Disciplinary Actions

A breach of this Policy is a serious disciplinary matter. Depending on its nature and severity, and in accordance with the Company disciplinary and conduct policies, a breach may result in:

- immediate suspension of driving or operating privileges for Company business;
- formal disciplinary action up to and including termination of employment or engagement;
- personal financial liability for damage, loss or fines arising from the breach; and
- referral to the relevant authorities where an offence under PNG law has been committed.

19.0 Records, Audit and Review

The Transport IC shall maintain records of driver authorisations and training, vehicle registration, insurance and maintenance, journey management, and transport incidents. These records are subject to internal audit and quality-assurance review.

This Policy shall be reviewed at least annually by the Policy Owner in conjunction with Operations, HSE and Human Resources, or sooner following a significant incident or a change in law, client requirement or operating conditions, to ensure it remains current, effective and compliant.

Employee Acknowledgment

I acknowledge that I have read, understood, and agree to comply with the Transport Policy of Southern Cross Strategic Holdings Pte Limited. I understand that this Policy applies to all movement I undertake or supervise on Company business, and that any breach may result in disciplinary action up to and including termination of employment or engagement, and may carry personal financial or legal liability.
