BORDER SECURITY OPERATIONS

STANDARD OPERATING PROCEDURE

Kikori Operational Area — Gulf Province, Papua New Guinea

Papua LNG Project

Document No. SCSH-ISS-SOP-004

Version 1.0 | Classification: Internal — Controlled Document

Issued under, and subordinate to, the Border and Boundary Security Policy (SCSH-ISS-SEC-004, v2.1)

Uncontrolled when printed. Verify the version before use.

DOCUMENT CONTROL

Field	Detail
Document Title	Border Security Operations Standard Operating Procedure
Document Number	SCSH-ISS-SOP-004
Version	1.0
Parent Policy	Border and Boundary Security Policy (SCSH-ISS-SEC-004, Version 2.1)
Issuing Division	Integrated Security Solutions
Applicable Locations	Kikori Operational Area, Gulf Province, PNG, and all borders, boundaries and controlled access points under Company responsibility on the Papua LNG Project
Document Owner	Country Security Manager — Papua New Guinea
Approving Authority	General Manager, Integrated Security Solutions
Classification	Internal — Controlled Document
Effective Date	____ / ____ / 20____
Next Scheduled Review	Twelve (12) months from the Effective Date, or on any change to the parent Policy
Distribution	All security personnel, supervisors, shift commanders, control room operators and specialist teams

Relationship to the Policy

This SOP does not create authority. It translates the mandatory requirements of the Border and Boundary Security Policy (SCSH-ISS-SEC-004) into the sequence of actions to be performed at each post, on each shift. Where any conflict arises between this SOP and the Policy, the Policy prevails. Where any conflict arises between this SOP and the law of the Independent State of Papua New Guinea, the law prevails absolutely. Nothing in this SOP enlarges the limits of authority set out in Section 6 of the Policy.

1. PURPOSE AND SCOPE

1.1 This Standard Operating Procedure ("this SOP") sets out, step by step, how border security duties are performed on the Papua LNG Project under the Border and Boundary Security Policy. It is written for the officer on the ground, the supervisor on shift and the operator in the Security Operations Centre (SOC).

1.2 This SOP applies without exception to every person performing, supervising, supporting or overseeing border security functions on behalf of the Company, as defined at Section 2 of the Policy, including officers, supervisors, shift commanders, control room operators and specialist (K9, UAV and marine) teams.

1.3 Each procedure in Section 4 is self-contained. Officers are briefed on, and hold, only the procedures relevant to their post; supervisors hold and enforce all of them. The procedures assume the standing rules at Section 3 are in force at all times.

2. REFERENCES AND FORMS

2.1 Governing documents

- Border and Boundary Security Policy — SCSH-ISS-SEC-004 (parent policy)
- Zero-Tolerance Conduct, Ethics and Prohibited Behaviour Policy — SCSH-HR-GOV-001
- Conduct, Ethics and Misconduct Case Management SOP — SCSH-SOP-GOV-001
- Site Emergency Response and Crisis Management Plan (ERP)
- Applicable post orders for the specific border post or sector

2.2 Companion procedures (referenced, not reproduced here)

- Firearms Management and Armoury SOP
- Access Control and Search SOP
- Use of Force Reporting SOP
- Journey Management and Marine Operations SOP
- Community Grievance and Engagement Procedure

2.3 Records and forms used in this SOP

Form / Record	Used in
Post log / pocket notebook	All procedures — continuous
Access control register	SOP-02, SOP-04
Patrol log	SOP-06
Refusal of entry record	SOP-05
Incident report form	SOP-08 to SOP-13
Use of Force Report	SOP-10
Detention and Handover record	SOP-09
Firearms and asset reconciliation sheet	SOP-01, SOP-15
Community engagement / grievance record	SOP-13
Body-worn camera (BWC) footage register	SOP-02, SOP-03, SOP-09, SOP-10

3. STANDING RULES (ALWAYS IN FORCE)

3.1 The following rules apply on every post, on every shift, in every procedure. They are not repeated inside each procedure; they are assumed.

THE FIVE THINGS THAT OUTRANK EVERYTHING ELSE

1. Human life comes before property, assets and operational continuity — always, without exception.
2. Act only within the law and within Company authority — you hold no police, customs, immigration or quarantine powers.
3. Force is the exception, not the method. Observe, deter, communicate, de-escalate, report.
4. Refuse and report any unlawful order. You are protected when you do; you are liable if you obey.
5. Record everything, accurately and at the time. If it is not recorded, it did not happen.

3.2 Before you are on post you must be

- fit for duty — rested, sober, and free of impairing substances or medication;
- correctly uniformed, wearing your Company ID and name tag, and never anything implying police, military or government status;
- in date for every certification your post requires (armed duty is withdrawn automatically the moment firearms competency lapses);
- in possession of the minimum equipment scale for your post (Annexure C of the Policy) and a working radio; and
- briefed on the current threat picture and the post orders for your specific location.

3.3 Prohibited at all times

No bribe, gift, facilitation payment or favour — solicited, accepted, offered or paid, in cash or in kind.

No taking sides in any landowner, clan, tribal, political, religious or commercial dispute.

No search of a person beyond consent-based external screening by an officer of the same sex, with a witness.

No warning shots. No firearm to protect property alone. No firearm against a fleeing person who poses no threat to life.

No detaining a person in a vehicle, container, store, cell or confined space.

No media, social-media or public comment on any incident — refer all enquiries to Executive Management.

No personal weapons, personal drones or personal recording devices on post.

No altering, erasing, backdating or omitting any record.

4. OPERATIONAL PROCEDURES

The procedures below are ordered as a shift runs: start of shift, then the tasks of the shift, then the exceptions (breach, interception, force, incident), then close of shift.

SOP-01

Shift Handover and Pre-Shift Briefing

Purpose: To take over the post with a complete, accounted-for picture and no gaps in coverage or equipment.

Trigger: Start of every shift, and any change of the officer holding a post.

Responsible: Incoming officer, outgoing officer, Supervisor / Shift Commander.

Records: Post log, firearms and asset reconciliation sheet, pre-shift briefing record.

Steps

1. Report to the Supervisor for the pre-shift briefing. No officer takes a post without it.
2. Confirm you are fit for duty: rested, sober, correctly uniformed, ID worn, certifications in date.
3. Receive the briefing: current threat picture, overnight events, standing tasks, any changes to post orders, weather and river conditions, and the day's community or movement activity.
4. Physically count and sign for all controlled items you are taking on — firearms, ammunition, radios, keys, seals, body-worn camera, night-observation devices. Any discrepancy is reported immediately and is a Category 1 incident if it involves a firearm.
5. Walk the post with the outgoing officer. Confirm the state of fencing, gates, lighting, signage, barriers and equipment. Note anything damaged, missing or newly changed in the post log.
6. Test communications with the SOC. Confirm your call sign, the emergency word, and the escalation numbers on your contact card.
7. Record the handover in the post log: time, incoming and outgoing officers, items accounted for, post condition, and any outstanding matter carried forward.

Do not

- take the post if any controlled item is unaccounted for — resolve it first.
- accept a roster that breaches the fatigue-management standard; report it to the Supervisor.

SOP-02

Manning a Controlled Access Point (CAP)

Purpose: To verify, record and lawfully control the entry and exit of every person, vehicle and consignment.

Trigger: Continuous while the CAP is open.

Responsible: CAP Officer; Supervisor for any exception.

Records: Access control register (a controlled record); BWC footage; refusal record where applicable.

Steps

1. Wear and activate your body-worn camera whenever it is issued, and keep it active for the interaction.
2. Greet the person courteously. Introduce yourself as a Company security officer. State that entry is subject to verification and screening.
3. Verify identity and authorisation: photographic ID, site induction status, gate pass or work order, and — for vehicles and cargo — the manifest, movement permit and vehicle authorisation.
4. Confirm the person, vehicle or consignment is expected and authorised for this point at this time. If in doubt, hold at the barrier and check with the SOC — never wave through on assumption.

5. Conduct consent-based screening as a condition of entry (SOP-03 for persons, SOP-04 for vehicles and cargo). Screening is a condition of entry, not a power of search.
6. Record the entry (and later the exit) in the access control register: time, identity, authorisation, vehicle and cargo details, and officer.
7. If everything is in order, admit the person and log it. If it is not, follow SOP-05 (Refusal of Entry). If the person becomes aggressive or is reasonably suspected of an offence, follow SOP-08 / SOP-09 and notify the SOC.
8. Keep the access point orderly and never leave it unmanned while open; arrange relief through the Supervisor.

Do not

- permit entry, exit or avoidance of screening for any payment, favour or personal reason.
- disclose rosters, manifests, camp numbers or security arrangements to any unauthorised person.
- delete, edit or share BWC footage other than under Section 18 of the Policy.

SOP-03

Screening and Search of a Person

Purpose: To screen a person for prohibited items as a lawful condition of entry, while preserving dignity.

Trigger: Entry to a controlled area where screening applies.

Responsible: CAP Officer of the same sex as the person; a witness.

Records: Access register; BWC footage; incident report if anything is found or refused.

Steps

1. Explain what will happen and ask for the person's consent. Screening is by consent as a condition of entry.
2. Ensure the screening officer is of the same sex as the person, that a witness is present, and that the screening is done externally and out of public view.
3. Conduct an external screening only — a visual and consented pat-down of outer clothing and bags. Use an inspection mirror, wand or metal detector where issued.
4. If a prohibited or suspicious item is found, do not seize it as a power. Direct the person to remove and surrender the item as a condition of entry, or refuse entry. If it presents an immediate danger or evidences an offence, secure and log it and notify the SOC for RPNGC referral.
5. If consent is refused, do not compel. The correct response is refusal of entry (SOP-05). Record it.
6. Record the screening outcome. Keep BWC active throughout.

HARD LIMIT

Never conduct a strip search, an intimate search, or any search other than a consent-based external screening. There are no exceptions. A search beyond this limit is unlawful and is serious misconduct.

SOP-04

Vehicle, Vessel and Cargo Screening

Purpose: To confirm that vehicles, vessels and cargo entering or leaving are authorised and carry nothing prohibited.

Trigger: Any vehicle, vessel or consignment at a CAP.

Responsible: CAP Officer; K9 unit where tasked.

Records: Access register; cargo manifest check; incident report where a discrepancy is found.

Steps

1. Halt the vehicle or vessel at the designated inspection point, engine off, driver's hands visible.
2. Check the driver's authorisation, the vehicle authorisation, and the cargo manifest or movement permit against what is present.
3. Conduct a consented external and load inspection — cab, load area, and accessible compartments. Use mirrors, torch, and a certified K9 unit where tasked and available.
4. Compare the load to the manifest. Note any excess, shortfall, undeclared item, or biosecurity-risk material (live animals, plants, produce, soil, timber, untreated packaging — see SOP-14).
5. If everything reconciles, record and admit. If it does not, hold the vehicle at the point, do not unload as a power, and notify the SOC and Supervisor.
6. Record the movement in the access register: time, vehicle and driver, manifest reference, inspection result, and officer.

SOP-05

Refusal of Entry

Purpose: To turn away a person, vehicle or consignment lawfully and without escalation.

Trigger: Failed verification, refused screening, no authorisation, or a reasonable safety or security concern.

Responsible: CAP Officer; Supervisor on escalation.

Records: Refusal of entry record; access register; incident report if it escalates.

Steps

1. Explain, calmly and courteously, that entry cannot be permitted and give the reason plainly.
2. Offer the lawful path where one exists — obtain authorisation, complete induction, present the correct document, or consent to screening.
3. Direct the person to leave the controlled area. Refusal of entry is not detention; the person is free to go and must be allowed to.
4. If the person leaves, record the refusal: time, identity if known, reason, and outcome. Keep BWC active.
5. If the person refuses to leave, becomes aggressive, or is reasonably suspected of an offence, disengage, keep a safe distance, maintain observation, and escalate to the Supervisor and SOC, who will notify the RPNGC. Do not pursue.

Do not

- use force merely because a person has been refused, has refused a search, or has complained.
- confiscate documents or property as a condition of leaving.

SOP-06

Patrols — Foot, Vehicle and Marine

Purpose: To detect and report boundary breaches and threats early, without predictability.

Trigger: Tasked patrol of a sector, boundary, ROW or waterway.

Responsible: Patrol Commander and patrol members; SOC for tracking.

Records: Patrol log (timings, route, personnel, observations, actions, negative reports).

Before deploying — no patrol moves without all of these

- a nominated patrol commander;
- a minimum strength of two officers (never a single officer in an area assessed medium risk or above);

- a communications check with the SOC;
- a stated route and expected return time lodged with the SOC;
- the minimum equipment scale for the patrol; and
- for marine patrols: a certified coxswain, a serviceable vessel, lifejackets worn by all, marine radio, navigation lights, a fuel-reserve calculation and a lodged float plan (night movement needs specific Supervisor authorisation).

On patrol

- Vary timings and routes deliberately. Fixed, repeating schedules are prohibited.
- Make positive communications checks with the SOC at the set interval (at night, at least every 30 minutes).
- Observe and report: boundary breaches; cut, damaged or removed fencing; new or unauthorised tracks; missing or defaced signage; unattended packages; unauthorised structures, gardens, camps, vessels or aircraft; and signs of poaching, illegal logging, illegal mining or dumping.
- On finding a breach, follow SOP-08. Do not enter a dangerous situation alone; report and await support.
- Record everything in the patrol log, including a nil / negative report where nothing was seen.
- Do not board, stop or interfere with any vessel outside Company-controlled water frontage — observe, describe, photograph if safe, and report to the SOC.

SOP-07

Observation Post (OP)

Purpose: To provide surveillance and early warning over an assessed high-risk approach.

Trigger: OP established under post orders.

Responsible: OP officers; SOC.

Records: OP log; incident report on any sighting of concern.

Steps

1. Occupy the OP per post orders; confirm arcs of observation, communications and the rotation schedule.
2. Maintain continuous, logged observation. Rotate officers to prevent fatigue and loss of alertness.
3. Use surveillance equipment (thermal, night-observation, UAV) only for approved security purposes, by authorised personnel — never on lawful community, political, union or private activity.
4. Report movements of concern to the SOC with a clear description, location and time. Do not engage from the OP; direct a response element.
5. Log every entry, sighting and rotation in the OP log.

SOP-08

Boundary Breach and Trespass Response

Purpose: To respond to an actual or suspected breach safely, lawfully and with full reporting.

Trigger: A detected breach, trespass, or damaged control measure.

Responsible: Detecting officer; Supervisor; SOC.

Records: Incident report (Category per Annexure A); post/patrol log; BWC.

Steps

1. Report the breach to the SOC and Supervisor immediately by the fastest means. State location, what is seen, and numbers.
2. Assess from a safe distance. Do not enter alone into a situation you cannot control; await support.

3. If persons are present and non-threatening, identify yourself, state that they are in a controlled area, and direct them to leave. Manage as a refusal / departure (SOP-05).
4. If an offence is being committed or persons are hostile, do not pursue. Keep observation, protect life, and let the SOC notify the RPNGC.
5. Preserve the scene and any evidence of the breach (cut fencing, tools, tracks) so far as consistent with safety and first aid. Photograph where safe.
6. Complete the incident report within the timeline for its category (Annexure A). Never downgrade, delay, consolidate or omit it.

SOP-09**Interception, Citizen's Arrest and Handover**

Purpose: To manage a restraint of liberty lawfully, briefly and humanely, pending RPNGC handover.

Trigger: A lawful citizen's arrest under the Arrest Act 1977 is genuinely necessary.

Responsible: Officer; Supervisor; SOC; Executive Management on any delay.

Records: Detention and Handover record; incident report; BWC.

BEFORE YOU DETAIN ANYONE

The Company does not operate places of detention. A restraint of liberty is lawful only as a citizen's arrest and only for the minimum time needed to hand the person to the RPNGC. Prolonged detention exposes you and the Company to criminal and civil liability. If in doubt, do not detain — observe, report, and let the RPNGC act.

Steps

1. State clearly who you are, that you are a private security officer, and the reason for the interception.
2. Notify the SOC immediately and request RPNGC attendance without delay. Note the time.
3. Use no more restraint than necessary, and remove restraints as soon as the person is compliant. Never confine the person in a vehicle, container, store, cell or confined space.
4. Provide water, shade or shelter, protection from weather, toilet access and medical attention if required.
5. Do not question the person about the alleged offence. Allow a witness to observe where practicable.
6. If the person appears to be under 18, treat them with particular care, notify a Supervisor immediately, and seek a guardian or community leader.
7. If the property must be secured for safety or evidence, inventory it in the presence of the person and a witness, and hand it to the RPNGC with a signed receipt.
8. If one (1) hour passes without RPNGC attendance, escalate immediately to Executive Management for a decision on release.
9. On handover, record the time, the reason, all actions, and the name and identity of the receiving RPNGC member. Complete the Detention and Handover record.

SOP-10**Use of Force and Post-Incident Actions**

Purpose: To ensure any force used is lawful, necessary, proportionate, minimal, and fully accounted for.

Trigger: A situation where force may be lawfully necessary (see the limits below).

Responsible: Officer; Supervisor; Country Security Manager; Executive Management.

Records: Use of Force Report (before going off duty); incident report; BWC; scene and equipment preserved.

WHEN FORCE IS AND IS NOT PERMITTED

Permitted only where lawful under the Criminal Code Act 1974 and reasonably necessary for: self-defence or defence of another; prevention of a serious offence; lawful ejection of a trespasser who refuses to leave; or maintaining a lawful arrest pending RPNGC handover.

Never as punishment, retaliation or discipline; never to obtain information or a confession; never against a person who is compliant, restrained or fleeing without posing a threat; never merely because entry, search or a complaint was refused; and never against a child, elderly person, pregnant woman or apparently disabled person except in immediate defence of life, and then to the minimum degree possible.

Applying force — the continuum (full table at Annexure B of the Policy; summary at Annexure 2 here)

- Start at the lowest level that can resolve the situation — normally presence and calm communication — and only step up if genuinely necessary.
- De-escalate the instant resistance decreases, and stop the moment the threat ends or the objective is achieved.
- Lethal force is a last resort, permitted only where immediately necessary to protect life against an imminent threat of death or grievous bodily harm, and no lesser means is available. Warning shots are prohibited. Pointing a firearm at a person is a use of force and is reportable.

Immediately after any use of force

1. Render or arrange first aid and medical treatment for any injured person, including the subject, at the earliest safe opportunity.
2. Notify the SOC, the Supervisor and the Country Security Manager without delay; notify the RPNGC where any injury, detention, firearm discharge or allegation is involved.
3. Secure and preserve the scene, the weapon or equipment used, and any recording.
4. Complete a Use of Force Report before going off duty, and separately from any other officer involved.
5. The officer is withdrawn from armed duty pending review and is given welfare support and access to counselling.

SOP-11**Firearms — Carriage and Handling**

Purpose: To ensure firearms are carried and handled only by authorised, competent, fit personnel.

Trigger: Any armed post. Full detail is in the Firearms Management and Armoury SOP.

Responsible: Armed officer; Armourer; Supervisor; Country Security Manager.

Records: Firearms and asset reconciliation sheet; armoury issue/return register.

Steps

1. Carry a firearm only if you hold a current PNG firearms licence and Company authorisation, have passed the competency and legal-knowledge assessment within the last six months, are authorised in writing for that shift and post, and are under no medical, disciplinary or fitness restriction.
2. Draw and return firearms and ammunition against signature at the approved armoury. They are physically counted at every handover and reconciled daily.
3. Report any discrepancy in firearms or ammunition immediately — it is a Category 1 incident, reportable to Executive Management and the RPNGC.
4. Never carry a firearm while affected by alcohol, illicit substances or impairing medication. Random and for-cause testing applies.
5. Use of a firearm is governed by SOP-10 and the Firearms Act 1978. Warning shots are prohibited.

SOP-12**Incident Reporting and Escalation**

Purpose: To ensure every incident is reported immediately, classified correctly and never suppressed.

Trigger: Any reportable incident (see the categories in Section 9 of the Policy).

Responsible: Reporting officer; Supervisor; SOC.

Records: Incident report form; verbal and written timelines per Annexure 1.

Steps

1. Report immediately by the fastest available means to the Supervisor and the SOC.
2. Classify the incident by severity (Annexure 1). If unsure, classify up, not down.
3. Give the verbal report within the timeline for its category, then confirm in writing on the approved incident report form within the written-report timeline.
4. Preserve the scene of any serious incident and leave it undisturbed for the RPNGC or an authorised investigator, so far as consistent with preserving life and first aid.
5. Escalate a Category 1 incident to the SOC, Supervisor, Country Security Manager and Executive Management immediately.
6. Make no media, social-media or public comment. Refer all enquiries to Executive Management.

No officer may downgrade, delay, consolidate or omit an incident report. Falsifying, backdating or altering a report is a dismissible offence and may be a criminal offence.

SOP-13**Community Interaction, Demonstration and Blockade**

Purpose: To protect community consent by handling gatherings and grievances as relations matters, not public-order matters.

Trigger: Any community interaction, enquiry, grievance, gathering, march, petition or blockade.

Responsible: Officer; Supervisor; SOC; Community Affairs.

Records: Community engagement / grievance record (to Community Affairs within 24 hours); incident report where relevant.

Everyday interaction

- Be courteous, patient and impartial. You are the most visible face of the Company and the Project; a single act of arrogance, favouritism or excess can damage consent for the whole Project.
- Recognise customary land interests and rights of passage. Respect clan structures, leaders, sacred sites and custom.
- Refer every enquiry about benefit-sharing, landowner identification, equity, royalties, compensation or the Development Forum to Community Affairs. Never confirm, deny, comment or speculate.
- Make no promise or representation about employment, compensation, access or benefits, and accept or distribute no payment or gift, without prior written management approval.
- Report early indicators of rising expectation, disputed representation or factional tension through the weekly intelligence summary.

Gathering, demonstration or blockade — the standing response

- De-escalate. Communicate calmly. Maintain distance. Protect life. Notify the SOC and management. Await direction.
- Treat it as a community-relations matter to be de-escalated and reported — never as a public-order matter to be suppressed.

- Do not confront, threaten, disperse or arm yourself against a community gathering. Do not take any side.
- Record the event and any grievance on the approved record and lodge it with Community Affairs within 24 hours.

SOP-14**Biosecurity Observation at a CAP**

Purpose: To support national biosecurity without exercising quarantine powers the Company does not hold.

Trigger: Regulated material observed at a CAP or on a vehicle/vessel.

Responsible: CAP Officer; SOC for NAQIA referral.

Records: Access register; incident/observation report.

Steps

1. Observe and report the movement of live animals, birds, plants, produce, soil, timber, seafood and untreated packaging.
2. Do not permit such items through a CAP contrary to site rules or NAQIA requirements.
3. Do not handle suspected biosecurity-risk material. Isolate it where safe and report immediately to the SOC for referral to NAQIA.
4. Comply with any vehicle, vessel, footwear and equipment wash-down and inspection requirements in force at the site.

SOP-15**End of Shift and Equipment Return**

Purpose: To close the shift with everything accounted for and the record complete.

Trigger: End of shift or end of engagement.

Responsible: Officer; Supervisor; Armourer.

Records: Post log; firearms and asset reconciliation sheet; handover to incoming officer (SOP-01).

Steps

1. Complete all outstanding entries in the post log and any patrol, access or incident record before you go off duty.
2. Return all issued equipment complete — firearms, ammunition, radios, keys, seals, BWC and controlled items — against signature. Firearms and ammunition are physically counted and reconciled.
3. Report any loss, damage or malfunction immediately.
4. Brief the incoming officer (SOP-01): threat picture, outstanding matters, post condition and item accountability.
5. Attend the post-shift debrief with the Supervisor and raise any hazard, near miss, error or breach — including your own.

ANNEXURE 1 — INCIDENT CLASSIFICATION AND REPORTING TIMELINES

Classify up if unsure. No officer may downgrade, delay, consolidate or omit a report.

Category	Examples	Verbal report	Written report
1 — Critical	Fatality; life-threatening injury; firearm discharge; kidnapping; armed attack; loss of a firearm; major blockade; substantiated human rights abuse	Immediate — SOC, Supervisor, Country Security Manager and Executive Management	Within 4 hours; full investigation report within 7 days
2 — Serious	Any use of force; detention; assault; significant theft or sabotage; community confrontation; smuggling interception; vehicle or marine accident	Immediate — SOC and Supervisor	Before end of shift
3 — Moderate	Boundary breach without confrontation; trespass; damaged fencing; refusal of entry; minor property damage; equipment loss	Within 1 hour	Within 12 hours
4 — Minor / Observation	Suspicious activity; unauthorised track; missing signage; near miss; unverified rumour	End of shift	In daily activity report

ANNEXURE 2 — USE OF FORCE CONTINUUM (QUICK REFERENCE)

Level	Response	Application and limits
1	Presence and posture	Visible, uniformed, professional presence. The preferred and primary control at all times.
2	Verbal communication	Calm direction, questioning, negotiation, de-escalation, interpreter or community-leader assistance. Always attempted where circumstances permit.
3	Soft empty-hand control	Guiding, escorting, blocking, separating a passively resisting person. Minimum contact necessary.
4	Hard empty-hand control / restraint	Physical restraint of an actively resisting person, and approved restraint devices, for the minimum period. Immediate reporting.
5	Approved defensive equipment	Only where specifically issued, trained and authorised, and only against an assaultive threat. Never against a compliant or fleeing person.
6	Lethal force	Last resort only, where immediately necessary to protect life against an imminent threat of death or grievous bodily harm, and no lesser means is available. Warning shots prohibited. Full investigation mandatory.

Force must be de-escalated immediately as resistance decreases, and must cease the moment the threat ends or the objective is achieved.

ANNEXURE 3 — REPORTING QUICK REFERENCE

Report / record	Prepared by	Frequency	Submitted to
Post log / pocket notebook	Officer	Continuous	Supervisor at handover
Patrol log	Patrol Commander	Every patrol	Supervisor / SOC
Access control register	CAP Officer	Continuous	SOC daily
Incident report	Officer / Supervisor	Per incident	Per Annexure 1
Use of Force Report	Officer involved	Per event	Country Security Manager
Detention and Handover record	Officer / Supervisor	Per event	Country Security Manager
Firearms and asset reconciliation	Supervisor / Armourer	Every handover	Country Security Manager
Community engagement / grievance	Supervisor	Per engagement	Community Affairs (within 24h)
Weekly intelligence summary	Intelligence / Supervisor	Weekly	Country Security Manager
Daily activity report	Supervisor	Daily	Country Security Manager

ANNEXURE 4 — ESCALATION AND CONTACT CARD

Complete on issue and keep with the post orders. Verify numbers at each shift briefing.

Contact	Name	Number / Call sign
Security Operations Centre (SOC)	_____	_____
Supervisor / Shift Commander	_____	_____
Country Security Manager	_____	_____
Executive Management (Cat 1)	_____	_____
RPNGC — nearest station	_____	_____
Medical / CASEVAC	_____	_____
Community Affairs	_____	_____
NAQIA referral (biosecurity)	_____	_____

ANNEXURE 5 — ACKNOWLEDGEMENT OF BRIEFING

To be completed by every person briefed on this SOP and retained on the personnel file. A copy is provided to the individual.

- I have been briefed on, and understand, the Border Security Operations SOP (SCSH-ISS-SOP-004, Version 1.0), or have had it explained to me in a language I understand;
- I understand that this SOP is subordinate to the Border and Boundary Security Policy (SCSH-ISS-SEC-004) and does not enlarge my authority;
- I understand the limits of my authority and that I hold no police, customs, immigration or quarantine powers;
- I understand my obligations on screening, use of force, interception, community engagement and reporting; and
- I understand that I must refuse and report any unlawful order, and that I am protected when I do so.

Full name	Position / Post	Signature	Date
