Document Title	Land Security Operations — Standard Operating Procedures, Papua LNG Project
Document Number	SCSH-SOP-LSO-001
Version	1.0
Parent Policy	Land Security Operations Policy — SCSH-POL-LSO-001, Version 2.0
Effective Date	1 August 2026
Next Scheduled Review	1 August 2027, or earlier if triggered under Section 21 of the parent Policy
Document Owner	Security Manager, Papua LNG Operations
Approving Authority	Managing Director, Southern Cross Strategic Holdings Pte Limited
Security Classification	Internal — Controlled Document
Distribution	All supervisory and frontline personnel; Client Security Focal Point

Revision History

Ver.	Date	Description of Change	Approved By
1.0	1 Aug 2026	Original issue. Derives field-level Standard Operating Procedures from the Land Security Operations Policy (SCSH-POL-LSO-001 v2.0) for the Papua LNG Project.	Managing Director

Authorisation

This SOP is issued under the authority of the Managing Director and is mandatory for every person to whom the parent Policy applies. No person may vary, suspend or waive any requirement of this SOP except in writing and with the prior approval of the Document Owner. Where this SOP conflicts with a mandatory requirement of Papua New Guinea law or a binding Client requirement, the higher standard shall prevail and the conflict shall be reported immediately to the Document Owner.

1. Introduction and Use of This SOP

1.1 Purpose

The parent Policy (SCSH-POL-LSO-001) sets the principles, accountabilities and minimum standards for land security on the Papua LNG Project. This document translates those requirements into step-by-step Standard Operating Procedures (SOPs) that frontline officers, supervisors and the Control Room follow on shift. Each SOP tells the reader what to do, in what order, what never to do, and what to record. Nothing in this SOP lowers, waives or overrides any requirement of the parent Policy or of Papua New Guinea law.

1.2 Operating Context

These procedures are applied in a live, sensitive environment. As at the effective date the Project is advancing through its final pre-sanction workstreams toward a Final Investment Decision, and the State-led Development Forum on benefit-sharing has commenced. Landowner and community sensitivity around benefit-sharing, royalty, equity and landowner-identification is the single largest driver of security risk on Project land. Every officer applying these SOPs shall treat roadblocks, demonstrations, attempted entry and grievance as the most likely incident types, and shall favour observation, reporting and de-escalation over confrontation.

1.3 How Each SOP Is Structured

Every operational SOP in Section 3 onward follows the same layout, so officers can find what they need quickly:

- **Purpose** — what the procedure achieves.
- **Applies to / When** — the roles and the trigger.
- **Before you start** — equipment, checks and authority required.
- **Procedure** — numbered steps, in sequence.
- **Do NOT** — prohibited actions, in red.
- **Record / Escalate** — what to write down and who to tell.

1.4 Golden Rules (apply to every SOP)

- **Life first.** The protection of human life takes precedence over property, always.
- **Legality.** Every action needs a lawful basis. If the basis is unclear — observe, record, escalate; do not act.
- **Minimum force.** Force is a last resort, only in self-defence or defence of another from imminent harm.
- **You are a civilian.** Security officers hold no police powers. No instruction from any person overrides this SOP.
- **Record everything.** Contemporaneous, factual, legible, never altered. If it is not written down, it did not happen.
- **Impartiality.** Never take sides in clan, tribal, political, family or landowner disputes.

2. Roles, Reporting and Key Terms

2.1 Chain of Command (for reporting under these SOPs)

The Company operates a single, unbroken chain of command. Reports go up the chain; instructions come down it. The chain is bypassed only where an immediate threat to life requires direct action or direct notification of emergency services.

Level	Reports to / Acts as
Security Officer	Frontline post duties; reports to Shift Supervisor.

Level	Reports to / Acts as
Shift Supervisor (Day/Night)	Commands the shift; first response; reports to Site Security Coordinator / Area Supervisor.
Control Room Operator	Communications watch, logging, activation of the notification cascade.
Site Security Coordinator / Area Supervisor	Commands a site/corridor sector; reports to Deputy Security Manager.
Deputy Security Manager	Day-to-day delivery, discipline, assurance; deputises for the Security Manager.
Security Manager	Overall command; authorises RPNGC escalation; sole point of contact with Client Security Focal Point.

2.2 Key Terms Used in These SOPs

Term	Meaning
DOB	Daily Occurrence Book — the bound, sequentially numbered register at every guarded post.
Post	Any fixed or mobile position at which an officer is deployed on duty.
LOU	Landowner Unit — clan or incorporated land group with recognised interests in Project land.
RPNGC	Royal Papua New Guinea Constabulary.
VPSHR	Voluntary Principles on Security and Human Rights — the governing conduct framework.
Use of Force	Any physical measure to control, restrain or repel, from presence and verbal direction to lawful restraint.

3. Routine Operating Procedures

SOP-01 Shift Handover and Post Assumption

Purpose

Ensure no post is ever left unmanned and that every officer takes over a post fully briefed on the situation, tasks, defects and accountable items.

Applies to: All security officers and shift supervisors.

When: At every relief, shift change and temporary handover of a post.

Before you start

- Report to post in full, clean uniform with identification displayed.
- Carry issued equipment: radio (charged, correct channel), torch, notebook, pen, whistle, PPE.

Procedure

1. Relief takes place ON POST, face to face — the outgoing officer does not leave until the incoming officer has physically arrived and taken over.
2. Read and sign the current Post Orders for that post. Do not assume the post until this is done.
3. Take a verbal and written handover covering: the current situation and threat level; outstanding tasks; equipment and radio state; defects; keys and seals; any detained item; and standing instructions.
4. Physically account for all keys, seals, equipment and detained items against the register — count, do not assume.
5. Conduct a radio check with the Control Room and confirm correct channel and call-sign.

6. Both the outgoing and incoming officer sign the handover entry in the Daily Occurrence Book (DOB).
7. Confirm knowledge of the nearest muster point, first aid kit, fire extinguisher and emergency contacts before the outgoing officer departs.

Do NOT

- Leave a post unmanned for any reason, even briefly, without an authorised relief in place.
- Accept a handover without physically counting keys, seals and equipment.
- Sign the DOB for items or a situation you have not verified.

Record / Escalate

Handover entry signed by both officers in the DOB; Post Orders sign-on; radio check logged by Control Room.

SOP-02 Gate and Access Control — Persons

Purpose

Ensure that only authorised, identified and sober persons enter Project areas, and that every entry and exit is logged.

Applies to: Gate and access-control officers.

When: Continuously at every designated entry/exit point.

Before you start

- Confirm the current authorised-persons and prohibited-items lists are on hand.
- Confirm the Access Control Log / visitor register and pass equipment are ready.

Procedure

1. Verify identity against a current Project ID card, permit or visitor pass. Check the photo matches the bearer and the pass is not expired or altered.
2. Refuse entry where identification is absent, expired, altered, or does not match the bearer — then report the refusal.
3. Record in the Access Control Log: full name, organisation, purpose, host, and time in.
4. Where a search is required, conduct it under SOP-04 (courteously, in view of a witness; female persons searched only by female officers).
5. Deny access to anyone who refuses a lawful search or who appears to be under the influence of alcohol or drugs, and report immediately.
6. Manage the queue and pedestrian/vehicle separation safely; never allow tailgating.
7. On exit, record time out and reconcile the visitor pass.

Do NOT

- Admit any person on seniority, familiarity or insistence alone — verified authorisation is the only basis for entry.
- Allow tailgating of persons or vehicles through a controlled point.
- Hold or copy a person's identification for any purpose beyond verification.

Record / Escalate

Access Control Log / Visitor Register entry for every person; refusal or intoxication report to the Shift Supervisor.

SOP-03 Vehicle and Cargo Inspection

Purpose

Control the movement of vehicles, cargo and equipment through access points and detect unauthorised or prohibited items and loads.

Applies to: Gate and access-control officers.

When: For every vehicle entering or leaving a controlled area.

Before you start

- Have search mirror, torch, seal log and gate-pass/material-release forms ready.

Procedure

1. Halt the vehicle at the inspection point and greet the driver courteously.
2. Record vehicle registration, driver name, occupants, cargo description and manifest reference in the Vehicle and Cargo Movement Log.
3. For inbound vehicles, check the load against documentation and the prohibited-items list; use the search mirror underneath and check the cab, tray and concealed spaces.
4. For OUTBOUND vehicles, verify the load against a signed gate pass or material release note — no valid documentation, no exit; hold and report.
5. Check container/trailer seals against the seal log; record seal numbers; report any discrepancy BEFORE any seal is broken.
6. Direct the vehicle through only once cleared; maintain safe traffic flow and separation from pedestrians.

Do NOT

- Release an outbound load without a signed gate pass or material release note.
- Break, or allow the breaking of, a seal that does not match the log before reporting it.
- Wave a vehicle through to clear a queue without completing the check.

Record / Escalate

Vehicle and Cargo Movement Log entry; seal discrepancies and undocumented loads escalated to the Shift Supervisor as a security concern.

SOP-04 Search of Persons, Bags and Vehicles

Purpose

Detect prohibited and stolen items lawfully, proportionately and with dignity.

Applies to: All officers conducting searches.

When: At access points per the site search standard, on reasonable grounds, and on outbound movement checks.

Before you start

- Confirm a witness is present.
- Confirm a female officer is available for any search of a female person.

Procedure

1. Explain to the person, courteously, that a search is required and on what basis.
2. Conduct the search in view of a witness and, where possible, in a designated search area.
3. Search female persons ONLY through a female officer. If none is available, hold the movement and call the Shift Supervisor — do not proceed.
4. Ask the person to open bags and containers themselves where practicable; observe rather than rummage.
5. If a prohibited or stolen item is found, secure it, do not accuse, and notify the Shift Supervisor immediately (see SOP-14 for theft).

6. If the person refuses a lawful search, do not use force — deny entry/exit, hold at a safe distance and report.

Do NOT

- Search a female person other than through a female officer, under any circumstances.
- Use force, threats or humiliation to compel a search.
- Search a person as punishment, or to obtain a confession, information or payment.

Record / Escalate

Note the search and any find in the DOB and, where an item is involved, an Incident Report; refusals reported to the Shift Supervisor.

SOP-05 Perimeter Patrol

Purpose

Maintain perimeter integrity, deter intrusion, and detect breaches, disputes and developing landowner activity early.

Applies to: Patrol officers and shift supervisors.

When: Throughout every shift, at irregular intervals.

Before you start

- Draw radio, torch, notebook and patrol log.
- Confirm the route and any current threat advisory.

Procedure

1. Patrol the perimeter on foot or mobile at IRREGULAR intervals — vary timing so patterns are not predictable.
2. Inspect fence lines, gates, locks, lighting, signage and clear zones; give extra attention to blind spots, drainage crossings, culverts, vegetation encroachment and previous breach points.
3. Raise a defect report for any deficiency found (damaged fence, failed light, blocked clear zone).
4. Direct any person approaching a restricted boundary to the designated access point; do not permit unauthorised approach.
5. Report IMMEDIATELY any gathering, new marker, structure, garden, sign or vehicle placed at or near the boundary — these may indicate a developing landowner or access dispute (see SOP-13).
6. Where a fence line is opened for construction, request temporary controls and maintain integrity of the opening.
7. Record each patrol on completion in the Patrol Log.

Do NOT

- Patrol to a fixed, predictable timetable.
- Confront or attempt to disperse a gathering at the boundary — observe, record and report.
- Leave a defect or a new boundary marker unreported to the end of shift.

Record / Escalate

Patrol Log entry per patrol; defect reports; immediate report of any boundary gathering or new marker to the Shift Supervisor and Control Room.

SOP-06 Machinery and Heavy Equipment Protection

Purpose

Prevent theft, tampering, fuel siphoning and unauthorised operation of plant and heavy equipment.

Applies to: Officers assigned to equipment yards and laydowns.

When: Continuously, with heightened attention during darkness and shutdown periods.

Procedure

1. Maintain surveillance of equipment yards, laydowns and parked plant.
2. Verify that keys are issued from and returned to the controlled key point and that the key register is signed (see SOP-08 keys).
3. Prevent any person operating, entering or interfering with plant without documented authorisation.
4. On after-hours patrols, check seals, hour meters, batteries, tyres, fuel caps and attachments against the last known state.
5. Escort and observe plant moving into and out of controlled areas.
6. Report immediately any tampering, siphoning, unexplained movement, missing components or unauthorised repair activity.

Do NOT

- Allow undocumented operation or movement of plant.
- Treat fuel siphoning or missing components as an administrative matter — it is a security incident.

Record / Escalate

DOB and Patrol Log entries; tampering/siphoning reported immediately as a Level 2 incident (SOP-13).

SOP-07 Warehouse, Stores and Materials Security

Purpose

Protect inventory, containers and high-value stores and detect theft indicators.

Applies to: Officers assigned to stores and warehouse areas.

When: During all storage, loading and unloading activity and after hours.

Procedure

1. Guard inventory areas, container stacks and high-value stores; enforce the two-person rule for high-value cages where directed.
2. Observe all loading and unloading and verify authorised documentation supports every movement.
3. Check container and trailer seals on arrival and departure; record seal numbers; report any discrepancy before the seal is broken.
4. Verify that only authorised personnel enter storage areas and that doors, cages and gates are secured on completion.
5. Support scheduled and unannounced stock checks by the Client or Logistics.
6. Report shortages, damaged packaging and repeated after-hours access requests as security concerns.

Do NOT

- Permit an undocumented movement of stores.
- Allow a seal discrepancy to be resolved by breaking the seal before it is reported.

Record / Escalate

Access and movement logs; seal records; theft indicators reported to the Shift Supervisor and recorded in the DOB.

SOP-08 Fuel, Chemical and Hazardous Materials Security

Purpose

Protect fuel farms, chemical and hazardous stores, and enforce the safety controls that attach to them.

Applies to: Officers assigned to fuel, chemical and hazmat points.

When: Continuously at fuel farms, chemical stores and hazardous compounds.

Procedure

1. Restrict access to specifically authorised personnel only.
2. Enforce no-smoking, no-hot-work and no-mobile-phone controls at fuel and chemical points.
3. Witness and record fuel issues where required; report any discrepancy between issue records and dispensed volume.
4. Report any spillage, leak, damaged bund or unsecured container IMMEDIATELY to HSSE and the Shift Supervisor.
5. Treat any fuel theft as a serious security incident and escalate immediately, given its safety, environmental and community consequences.

Do NOT

- Permit smoking, hot work or mobile-phone use at fuel or chemical points.
- Delay reporting a spill, leak or theft.

Record / Escalate

Fuel issue records; immediate HSSE + Shift Supervisor notification for spills; fuel theft escalated as Level 2/3 (SOP-13).

SOP-09 Accommodation, Camp and Office Security

Purpose

Maintain good order in living, messing and office areas and protect people, information and assets.

Applies to: Officers assigned to camp and office areas.

When: Continuously, with attention to curfew hours and after-hours office access.

Procedure

1. Control access to living quarters, messing and recreation areas and enforce room-allocation and curfew rules.
2. Intervene EARLY in disputes and de-escalate rather than confront; maintain good order among residents.
3. Escort HR, Medical or Administration staff during disputes, terminations, demobilisations or welfare interventions when requested.
4. Challenge any unescorted person in an office area outside working hours; protect documents, IT equipment and servers.
5. Verify daily that fire exits, muster points, emergency lighting, extinguishers and evacuation routes are unobstructed and serviceable; report defects to HSSE.
6. Enforce the prohibition on alcohol, illicit substances, gambling and weapons in camp per Client rules.
7. Provide a respectful environment for female personnel, including secure accommodation zoning, and respond promptly to any harassment report.

Do NOT

- Confront residents where de-escalation is possible.
- Ignore or delay response to any report of harassment.
- Leave an obstructed fire exit or failed emergency light unreported.

Record / Escalate

DOB entries; harassment and welfare matters escalated immediately; HSSE defect reports for life-safety items.

SOP-10 Key, Lock and Seal Control

Purpose

Account for every key, lock and seal at all times and prevent unauthorised duplication or use.

Applies to: All officers holding or issuing keys/seals; shift supervisors.

When: At every issue, return and shift change.

Procedure

1. Hold all keys in the controlled key press; issue only against signature in the Key Register.
2. Account for every key and seal at each shift change — count and sign.
3. Produce duplicate keys only with the written approval of the Security Manager.
4. Report the loss of any key IMMEDIATELY; a lost key triggers a documented risk assessment and, where warranted, re-keying.
5. Hold seal stocks securely, issue sequentially, and reconcile monthly.

Do NOT

- Issue a key without a signature.
- Cut or arrange a duplicate key without written Security Manager approval.
- Delay reporting a lost key.

Record / Escalate

Key and Seal Register; lost-key report and risk assessment escalated to the Security Manager.

SOP-11 Control Room, Communications and Security Technology

Purpose

Maintain a continuous communications watch, a single master incident log, and serviceable security technology.

Applies to: Control Room operators and supervisors.

When: 24/7.

Procedure

1. Maintain a continuous communications watch and a single, sequential master incident log.
2. Enforce radio discipline: authorised call-signs, plain language, and NO sensitive information over open channels.
3. Test CCTV, alarm, access-control and lighting systems on the documented schedule; raise faults as security defects with target rectification times.
4. Retain CCTV recordings per Section 17 of the parent Policy; release only on the authority of the Security Manager, for legitimate security/investigative purposes only.
5. Confirm backup communications are identified and tested; accept no single point of failure in the notification cascade.
6. On any incident notification, log time received, activate the correct cascade (SOP-13), and record every decision and action with times.

Do NOT

- Discuss movements, incidents or vulnerabilities over open/unsecured channels.
- Release CCTV footage to anyone without written Security Manager authority.
- Leave a gap in the master log during an active incident.

Record / Escalate

Master incident log; equipment test schedule and defect records; cascade activation timestamps.

SOP-12 Journey Management and Convoy Escort

Purpose

Move personnel and escorts safely outside controlled areas and respond correctly to route threats.

Applies to: Escort teams, drivers and the Control Room.

When: For any security movement outside a controlled area where the Client's journey management system applies.

Before you start

- Obtain an approved journey management plan where required.
- Carry communications, first aid, water, recovery equipment and current route threat information.

Procedure

1. Make departure, waypoint and arrival calls to the Control Room; the Control Room initiates overdue-vehicle procedures without delay if a call is missed.
2. Vary routes, timings and halts to avoid predictability; do not stop at unplanned locations except in an emergency.
3. Comply with Project driving standards: speed limits through villages, seat belts, fatigue limits, and any night-driving prohibition.
4. On encountering a roadblock, crowd or hostile gathering, do NOT force passage — halt at a safe distance, report, and await instruction (see SOP-14).
5. If threatened, withdraw to the last safe location where possible and keep the Control Room updated continuously.
6. On arrival, close out the journey with the Control Room and log any route observations.

Do NOT

- Force a vehicle through a roadblock, crowd or hostile gathering.
- Drive at night where a night-driving prohibition is in force.
- Stop at unplanned locations outside an emergency.

Record / Escalate

Journey management plan; Control Room call log (departure/waypoint/arrival); route threat observations.

4. Incident and Emergency Procedures

SOP-13 Incident Response, Classification and Notification

Purpose

Give every officer a single, reliable sequence for responding to any incident and for classifying and reporting it within the required times.

Applies to: All personnel.

When: On becoming aware of any incident or attempted incident.

Immediate actions (in order)

1. Remain calm. If there is a threat to life, take cover or withdraw to a safe position.
2. Preserve life first — render or summon first aid before considering property.
3. Raise the alarm; notify the Shift Supervisor and Control Room immediately.
4. Secure and isolate the area; preserve the scene; prevent loss or contamination of evidence.
5. Identify witnesses and record their details before they disperse.
6. Do not confront, pursue or detain where doing so would create greater risk.
7. Record all facts contemporaneously, accurately, and without opinion or speculation.

Classify and notify

Classify the incident using the matrix below. Where the level is uncertain, report at the HIGHER level. Every incident, without exception, is also entered in the DOB at the time it occurs.

Level	Examples	Notify	Written report
Level 3 Major / Crisis	Fatality or life-threatening injury; armed attack; hostage/abduction; major fire or explosion; sustained roadblock halting operations; large-scale unrest; loss of a firearm; media/regulatory/national implications.	Immediately by voice to the Security Manager, who notifies Operations Director, Managing Director and Client Security Focal Point.	Preliminary within 1 hour; full report within 24 hours.
Level 2 Serious	Assault/injury needing treatment; significant theft; forced entry; sabotage/tampering; vehicle ambush or stoning; credible threat; ANY use of force by an officer; ANY detention.	Immediately by voice to Shift Supervisor and Control Room; Security Manager informed without delay.	Written report within 4 hours.
Level 1 Minor	Petty theft; trespass without aggravation; fence/lighting defect; access breach without loss; verbal dispute resolved on site; loss of a pass or key.	To Shift Supervisor before end of shift.	Written report within 12 hours.

Do NOT

- Downgrade an incident to avoid reporting it — if unsure, report at the higher level.
- Add opinion, blame or speculation to a factual incident record.

Record / Escalate

DOB entry at time of occurrence; Incident Report Form within the time set above; Level 2/3 escalated by voice first, then in writing.

SOP-14 Landowner Roadblock, Demonstration or Attempted Entry

Purpose

Respond to the Project's highest-likelihood incident safely, without escalation, and without straying into matters reserved to the Client.

Applies to: All officers and supervisors; escort teams.

When: On any roadblock, demonstration, gathering or attempted forced entry.

Procedure

1. Notify the Shift Supervisor, Control Room and Security Manager immediately.
2. Maintain a SAFE DISTANCE. Do not remove barriers, seize property or attempt to disperse the crowd.
3. Do NOT negotiate — negotiation is the responsibility of the Client's Community Affairs function and Project management.
4. Do not photograph or film individuals except where specifically authorised and safe to do so.
5. Secure the nearest gate or facility, account for all personnel, and hold or reroute movements.
6. Record numbers, any leaders identified, demands stated, timings, and any acts of violence — factually and without judgement.
7. Await instruction; escalate to RPNGC only through the Security Manager.

Do NOT

- Negotiate, promise, or discuss compensation, benefits, royalty or equity with the group.
- Remove barriers, seize property, or attempt to disperse a crowd.
- Photograph or film individuals without authority.
- Take sides in the underlying dispute.

Record / Escalate

Immediate voice notification up the chain; continuous factual log; Incident Report (Level 2, or Level 3 if operations are halted).

SOP-15 Theft or Attempted Theft

Purpose

Preserve evidence, act within civilian powers only, and route the matter correctly.

Applies to: All officers.

When: On discovering theft or attempted theft.

Procedure

1. Secure the scene and preserve physical evidence.
2. Identify and record witnesses before they disperse.
3. Where a suspect is present, exercise ONLY the powers in SOP-16 (detention) — and no more.
4. Notify the Shift Supervisor immediately and complete an Incident Report.
5. Refer the matter to the RPNGC only on the authority of the Security Manager, in consultation with the Client.

Do NOT

- Pursue or detain a fleeing suspect where doing so creates greater risk.
- Recover property by force or extract admissions from a suspect.
- Call the RPNGC directly without Security Manager authority.

Record / Escalate

Incident Report (Level 2 for significant value); evidence secured; witness details recorded; DOB entry.

SOP-16 Detention and Handover to RPNGC

Purpose

Ensure any detention is lawful, brief, safe and fully recorded, respecting the detainee's rights.

Applies to: Officers and supervisors.

When: Only where the law permits arrest by a private person AND detention is necessary to prevent harm or escape, or preserve evidence, pending RPNGC arrival.

Procedure

1. Confirm the legal basis exists; if in any doubt, do not detain — observe, record and await the RPNGC.
2. Detain for the SHORTEST possible period and report to the Shift Supervisor and Security Manager immediately.
3. Hold the person in a safe, observed, ventilated location; offer water and access to a toilet.
4. Never hold a detainee in a container, cell, vehicle or unlit room, and never incommunicado.
5. Never question under pressure; never search a detainee through an officer of the opposite sex.
6. Give a detained minor, or any person needing medical attention, immediate priority — summon medical support and notify a responsible adult or guardian.
7. Complete a Detention Register entry: time, place, grounds, treatment, welfare provided, and time and manner of release or handover.
8. Hand over to the RPNGC as directed by the Security Manager and record the handover.

Do NOT

- Hold a person in a container, vehicle, cell or unlit room, or hold them incommunicado.
- Question a detainee under pressure or to obtain payment, a confession or information.
- Search a detainee through an officer of the opposite sex.
- Detain any person a moment longer than necessary.

Record / Escalate

Detention Register entry; reported and investigated as a Level 2 incident; handover to RPNGC recorded (see SOP-17).

SOP-17 Use of Force — Graduated Response

Purpose

Ensure force is a genuine last resort, used only in self-defence or defence of another, and always reported.

Applies to: All officers.

When: Only where no lesser means will suffice to prevent imminent harm.

Procedure

1. Step 1 — Professional presence and observation. A visible, alert, professional posture is the primary control.
2. Step 2 — Clear verbal direction and warning. Give lawful, calm instruction and warning.
3. Step 3 — Withdrawal, containment and summoning assistance. Break contact and call for support rather than engage.
4. Step 4 — Defensive physical measures, STRICTLY limited to self-defence or defence of another from imminent harm, minimum degree and duration only.
5. Cease force the instant the threat stops; render or summon first aid as needed.
6. Report EVERY application of force, however minor, as a Level 2 incident (SOP-13) and to the Client.

Do NOT

- Carry or use any firearm unless individually authorised in writing under the Firearms Act and by the Client.
- Carry or use any unauthorised weapon, improvised weapon, bush knife, spray or restraint device.
- Use force as punishment, retaliation, or to obtain a confession, information or payment.
- Use force against a person who is complying, restrained, injured or fleeing without threat.
- Discharge a warning shot or make any firearm-related threat.
- Fail to report any use of force — this is itself a serious disciplinary offence.

Record / Escalate

Use of Force Register + Incident Report (Level 2); investigated; reported to the Client. Failure to report is gross misconduct.

SOP-18 Violence, Clan Conflict or Disorderly Behaviour

Purpose

Protect Project personnel and assets during violence or disorder without becoming a party to it.

Applies to: All officers and supervisors.

When: On any outbreak of violence, clan conflict or serious disorder on or near Project land.

Procedure

1. Withdraw personnel to a safe position and account for all staff.
2. Do NOT intervene in inter-clan or community violence beyond protecting Project personnel and securing Project assets.
3. Alert the RPNGC through the Security Manager and inform the Client immediately.
4. Consider lockdown, muster or controlled evacuation with the emergency response organisation.
5. Maintain a continuous log of events and decisions.

Do NOT

- Intervene in a clan or community fight beyond protecting Project people and assets.
- Take sides or be drawn into the dispute.

Record / Escalate

Continuous event log; Incident Report (Level 2/3); RPNGC alerted through the Security Manager.

SOP-19 Fire, Medical or Safety Emergency

Purpose

Support the site emergency response and keep routes and access clear for responders.

Applies to: All officers.

When: On any fire, serious medical or safety emergency.

Procedure

1. Raise the alarm and initiate the site emergency procedure.
2. Notify Emergency Response and the Medical facility immediately.
3. Control access, clear routes for emergency vehicles, and prevent re-entry to affected areas.
4. Support muster point control and headcount reporting to the Emergency Coordinator.
5. Hand over scene control to the Incident Commander on arrival.

Do NOT

- Allow re-entry to an affected area before it is declared safe.

- **Obstruct emergency vehicle access.**

Record / Escalate

DOB and incident log; report into BOTH security and HSSE systems where there is a safety dimension.

SOP-20 Bomb Threat, Suspect Item or Unexploded Ordnance

Purpose

Protect life from an explosive threat and preserve information for specialists.

Applies to: All officers.

When: On any bomb threat, suspect item or suspected UXO.

Procedure

1. Do NOT touch, move or approach the item.
2. Record the EXACT wording of any threat and the caller's details.
3. Establish a cordon at the distance directed and evacuate AWAY from the item using safe routes.
4. Notify the Security Manager, Client and RPNGC immediately.
5. Await specialist attendance and keep the cordon until stood down.

Do NOT

- **Touch, move, cover or photograph a suspect item.**
- **Use a radio or mobile phone close to a suspect item unless directed otherwise.**
- **Allow anyone to approach or re-enter the cordon.**

Record / Escalate

Threat wording recorded verbatim; Level 3 incident; cordon and evacuation logged.

5. Conduct, Records and Assurance Procedures

SOP-21 Interface with Public Security Forces (RPNGC / PNGDF)

Purpose

Cooperate lawfully with public security forces while keeping Company personnel under Company command and free of unlawful acts.

Applies to: All officers and supervisors.

When: Whenever RPNGC, PNGDF or other lawful authority is present on or adjacent to Project sites.

Procedure

1. Cooperate courteously and do not obstruct the lawful exercise of authority.
2. Remain under Company command at all times; do NOT accept operational tasking from public security forces.
3. Refer any request for Company support, information, access, transport or accommodation immediately to the Security Manager for decision.
4. Record factually, and report through the chain and to the Client Security Focal Point without delay, any observed or alleged human rights concern involving public security forces.
5. Never participate in, assist or conceal any unlawful act.

Do NOT

- Take operational orders from public security forces.
- Provide transport, accommodation, access or information without Security Manager approval.
- Participate in, assist or conceal any unlawful act, or fail to report a human rights concern.

Record / Escalate

DOB entry; any request or human rights concern reported to the Security Manager and Client Security Focal Point.

SOP-22 Community and Landowner Engagement Conduct

Purpose

Keep every officer's conduct toward communities respectful, neutral and within role, and surface grievance early.

Applies to: All officers.

When: In every interaction with landowners, community members and adjacent villages.

Procedure

1. Be courteous, consistent and honest; observe local custom, protocol and sacred or restricted sites, and seek guidance where uncertain.
2. Remain strictly neutral in clan, family, political and benefit-distribution disputes.
3. Support, but never substitute for, the Client's Community Affairs and Landowner Liaison functions.
4. Report community tension, grievance, rumour or expectation EARLY so it can be addressed before it escalates.
5. Direct any grievance into the grievance mechanism (SOP-23).

Do NOT

- Make promises, offer employment, or discuss compensation, royalty, equity or benefit-sharing.
- Engage in any sexual conduct involving community members, and any sexual conduct involving a minor (gross misconduct).
- Solicit or accept bribes, or facilitate access for payment or favour.

- Discriminate or behave abusively on the basis of clan, province, ethnicity, gender, religion or disability.

Record / Escalate

Early-warning report of community tension; grievances logged under SOP-23; misconduct reported for immediate removal and, where applicable, referral to authorities.

SOP-23 Grievance Handling

Purpose

Receive and route community and employee grievances about security conduct fairly and without reprisal.

Applies to: All officers; supervisors and the Security Manager for resolution.

When: Whenever any person raises a concern about security conduct.

Procedure

1. Receive the grievance courteously; do not dismiss, argue or retaliate.
2. Log the grievance in the grievance register and acknowledge it to the person.
3. Escalate to the Shift Supervisor / Security Manager for impartial investigation within defined timeframes.
4. Keep the complainant informed of progress and outcome as far as appropriate.
5. Report grievances and their resolution to the Client.

Do NOT

- Retaliate against, or permit retaliation against, anyone who raises a grievance in good faith (itself a disciplinary offence).
- Attempt to resolve or suppress a grievance informally to avoid logging it.

Record / Escalate

Grievance register entry; acknowledgement; impartial investigation tracked to closure; reported to the Client.

SOP-24 Records and the Daily Occurrence Book

Purpose

Ensure security records are contemporaneous, factual, legible, complete and never altered.

Applies to: All officers and supervisors.

When: Throughout every shift, at the time of each event.

Procedure

1. Record events in the DOB in INK, at the time they occur — bound, sequentially numbered, no erasure.
2. Correct errors by a SINGLE strike-through and initial; never overwrite, erase or use correction fluid.
3. Record what was observed, not what was assumed; keep opinion and speculation out.
4. Maintain the other mandatory registers as they apply to the post: Access Control Log, Visitor Register, Vehicle and Cargo Movement Log, Patrol Log, Incident Reports, Detention Register, Use of Force Register, Key and Seal Register, Property Damage and Loss Log, Equipment Issue and Defect Register.
5. Hand over and account for all records at shift change (SOP-01).

Do NOT

- Falsify, back-date, alter or destroy any record — this is gross misconduct and may be a criminal offence.
- Release any record, photograph, footage or report to a third party without written Security Manager authority.

Record / Escalate

All mandatory registers kept current; records retained a minimum of seven years; release only on written Security Manager authority.

SOP-25 Post-Incident Investigation and Learning

Purpose

Establish facts, find root causes, and convert lessons into corrective action.

Applies to: Security Manager and appointed investigators; all personnel to cooperate.

When: For all Level 2 and Level 3 incidents.

Procedure

1. The Security Manager appoints a competent investigator INDEPENDENT of the post concerned.
2. Establish the facts and secure evidence, statements and records; identify root causes and system failures.
3. Avoid premature attribution of blame; focus on what failed and why.
4. Translate findings into corrective actions with named owners and due dates in the Security Action Register.
5. Circulate lessons learned in briefings and fold them into training, post orders and risk assessments.

Do NOT

- Appoint an investigator connected to the post or incident under review.
- Close an investigation without recorded corrective actions and owners.

Record / Escalate

Investigation Report; Security Action Register entries tracked to closure; lessons incorporated into training and post orders.

6. Competency Prerequisite to Applying These SOPs

No officer may perform a duty under these SOPs until competent to do so. The following must be complete before or immediately upon first deployment, and refreshed at the stated intervals (per Section 16 of the parent Policy):

Training	Frequency	Applies to
Project induction and site-specific orientation	On mobilisation	All
This SOP, parent Policy, post orders and reporting standards	On mobilisation, then annually	All
Human rights and VPSHR awareness	On mobilisation, then annually	All
Use of force, detention and legal powers	Annually	All
Conflict resolution and de-escalation	Annually	All
Access control, search and documentation	Annually	Gate/access
First aid and emergency response	Every two years	Min. one per shift
Prevention of sexual exploitation, abuse and harassment	Annually	All

Annexure A — Quick-Reference Cards

A.1 Incident — First Seven Actions

1. Stay calm; take cover / withdraw if life is threatened.
2. Preserve life first — first aid before property.
3. Raise the alarm; call Shift Supervisor + Control Room.
4. Secure and isolate the scene; preserve evidence.
5. Record witnesses before they disperse.
6. Do not confront, pursue or detain if it raises risk.
7. Write the facts down now — no opinion, no guessing.

A.2 Roadblock / Demonstration — Remember

- Keep a safe distance. Do not remove barriers or disperse the crowd.
- Do not negotiate — that is Community Affairs, not security.
- Do not film or photograph individuals without authority.
- Secure the nearest gate; account for people; hold movements.
- Report up the chain immediately; log numbers, leaders, demands, timings.

A.3 Use of Force — Ladder

1. Presence → 2. Verbal direction & warning → 3. Withdraw, contain, summon help → 4. Defensive force (self-defence or defence of another only)

Never a firearm or weapon unless individually authorised in writing. Report every use of force as Level 2.

A.4 Notification Timings

Level	Notify	Written report
Level 3 — Major/Crisis	Immediately by voice to Security Manager (cascades to MD & Client).	Prelim 1 hr; full 24 hrs.
Level 2 — Serious	Immediately by voice to Shift Supervisor + Control Room.	Within 4 hrs.
Level 1 — Minor	To Shift Supervisor before end of shift.	Within 12 hrs.

Annexure B — SOP Acknowledgement

To be completed by every person to whom this SOP applies and retained on the individual's personnel file.

I confirm that I have received, read and had explained to me the Land Security Operations Standard Operating Procedures (SCSH-SOP-LSO-001, Version 1.0) for the Papua LNG Project. I understand the procedures, including those governing the use of force, detention, incident reporting and my human rights obligations, and I undertake to comply with them at all times.
