1. Purpose and Relationship to the Policy

This Standard Operating Procedure (SOP) translates the mandatory requirements of the **Logistics, Stores and Supply Chain Management Policy (SCSH-LOG-POL-001, Version 2.0)** into step-by-step working instructions for personnel across the Papua LNG project corridor. The Policy states **what** must be achieved and **why**; this SOP states **who** does **what**, **in what order**, and against **which record**.

Where any conflict arises, the Policy prevails over this SOP, and a client contractual requirement that is more stringent prevails over both. This SOP is subordinate to the Corporate Governance Framework and the Zero-Tolerance Conduct, Ethics and Prohibited Behaviour Policy, and is read together with the Integrated Security Solutions, Border Security, K9 Operations and Lands Security procedures.

KEY POINT — No material or asset enters, moves within, or leaves the Company supply chain without authorisation, documentation and a named accountable custodian. Unrecorded stock does not exist; unrecorded issue is a loss.

2. How to Use This Document

- **Each procedure (SOP-01 to SOP-37)** opens with a control strip: its purpose, the responsible role, the trigger that starts it, and the forms it generates.
- **Numbered steps** are performed in sequence. A step that cannot be completed is escalated, not skipped.
- **CONTROL** boxes flag a mandatory control or a prohibited act. **KEY POINT** boxes flag the single most important discipline in that procedure.
- **Controlled forms** are identified by their register reference (LOG-F-01 to LOG-F-18). Only the current version of a form, listed in Annex A, may be used.
- **Value bands, thresholds and holdings** referenced in the steps are consolidated for quick reference in Annexes B to F.

Part 1 — Governance, Delegation and Demand Planning

SOP-01 Logistics Authority, Segregation of Duties and Delegation

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Ensure every logistics action is performed by an authorised person under proper separation of duties.	Project Manager; Group Manager, Logistics & Procurement (HQ)	Site mobilisation; role change; leave, medical evacuation or absence	Delegation of Authority record; Access List

1. Confirm each logistics role at the site is filled by a named individual recorded on the site logistics plan (Stores Officer/Quartermaster, Transport Coordinator, Project Logistics Supervisor).
2. Verify that the functions of **requisition, approval, purchase, receipt and payment** are held by different individuals. No person approves their own requisition, receives goods against a PO they raised, or authorises payment for goods they received.
3. Where site manning makes full segregation impracticable, document the compensating controls and obtain the Project Manager's written approval; notify HQ.
4. For any absence, record the delegation of a logistics authority in writing, limited in duration, and copy it to HQ.
5. Treat verbal delegation as valid only for the duration of a declared emergency; confirm it in writing within **twenty-four (24) hours**.

CONTROL — Splitting a requirement into smaller orders to defeat an approval threshold, or self-approving any step, is a disciplinary offence.

SOP-02 Demand Planning and Forecasting

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Drive procurement from forecast requirement, not reaction to shortage.	Project Logistics Supervisor; Stores Officer; HQ Logistics	Monthly forecast cycle; mobilisation, demobilisation or manpower surge	90-day materials forecast; consumption review record

6. By the **25th day of each month**, compile a rolling ninety (90) day materials forecast from manning levels, rotation cycles, contract scope and planned operations, and submit it to HQ.
7. Each quarter, review consumption rates for uniforms, PPE, fuel, rations and K9 supplies against actual issue data; adjust the forecast accordingly.
8. On any mobilisation, demobilisation, manpower surge or new task order, raise an immediate out-of-cycle forecast revision.
9. Recalculate reorder points as average consumption over the **maximum credible resupply lead time**, plus a safety margin of not less than **30 per cent** for corridor sites.
10. Cross-check the forecast against minimum stock holdings (Annex E) and the site resupply cycle recorded in the Site Logistics Annex.

KEY POINT — Plan against the worst-case resupply interval, not the average. Seasonal flooding, swell, silting and reduced flying weather are planning assumptions, not exceptions.

Part 2 — Procurement and Supplier Management

SOP-03 Material Requisition (MRF)

PURPOSE Initiate all procurement through a single authorised demand document.	RESPONSIBLE Requesting Supervisor; Project Manager; Finance Officer	TRIGGER A validated requirement for material or services	FORMS / RECORDS LOG-F-01 Material Requisition Form
---	---	--	--

11. The requesting supervisor raises an **MRF (LOG-F-01)** stating item description, item code, quantity, technical specification, required delivery date, delivery location and cost centre.
12. The Project Manager approves the MRF against operational need and delegation.
13. The Finance Officer verifies budget availability before any commitment is made to a supplier.
14. Route the approved MRF to the HQ Purchasing & Customs Cell for sourcing.

CONTROL — No commitment of any kind may be made to a supplier before the MRF is approved and budget is verified.

SOP-04 Competitive Sourcing and Quotation Evaluation

PURPOSE Obtain value for money on merit, defensibly and transparently.	RESPONSIBLE Purchasing Officer (HQ); Group Manager, Logistics & Procurement	TRIGGER Approved MRF above the single-quote band	FORMS / RECORDS Quotation comparison sheet; LOG-F-18 Single Source Justification
--	---	--	--

15. Determine the value band from **Annex B** and obtain the required number of written quotations (one, two, or three written quotations by band).
16. Evaluate on **whole-of-life cost**, delivery lead time to the point of use, warranty and in-country after-sales support, and compliance with technical and safety specification — not price alone.
17. Record the evaluation on a comparison sheet so the reasoning can be reconstructed by a person who was not present.
18. Where three quotations cannot be obtained, prepare a **Single Source Justification (LOG-F-18)** recording the market enquiry made and the basis for value for money; obtain the Group Manager's approval.
19. Confirm the supplier is on the Approved Supplier Register (SOP-06) before award.

CONTROL — Splitting a requirement into smaller orders to avoid an approval threshold is a disciplinary offence. Gifts, inducements and undisclosed interests are prohibited absolutely (SOP-05).

SOP-05 Conflict of Interest and Ethical Procurement

PURPOSE Keep every procurement decision free of inducement and undisclosed interest.	RESPONSIBLE All procurement participants; Project Manager; Group Manager, Logistics & Procurement	TRIGGER Any sourcing decision; any offer of benefit	FORMS / RECORDS Conflict of Interest Register
--	---	---	---

20. Before participating in any sourcing decision, declare in writing any personal, family, customary, clan or financial interest in a supplier or prospective supplier to the Project Manager and the Group Manager; record it in the Conflict of Interest Register.
21. Refuse and report any gift, hospitality, commission, facilitation payment or other benefit offered in connection with a procurement decision.
22. If a supplier attempts to induce a Company employee, remove the supplier from the register immediately (SOP-07) and escalate to the Chief Executive Officer.
23. Document the reasoning behind each award so it is capable of independent review.

KEY POINT — Breach of this procedure is serious misconduct under the Zero-Tolerance Conduct, Ethics and Prohibited Behaviour Policy and may constitute an offence under Papua New Guinea law.

SOP-06 Supplier Prequalification and Registration

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Admit only assessed, legitimate suppliers to the Approved Supplier Register.	Purchasing Officer; Group Manager, Logistics & Procurement	New supplier proposed for use	Approved Supplier Register; prequalification file

Assess each prospective supplier against the following before registration:

Criterion	Evidence required
Legal standing	IPA registration certificate, tax identification number, GST registration, relevant trade or operating licences
Financial capacity	Trading history; bank details verified independently of email instruction ; capacity to sustain supply
Technical capability	Product specification and certification, particularly for PPE, lifting equipment and safety-critical items
Delivery capability	Demonstrated ability to deliver into Gulf Province and the corridor, or to the nominated consolidation point
HSE and labour	Safety record; absence of forced or child labour; compliance with PNG employment law
Integrity	Declaration of beneficial ownership; absence of undisclosed connection to Company personnel; anti-bribery undertaking

24. Compile the prequalification file and confirm each criterion is evidenced.
25. Where price, quality, safety and delivery are broadly comparable, apply national-content preference (SOP-08) in registration and award decisions.
26. Enter the supplier on the Approved Supplier Register only when prequalification is complete.

SOP-07 Supplier Performance Monitoring and Removal

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Hold suppliers to standard and act on non-performance.	Purchasing Officer; Group Manager, Logistics & Procurement	Quarterly review cycle; performance failure	Supplier performance scorecard

27. Score each supplier quarterly on delivery reliability, specification compliance, defect and rejection rate, responsiveness and pricing stability.
28. For persistent non-performance, issue formal notice, suspend from the register, or remove — as determined by the Group Manager.
29. Remove immediately any supplier attempting to induce a Company employee and escalate to the CEO.

SOP-08 Purchase Orders, National Content and Payment Integrity

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Commit to suppliers correctly, prefer local supply on merit, and pay only on a verified match.	Purchasing Officer; Finance Officer; Group Manager, Logistics & Procurement	Award decision; bank-detail change; invoice for payment	LOG-F-02 Purchase Order; National Content Report; three-way match record

Purchase order

30. Raise a **Purchase Order (LOG-F-02)** with a unique reference, agreed price, delivery terms, delivery location and payment terms before any supplier is instructed to supply.
31. Do not issue retrospective POs except to regularise an approved emergency purchase (SOP-09).

National content and landowner participation

32. Where price, quality, safety specification and delivery reliability are broadly comparable, give preference to PNG suppliers, and within that group to Gulf Province and landowner-affiliated businesses in the project-impacted areas.
33. Do not apply preference where it would compromise safety-critical specification, create an unmanaged conflict of interest, or fail value for money; document the reason for any such decision.
34. Record value and proportion of procurement placed with national, provincial and landowner-affiliated suppliers each quarter in the National Content Report.

Payment integrity

35. Verify any change to supplier bank details **by telephone or in person** with a previously known authorised contact. Verification by return email is not acceptable.
36. Release payment only on a **three-way match** of Purchase Order, Goods Received Note and invoice.

CONTROL — A change of bank details confirmed only by email is a fraud indicator. Stop and verify against a known contact before any release.

SOP-09 Emergency Procurement

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Enable urgent supply where delay creates real risk, without losing control.	Project Manager; Purchasing Officer	Risk to life, contractual breach or failure of an essential operation if delayed	Written justification; LOG-F-02 retrospective PO

37. The Project Manager may authorise an emergency purchase **verbally** only where delay would create a risk to life, a breach of a client contractual obligation, or the failure of an essential operation.
38. Confirm the authorisation by written justification within **24 hours**.
39. Raise the supporting Purchase Order within **48 hours**.

40. Report the purchase in the monthly procurement summary.

CONTROL — Repeated recourse to emergency procurement at a site is treated as a planning failure and investigated.

SOP-10 Importation and Customs Clearance

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Clear imported and temporarily imported materials lawfully and completely.	Purchasing Officer (HQ Purchasing & Customs Cell)	Any imported consignment	Import file (invoice, packing list, BoL/AWB, import declaration, duty/GST assessment)

41. Clear imported materials through a **licensed customs broker**.

42. Maintain the import file: commercial invoice, packing list, bill of lading or air waybill, import declaration, duty and GST assessment, and any project concession or temporary-importation documentation.

43. Track temporarily imported equipment to ensure **re-export within the permitted period**.

Part 3 — Receipt, Warehousing and Inventory

SOP-11 Goods Receipt, Inspection and Acceptance (GRN)

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Accept only correct, complete and undamaged goods into custody.	Stores Officer / Quartermaster	Arrival of any consignment (including free-issue, client-furnished, transferred or donated)	LOG-F-03 Goods Received Note; inspection checklist

Inspect all incoming materials against the PO and delivery documentation — in the presence of the carrier where practicable — for:

- Quantity received against quantity ordered and quantity on the delivery docket.
- Condition: transit damage, water ingress, tampering and seal integrity.
- Correct specification, part number, size, certification and batch or serial number.
- Packaging integrity, labelling, shelf life and expiry date, and presence of Safety Data Sheets for hazardous goods.
- Calibration and test certification for lifting, electrical, gas-detection and other safety-critical equipment.

44. Raise a **Goods Received Note (LOG-F-03)** for every receipt without exception.

45. File the PO, delivery docket or consignment note, supplier invoice, inspection checklist and GRN together as the receipt file.

46. Bin accepted stock per SOP-13 and update the Stock Register (SOP-14) the same day.

SOP-12 Discrepancy Handling and Rejection (GDR)

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Control non-conforming receipts and protect	Stores Officer; Purchasing Officer; Project Manager; Security duty officer	Shortage, excess, damage, specification failure or tampering on receipt	LOG-F-04 Goods Discrepancy Report

against tampering and loss.			
-----------------------------	--	--	--

47. Report any shortage, excess, damage or specification failure within **24 hours** on a **Goods Discrepancy Report (LOG-F-04)**; notify the Purchasing Officer and the supplier.
48. Quarantine rejected goods in a designated, clearly marked area; do **not** issue them under any circumstance pending resolution.
49. Where the discrepancy has a security dimension — broken seals, evidence of tampering, missing sensitive items — additionally report immediately to the Project Manager and the security duty officer and treat it as a security incident (SOP-31), not merely a stock discrepancy.

SOP-13 Warehousing, Segregation and Housekeeping

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Store all commodities safely, securely and in serviceable condition.	Stores Officer; HSE Officer	Acceptance of stock into store; routine inspection cycle	Weekly housekeeping record; monthly HSE inspection; site action register

Storage standards

- Segregate by commodity class (uniforms/textiles; PPE; electronics/comms; batteries; K9 & veterinary; medical; rations/catering; tools/spares; fuel, oils & lubricants; chemicals/hazardous).
- Do not co-locate incompatible materials. Store fuels, oxidisers, corrosives, compressed gases and foodstuffs separately per their Safety Data Sheets.
- Rack or palletise all storage clear of the floor, with aisle clearance for safe access and emergency egress. Do not exceed rack rating or create a manual-handling hazard.
- Keep buildings weatherproof, ventilated and vermin-proofed; apply humidity control (mandatory for optics, radios and thermal equipment) and climate control for electronics, medical and K9 veterinary supplies.
- Install commodity-appropriate firefighting equipment; inspect monthly and record. Keep exits, assembly points and spill kits signed and unobstructed.
- Hold high-value and sensitive items in a locked cage or strongroom under separate key control (SOP-21).

Inspection

50. The Stores Officer conducts a documented **weekly** housekeeping and safety inspection.
51. The HSE Officer conducts a documented **monthly** inspection covering fire, spill, manual handling, dangerous-goods segregation and expiry control.
52. Track all findings to closure in the site action register.

SOP-14 Item Coding and Stock Records

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Maintain an accurate, reconstructable master record of all inventory.	Stores Officer	Any receipt, issue, return or adjustment	LOG-F-07 Stock Register / Bin Card

53. Assign every stocked item a unique Company item code and a defined unit of issue. Do not accept uncoded stock into store.

54. Record in the **Stock Register (LOG-F-07)**: item code, description, unit of issue, bin location, quantity on hand, reorder point, maximum holding, batch or serial number, and expiry date where applicable.
55. Where an electronic inventory system is used, produce and retain a printed or exported backup **weekly**, in recognition of connectivity and power loss at remote sites.

KEY POINT — Update the record on the day of the transaction. A record that lags the physical stock is the origin of most variances.

SOP-15 Stock Counting and Reconciliation

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Verify physical stock against the record on a disciplined cycle.	Stores Officer; Project Manager; HQ Logistics	Scheduled count cycle; custodian handover	Cycle-count sheets; monthly variance report; LOG-F-15 Handover Certificate

Apply the counting regime in the table; every count is recorded and signed.

Frequency	Requirement
Weekly	Cycle count of all sensitive, high-value and fast-moving items by the Stores Officer; result recorded and signed
Monthly	Full stock count and reconciliation, witnessed and countersigned by the Project Manager; variance report to HQ
Quarterly	Independent HQ Logistics audit, including verification of the fixed asset register and physical inspection of serialised items
Annually	Full physical inventory and asset verification supporting the financial accounts, with external audit participation where required
On handover	Complete count and formal Handover Certificate (LOG-F-15) signed by outgoing and incoming Stores Officer

CONTROL — No custodian departs the site before handover is complete and the Handover Certificate is signed.

SOP-16 Variance Investigation

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Explain every discrepancy; never adjust it away.	Stores Officer; Project Manager; HQ Logistics	Any count variance	Variance report; LOG-F-06 Loss or Damage Report (where applicable)

56. Investigate and explain every variance; do **not** adjust it out of the record.
57. Classify each variance as clerical error, damage, expiry, unrecorded issue, or suspected loss or theft.
58. Report to HQ within **24 hours** any variance in a sensitive item (regardless of value) and any variance exceeding the value threshold in Annex B (PGK 1,000).
59. Where loss or theft is suspected, raise a Loss or Damage Report (SOP-20); a material or sensitive-item variance may trigger a Board of Inquiry.

SOP-17 Stock Rotation and Shelf-Life Control

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Prevent issue of expired or degraded stock.	Stores Officer	Receipt, binning and monthly review	Expiry watch list (monthly report)

- 60. Apply **first-in, first-out** rotation to all date-sensitive stock.
- 61. Flag items within **90 days** of expiry in the monthly report.
- 62. Quarantine expired PPE, medical items, veterinary supplies and rations immediately; **never** issue them.

Part 4 — Issue, Return and Accountability

SOP-18 Issue of Items (EIF)

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Place every issued item under a named, signed accountability.	Stores Officer; recipient	Approved demand for issue	LOG-F-05 Equipment Issue Form; personal accountability record

- 63. Issue no item without an **Equipment Issue Form (LOG-F-05)** signed by both the Stores Officer and the recipient; the recipient's signature is personal accountability for the item.
- 64. Issue uniform and PPE per the **Personal Kit Matrix (Annex C)**, scaled to role, location and season.
- 65. Issue serialised items — radios, satellite devices, night-vision and thermal equipment, body-worn cameras, laptops, GPS units — **against serial number** and record on the individual's personal accountability record.
- 66. Record K9 consumables, feed and veterinary items against the individual dog's file and reconcile with the handler's daily record (SOP-22).

SOP-19 Return, Exchange and Demobilisation Clearance

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Recover all accountable property before clearance and final pay.	Stores Officer; Project Manager; HR/Finance	Rotation, reassignment, demobilisation or termination; defective item exchange	Clearance certificate; LOG-F-05 (return entries)

- 67. On rotation, reassignment, demobilisation or termination, recover all serviceable issued items to store.
- 68. Exchange damaged, worn or defective items **one-for-one**; the defective item is surrendered **before** a replacement is issued.
- 69. Issue a clearance certificate only when all accountable items are returned or formally written off.

CONTROL — Final pay and clearance are not processed until the Stores Officer certifies return of all issued property, subject to the recovery provisions of the employment contract and applicable law.

SOP-20 Loss, Damage and Recovery (LDR)

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Investigate every loss and act on cause.	Custodian; Project Manager; Stores Officer		LOG-F-06 Loss or Damage Report

		Loss, theft, damage or destruction of Company or client property	
--	--	--	--

70. The custodian reports loss, theft, damage or destruction to the Project Manager and Stores Officer immediately, and in any event within **24 hours**, on a **Loss or Damage Report (LOG-F-06)**.
71. The Project Manager determines whether the loss arose from fair wear and tear, operational circumstance, negligence or misconduct.
72. Where negligence or misconduct is found, apply disciplinary action and recovery of value per SOP-37 / the disciplinary procedure.
73. Refer any suspected criminal conduct to the Royal Papua New Guinea Constabulary.

SOP-21 Controlled, Sensitive and High-Value Items

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Apply enhanced control to items attractive to theft, misuse or impersonation.	Stores Officer; named custodians	Receipt, holding, issue, verification or disposal of a designated item	LOG-F-08 Sensitive Items Register; destruction certificate

Designated sensitive classes: communications & satellite equipment; night-vision, thermal & optical equipment; surveillance, CCTV & recording equipment; computers & data-storage media; medical supplies including controlled pharmaceuticals; fuel; keys, access cards & seals; uniforms, insignia & identification media; and any regulated item held under licence.

74. Hold sensitive items in a secure cage or strongroom, access limited to named custodians.
75. Record each item in the **Sensitive Items Register (LOG-F-08)**: serial number, custodian, issue date, return date and physical verification date.
76. Physically sight and verify sensitive items **weekly**, and at every change of custodian or shift handover where operationally held.
77. Destroy withdrawn, worn or surplus uniforms, insignia and identification media **under witness** and record the destruction (impersonation risk).
78. Sanitise data-bearing devices per the Company information security requirements before disposal or transfer.

Part 5 — Specialised Supply Streams

SOP-22 K9 Logistics Support

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Sustain K9 capability as a dedicated stream, not general consumable supply.	Stores Officer; K9 Handler; Project Logistics Supervisor	K9 capability deployed at a location	Individual dog file; temperature log; K9 handler daily record

79. Hold a minimum **30-day** reserve of veterinary-approved feed at each K9 location, protected from moisture, heat and vermin.
80. Store veterinary consumables, vaccines and medications under controlled temperature with a maintained **cold chain**; keep a temperature log.

81. Hold kennel consumables, disinfectants, bedding, leads, harnesses, muzzles, cooling equipment and transport crates to the scale in the K9 Operations Policy.
82. Record all K9 consumption against the individual dog's file for veterinary review, welfare assurance and cost allocation.
83. Plan K9 movement by vehicle, vessel or aircraft in advance, specifying crate, ventilation, water and heat-stress controls in the Journey Management Plan (SOP-25).

SOP-23 Fuel, Oils and Lubricants Management

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Store, issue and reconcile fuel safely and against theft.	Stores Officer / fuel issuing officer; Project Logistics Supervisor; HSE Officer	Fuel receipt, storage, issue or reconciliation	LOG-F-09 Fuel Logbook and Dip Sheet

Storage

- Store fuel only in approved, labelled, bunded tanks or approved containers, away from accommodation, ignition sources and watercourses.
- Provide bunding of not less than **110 per cent** of the largest container; keep it free of rainwater.
- Keep spill kits, absorbent material, fire extinguishers and SDS at every fuel point; train personnel in their use.
- Permit no smoking, hot work or unauthorised access within the designated fuel area.

Issue and reconciliation

84. Record every issue in the **Fuel Logbook (LOG-F-09)**: date, time, vehicle/vessel/plant identity, odometer or hour-meter reading, quantity issued, and signatures of drawing operator and issuing officer.
85. Take and record tank dips **daily**; reconcile book stock to physical dip **weekly**.
86. Investigate and report any variance exceeding the Annex B tolerance (**2 per cent** of throughput).
87. Monitor consumption against kilometres travelled or hours run, by asset; investigate consumption outside the norm for fault, leakage or misappropriation.
88. Keep fuel areas locked, lit and, where practicable, under camera surveillance, with keys under strict control (high-risk theft commodity).

Environmental control

89. Contain, clean up, record and report **all** spills, however small, per the Environment Act 2000 and the client's environmental incident reporting requirements.
90. Handle contaminated soil and absorbents as regulated waste (SOP-33).

Part 6 — Transport, Journeys and Dangerous Goods

SOP-24 Land Transport and Fleet Management

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Operate Company vehicles only when authorised, serviceable and controlled.	Transport Coordinator; drivers; Project Logistics Supervisor	Any vehicle allocation, movement, pre-start or service due	Authorised Drivers Register; LOG-F-10 Vehicle Movement Log; LOG-F-12 Pre-Start Checklist; vehicle history file

Authorisation to drive

91. Allow only personnel holding a valid PNG licence of the correct class, who have completed the Company defensive-driving assessment and site induction, and who are named on the **Authorised Drivers Register**, to operate a Company vehicle.
92. Prohibit absolutely: driving under the influence of alcohol or drugs; use of a hand-held mobile telephone while driving; carriage of unauthorised passengers.
93. Observe fatigue limits: no continuous driving beyond **4 hours** without a break; cap daily driving hours to the client journey-management standard.

Use, control and maintenance

94. Record all movements in the **Vehicle Movement Log (LOG-F-10)**: driver, purpose, destination, departure and return times, odometer readings.
95. Permit no private use unless expressly authorised in writing. Keep any fitted in-vehicle monitoring system operational at all times; disabling it is a disciplinary offence.
96. Restrain loads per load-restraint requirements; prohibit unsecured loads and carriage of passengers on open trays or on top of cargo.
97. Complete a **Pre-Start Inspection (LOG-F-12)** before first daily use; report defects immediately and remove defective vehicles from service.
98. Service every **5,000 km** or the manufacturer interval, whichever is shorter; record in the vehicle history file. Track registration, insurance and inspection currency centrally and renew before expiry.

KEY POINT — Mandatory vehicle equipment (safety, recovery, communications, documentation, consumables) is carried on every corridor movement — see Annex D.

SOP-25 Journey Management (JMP)

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Authorise and control every road, river or air movement against assessed risk.	Project Logistics Supervisor; Project Manager; Security function; control room	Any planned movement	LOG-F-11 Journey Management Plan

99. Undertake no movement without an approved **Journey Management Plan (LOG-F-11)** appropriate to the assessed risk of the route.
100. Record in the JMP: route; departure and expected arrival times; personnel and cargo manifest; communications schedule and check-in points; alternate routes and safe havens; and the overdue action if a check-in is missed.
101. Authorise journeys through the Project Logistics Supervisor, and — for high-risk routes — through the Project Manager in consultation with the Security function.
102. Prohibit night driving outside secured areas except where the Project Manager authorises it in writing on a documented risk assessment, and for medical or security emergencies.
103. Have a control room or nominated duty officer track every movement to completion and initiate overdue-vehicle procedures without delay.
104. Brief convoy discipline, spacing, lead/rear responsibilities and actions-on for breakdown, blockade, accident or ambush before departure.
105. On higher-risk routes, set convoy composition, escort, spacing, communications and actions-on to the current threat, authorised by the Project Manager with Security. Prohibit single-vehicle movement on such routes except in a declared emergency.

106. Where a movement requires RPNGC, PNGDF or client-escort coordination, arrange and confirm it **before** departure; record the escort, its communications, and the fallback if the escort becomes unavailable.

CONTROL — Suspend movement when the security, community or weather situation deteriorates. Any person may cancel a journey for cause; no employee is penalised for refusing an unsafe journey. No delivery commitment justifies an avoidable security risk.

SOP-26 Marine and Inland Waterway Logistics

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Conduct river and coastal movement safely under a float plan.	Coxswain; Transport/Marine Coordinator; Project Logistics Supervisor	Any marine or riverine movement	Float Plan (marine JMP); vessel survey and crewing records

107. Operate only vessels registered and surveyed as required by the National Maritime Safety Authority, crewed by qualified and Company-assessed coxswains.
108. Ensure a serviceable lifejacket of the correct size is **worn by every person on board at all times** — no exception.
109. Carry a functioning communications device, correctly stowed spare fuel, anchor and line, bailer, paddle, torch, first-aid kit, flares or approved distress signal, and drinking water.
110. Do not exceed rated capacity; maintain freeboard; distribute and secure cargo evenly.
111. Lodge a **float plan** before departure and close it on arrival.
112. Plan against tide, swell, river level, log debris and daylight; prohibit night transits except in emergency.
113. Stow and manifest fuel and hazardous cargo securely, segregated from passengers.

SOP-27 Aviation and Air Charter Logistics

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Manifest and load air movements accurately and within limits.	Project Logistics Supervisor; loadmaster/dispatcher	Any charter or helicopter movement	Passenger and cargo manifest; DG declaration (where applicable)

114. Use only charter aircraft and helicopter operators holding a current Air Operator Certificate, approved by the Company and, where required, the client, before use.
115. Prepare and retain an accurate passenger and cargo manifest, including **individual weights**, for every flight. Falsifying a manifest is a serious disciplinary offence.
116. Observe payload, sling-load and helipad limitations absolutely; prepare, weigh and certify loads before presentation.
117. Present dangerous goods for carriage by air only through trained and current personnel, correctly classified, packed, marked, labelled and declared per IATA DGR (SOP-28).
118. Inspect, mark and secure helipads and landing sites, and clear loose material, before each movement.

SOP-28 Dangerous Goods and Hazardous Materials

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
	Stores Officer; HSE Officer; trained DG personnel	Any hazardous substance held or moved	

Store, handle and move hazardous materials in compliance and safely.			LOG-F-16 Hazardous Substances Register; SDS; transport documentation
--	--	--	--

119. Maintain a **Hazardous Substances Register (LOG-F-16)** at each location: every hazardous substance, quantity, storage location and current SDS.
120. Hold SDS in hard copy at the point of storage, accessible to all personnel and to emergency responders.
121. Train personnel handling hazardous materials in the hazards, required PPE, spill response and first-aid measures.
122. Transport dangerous goods per the requirements for the mode of carriage — correctly segregated, labelled, placarded where required, and accompanied by transport documentation.
123. Store compressed-gas cylinders upright, restrained, with valve protection fitted, segregated by gas type, and secured against unauthorised access.

Part 7 — Life Support, Medical Stock and Security of Stores

SOP-29 Camp, Catering and Life Support Stores

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Sustain camp life support to standard and against spoilage.	Stores Officer; catering supervisor; camp boss	Holding of catering, water and accommodation stores	Temperature logs; water test records; scale of issue records

- Hold food stores at temperatures appropriate to the commodity, with daily temperature logs for chilled and frozen storage and documented action on excursion.
- Rack dry stores clear of floor and walls, vermin-proofed, rotated first-in, first-out.
- Source, treat, test and record potable water per the site water-management arrangements; retain test results.
- Hold accommodation stores, bedding, mosquito nets, cleaning materials and hygiene consumables to an established scale per occupied bed space.
- Hold generator fuel, spares, filters and lubricants to a minimum **30 days'** consumption at remote locations.

SOP-30 Medical and Emergency Response Stock

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Keep medical and emergency stock complete, in date and secure.	Site medic/nurse; Stores Officer; Company medical adviser	Medical stock holding, inspection or administration	Controlled-drug register; first-aid inspection record; expiry watch list

- Hold a medical stock scale approved by the Company medical adviser, appropriate to manning, isolation and evacuation timeline.
- Apply expiry control: report items within **90 days** of expiry monthly; withdraw expired items immediately.
- Hold controlled pharmaceuticals in a locked cabinet under the sole custody of a qualified medical practitioner or nurse, with a register recording every administration and disposal.
- Inspect, restock and seal first-aid kits in vehicles, vessels and work areas **monthly**, and record it.
- Verify emergency response equipment (stretchers, spinal boards, oxygen, snake-bite provisions, evacuation kits) serviceable **weekly**.

- Maintain malaria prophylaxis, insect repellent, oral rehydration and heat-illness provisions as standing stock.

SOP-31 Security of Stores and Assets

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Protect stores, fuel and high-value stock from theft and unauthorised access.	Stores Officer; Project Manager; security personnel	Store operation; key control; cargo departure; suspected incident	LOG-F-17 Key and Access Register; access list; exit-check record

124. Lock stores whenever unattended; restrict access to named personnel on an access list approved by the Project Manager.
125. Control keys and access cards through the **Key and Access Register (LOG-F-17)**, with issue and return signed and a documented **weekly key muster**.
126. Install CCTV at store entrances, fuel points and high-value areas where power and infrastructure permit; retain recordings per the retention schedule.
127. Post a security guard at store and fuel installations during darkness and at all times where high-value stock is held.
128. Do not allow visitors or non-store personnel into storage areas unescorted.
129. Manifest all cargo departing a site by vehicle or vessel; conduct and record random exit checks.
130. Report immediately any suspected theft, unauthorised access, tampering with seals or falsification of a record to the Project Manager, and treat it as a **security incident**, not merely a stock discrepancy.

Part 8 — Assets, Waste and Business Continuity

SOP-32 Asset Management and Transfers

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Account for fixed and client-furnished assets throughout their life.	Finance Officer; Stores Officer; releasing and receiving custodians	Acquisition, transfer, verification or write-off of an asset	Fixed Asset Register; LOG-F-13 Asset Transfer Note

131. Uniquely tag every asset above the capitalisation threshold and record it in the **Fixed Asset Register** with location, custodian, acquisition date and cost; verify physically at least **annually**.
132. Record client-furnished and leased equipment separately and identify it clearly as not owned by the Company.
133. Move an asset between sites only on an **Asset Transfer Note (LOG-F-13)** signed by releasing and receiving custodians; update the register on the day of transfer.
134. Write off an asset only on an investigation report, the Project Manager's recommendation and approval at the delegated level; reflect it in both the asset register and the financial accounts.

SOP-33 Waste Management and Disposal

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Dispose of waste and surplus lawfully and without leakage of value.	Stores Officer; HSE Officer; Project Manager; CEO (above delegation)	Waste generation; obsolete, damaged or surplus items	LOG-F-14 Asset Disposal Form; disposal certificates/consignment

			notes; destruction certificate
--	--	--	--------------------------------

135. Segregate waste at source into general, recyclable, hydrocarbon-contaminated, chemical, medical and electronic streams.
136. Dispose of regulated wastes only through a licensed contractor; retain disposal certificates or consignment notes as evidence of lawful disposal.
137. Prohibit burning, burial or riverine disposal except where expressly permitted by the client's approved environmental management plan.
138. Record, quarantine and dispose of expired, damaged or obsolete equipment on an **Asset Disposal Form (LOG-F-14)** authorised by the Project Manager, and above the delegated value by the CEO.
139. Dispose of uniforms, insignia, identification media and data-bearing devices by **destruction under witness**, with a signed destruction certificate.
140. Receipt the proceeds of any surplus-asset sale to the Company; do not retain, apply locally or distribute them at site level.

SOP-34 Business Continuity and Contingency Logistics

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Hold and manage reserves that keep isolated sites running through disruption.	Project Manager; Project Logistics Supervisor; Security & Community Affairs	Site operation; access disruption; contingency drawdown	Contingency stock verification; alternative-route register; exercise findings

141. Hold a minimum **30-day** reserve of food, potable water, fuel, medical supplies and essential consumables at each remote location, ring-fenced from routine consumption and verified monthly.
142. Identify alternative supply routes (road, river, coastal, air) in advance for each location, with documented trigger points for switching modes.
143. Draw down contingency stock only on the **written authority of the Project Manager**, and initiate replenishment the same day.
144. Rehearse logistics support to evacuation, medical evacuation, site shutdown and personnel-relocation scenarios at least **annually**; record findings.
145. Where community unrest, landowner grievance or civil disturbance restricts access, suspend movement and resume only on the joint assessment of the Project Manager, Security and Community Affairs.

Part 9 — Records, Reporting and Assurance

SOP-35 Records, Documentation and Correction

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Keep logistics records legible, secure, retrievable and unfalsifiable.	All record holders; Stores Officer; HQ	Creation, correction, backup or retention of any record	All controlled forms (Annex A)

146. Keep all logistics records legible, dated, signed and retained for a minimum of **seven (7) years**, or longer where required by contract or PNG law.
147. Protect records from moisture, insect damage and unauthorised access; back up electronic records **weekly** to HQ.

148. Use only the current version of a controlled form (Annex A); withdraw superseded forms from circulation.
149. Correct an error by a **single ruled line** through it, with the correction, initial and date beside it. Prohibit erasure, overwriting, correction fluid and back-dating.
150. Treat falsification of any logistics record as serious misconduct that may constitute a criminal offence. Do not disclose commercial or supplier information outside the Company without authorisation.

SOP-36 Reporting Cycle and Performance Indicators

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Report logistics status and performance on a fixed cadence.	Project Logistics Supervisor; Stores Officer; Project Manager; HQ	Daily, weekly, monthly, quarterly cycle; any exception event	Daily situation input; weekly/monthly/quarterly reports; exception reports

Submit the following on the stated cadence; exception reports go up immediately and in any event within 24 hours.

Report	Content and timing
Daily situation input	Fuel dip, critical stock shortfalls, vehicle and vessel availability, journeys completed and outstanding — to the Project Logistics Supervisor
Weekly logistics report	Stock vs minimum holdings, fuel consumption and reconciliation, fleet and marine condition, journeys, shortages, incidents, outstanding requisitions — to Project Manager and HQ
Monthly logistics report	Full inventory reconciliation and variance analysis, procurement summary, national-content data, fixed-asset update, supplier performance, disposals, expiry watch list, corrective-action status
Quarterly assurance report	HQ audit findings, KPI performance, supplier-register changes, contingency-stock verification, policy exceptions, continuous-improvement actions
Exception reports	GDR, LDR, security incident, environmental spill and material variance — immediately, within 24 hours

KEY POINT — Performance is measured against the KPIs in Annex F. Repeat audit findings and any nil-target breach are escalated.

SOP-37 Self-Assessment, Audit and Corrective Action

PURPOSE	RESPONSIBLE	TRIGGER	FORMS / RECORDS
Assure compliance and close findings to verified completion.	Project Logistics Supervisor; Project Manager; HQ Logistics; CEO (escalation)	Monthly self-assessment; quarterly HQ audit; external/client audit	Self-assessment record; corrective action register

151. Complete a site self-assessment against the Policy **monthly**; the Project Logistics Supervisor signs and the Project Manager countersigns.
152. HQ Logistics conducts a documented internal audit of each site at least **quarterly** — physical stock, records, procurement files, fuel reconciliation, fleet compliance and asset verification.
153. Cooperate fully with client, regulatory and external audits; provide access to records, storage areas and personnel.

154. Enter every finding in a corrective action register with a named owner and due date; track to verified closure. Escalate repeat findings to the CEO.
155. Keep the confidential whistle-blowing channel available for reporting procurement fraud, theft, falsification or coercion; no good-faith reporter suffers detriment.

Annex A — Register of Controlled Forms

Only the current version of a form below may be used. Superseded forms are withdrawn from circulation (SOP-35).

Ref.	Form	Purpose and holder
LOG-F-01	Material Requisition Form (MRF)	Initiates all procurement; raised by requester, approved by Project Manager
LOG-F-02	Purchase Order (PO)	Company commitment to supplier; raised by Purchasing Officer
LOG-F-03	Goods Received Note (GRN)	Confirms acceptance into custody; raised by Stores Officer
LOG-F-04	Goods Discrepancy Report (GDR)	Records shortage, damage or specification failure on receipt
LOG-F-05	Equipment Issue Form (EIF)	Issues an item to a named individual
LOG-F-06	Loss or Damage Report (LDR)	Initiates investigation of lost or damaged property
LOG-F-07	Stock Register / Bin Card	Master inventory record by item code and location
LOG-F-08	Sensitive Items Register	Serialised control of designated sensitive items
LOG-F-09	Fuel Logbook and Dip Sheet	Fuel issue, receipt and reconciliation record
LOG-F-10	Vehicle Movement Log	Records all vehicle movements and odometer readings
LOG-F-11	Journey Management Plan (JMP)	Authorises and controls road, river and air movements
LOG-F-12	Pre-Start Inspection Checklist	Daily vehicle, vessel and plant serviceability check
LOG-F-13	Asset Transfer Note	Records movement of an asset between locations or custodians
LOG-F-14	Asset Disposal Form	Authorises and records disposal or destruction
LOG-F-15	Stores Handover Certificate	Formal handover between custodians
LOG-F-16	Hazardous Substances Register	Lists hazardous substances held and their Safety Data Sheets
LOG-F-17	Key and Access Register	Controls issue and return of keys and access cards
LOG-F-18	Single Source Justification	Records the basis for procurement without competitive quotation

Annex B — Procurement Approval and Action Thresholds

Thresholds are in Papua New Guinea Kina (PGK), confirmed by the CEO on issue and reviewed annually. See SOP-03, SOP-04 and SOP-09.

Value band (PGK)	Quotations required	Approval	Documentation
Up to 2,000	One	Project Logistics Supervisor	MRF, PO, GRN
2,001 – 20,000	Two written	Project Manager	MRF, comparison sheet, PO, GRN
20,001 – 100,000	Three written	Group Manager, Logistics & Procurement	MRF, evaluation record, PO, GRN
Above 100,000	Three written + formal evaluation	Chief Executive Officer	Full tender file and recommendation
Emergency (any value)	As available	Project Manager (verbal; written in 24 h)	Written justification + retrospective PO

KEY POINT — Reporting/investigation triggers (SOP-16, SOP-23): any single stock variance over PGK 1,000; any variance in a sensitive item regardless of value; any fuel reconciliation variance over 2 per cent of throughput — reported to HQ within 24 hours.

Annex C — Personal Kit Matrix

Indicative scales confirmed by the Project Manager for each site and season. Replacement is fair-wear-and-tear, one-for-one exchange (SOP-18, SOP-19).

Item	Guard	Supervisor	K9 Handler	Replacement cycle
Uniform set (shirt & trousers)	3	3	3	12 months
Safety boots	1 pair	1 pair	1 pair	12 months
Wet weather jacket	1	1	1	24 months
Hat / cap	1	1	1	12 months
Belt and accessories	1 set	1 set	1 set	24 months
High-visibility vest	1	1	1	12 months
Identification card and lanyard	1	1	1	On expiry
Torch and batteries	1	1	1	As required
Notebook and pen	1	1	1	As required
Radio (serialised, on issue)	Per post	1	1	On return
Lifejacket (marine tasking)	1	1	1	On defect
Handler kit (lead, harness, muzzle, pouch)	—	—	1 set	12 months

Annex D — Minimum Stock Holdings and Mandatory Vehicle Equipment

D.1 Minimum stock holding levels

Category	Remote sites	Kerema HQ warehouse
Rations and dry stores	30 days	45 days
Potable water and treatment	30 days	45 days
Generator and vehicle fuel	30 days	As tankage permits
Medical consumables	60 days	90 days
K9 feed and veterinary consumables	30 days	60 days
Uniform and PPE (replacement float)	10% of manning	20% of manning
Batteries and communications consumables	30 days	60 days
Vehicle and vessel critical spares	Per criticality list	Per criticality list

D.2 Mandatory vehicle equipment (SOP-24)

Category	Minimum requirement
Safety	First-aid kit, fire extinguisher (serviced, in date), wheel chocks, warning triangles, high-visibility vests
Recovery	Serviceable spare wheel, jack, wheel brace, tow strap, shovel; recovery tracks for wet-season operation
Communications	Two-way radio or satellite device where mobile coverage is absent; charged handset and vehicle charger
Documentation	Registration and insurance documents, journey management plan, vehicle logbook, emergency contact card
Consumables	Drinking water, spare fuel where authorised and correctly stowed, insect repellent, torch

Annex E — Logistics Performance Indicators

Targets tracked and reported per SOP-36. A nil-target breach or repeat audit finding is escalated to the CEO.

Indicator	Target	Reported
Stock accuracy at monthly count	≥ 98 per cent	Monthly
Stock-outs of critical items	Nil	Weekly
Requisition-to-delivery cycle time	Within agreed lead time ≥ 90%	Monthly
Purchase orders raised before supply	100 per cent	Monthly
Fuel reconciliation variance	≤ 2 per cent	Weekly
Vehicle and vessel availability	≥ 90 per cent	Weekly
Journeys with approved JMP	100 per cent	Weekly
Overdue corrective actions from audit	Nil	Quarterly
Procurement value with national/landowner suppliers	Per contract commitment	Quarterly
Logistics-related recordable incidents	Nil	Monthly

Annex F — Approval and Endorsement

This Standard Operating Procedure is issued under the authority of the Chief Executive Officer of Southern Cross Strategic Holdings Pte Limited and takes effect from the date of signature. It is subordinate to, and read with, SCSH-LOG-POL-001 (Version 2.0).

Action	Name	Position	Signature and date
Prepared by		Group Manager, Logistics and Procurement	
Reviewed by		Project Manager, Papua LNG Corridor Operations	
Reviewed by		Manager, Health, Safety, Security and Environment	
Approved by		Chief Executive Officer, SCSH Pte Limited
