Field	Detail
SOP title	Quick Response Team (QRT) Standard Operating Procedures
SOP reference	SCSH-SOP-QRT-001
Version	1.0 (initial issue)
Parent policy	QRT Policy — Special Operations Policy (SCSH-ISS-OPS-QRT-004 v2.0)
Issuing entity	Southern Cross Strategic Holdings Pte Limited (SCSH)
Issuing division	Integrated Security Solutions (ISS)
Geographic application	Papua LNG project corridor — Gulf Province and Central Province, PNG
SOP owner	General Manager — Integrated Security Solutions
SOP custodian	Project Security Manager (PSM), Papua LNG Corridor
Reviewed by	Head of Compliance, Risk and Human Rights
Approved by	General Manager — Integrated Security Solutions
Effective date	01 August 2026
Next scheduled review	01 February 2027, or immediately following any Level 3 or Level 4 incident, or any amendment to the parent policy
Classification	Company Confidential — Controlled Copy
Distribution	PSM; Security Operations Coordinator; QRT Team Leaders and 2ICs; Operations Room; Client Security Focal Point (on request)

Relationship to the QRT Policy

This document is subordinate to, and shall be read together with, the Quick Response Team (QRT) Policy (SCSH-ISS-OPS-QRT-004). The Policy sets the mandate, authority, legal framework, principles and standards. This SOP translates those requirements into the concrete, step-by-step actions QRT personnel, Team Leaders and Operations Room staff follow in the field.

Where any step in this SOP appears to conflict with the parent policy, the parent policy prevails, and the conflict shall be reported to the PSM. Where a client requirement is more stringent than a procedure below, the client requirement applies. Nothing in this SOP authorises any action beyond what the laws of Papua New Guinea and the parent policy permit.

How to use this SOP

- Procedures are grouped into six parts: Readiness, Activation & Deployment, Task Procedures, Use of Force & Detention, Communications & Reporting, and Governance.
- Each procedure states its purpose, when it applies, the responsible person, and numbered actions. Complete the actions in sequence unless the situation dictates otherwise.
- The Annexes provide field-ready forms and quick-reference cards. Team Leaders shall carry Annexes C, D, E, F and G on every deployment.

GOLDEN RULE Preservation of life takes absolute precedence over the protection of property or the continuity of operations. No asset is worth a life. De-escalation is the primary tool of the QRT; force is the last resort and is always reportable.

PART A — READINESS AND PREPARATION

SOP 01 — Shift Start-Up and Readiness Confirmation

PURPOSE

To ensure every QRT begins each shift fully manned, equipped, briefed and at the declared readiness state.

WHEN IT APPLIES

At the commencement of every shift and at every handover between teams.

RESPONSIBLE

QRT Team Leader (or 2IC in the Team Leader's absence).

PROCEDURE

1. Confirm team strength against the establishment. A QRT shall not hold readiness below four personnel including a Team Leader or 2IC.
2. Confirm each member holds a current PNG security guard licence, Company ID and current training currency; withdraw and replace any member who does not.
3. Take a handover brief from the outgoing team: current threat picture, ongoing tasks, outstanding incidents and equipment state.
4. Confirm the readiness state declared by the PSM for the shift, and confirm it is displayed in the Operations Room.
5. Complete the equipment and vehicle checks at SOP 02 before declaring the team available.
6. Conduct a radio check with the Operations Room and confirm at least two working PACE tiers (SOP 27).
7. Report the team available at the declared readiness state, or declare NON-EFFECTIVE with a recovery plan (SOP 04).

RECORD The handover, strength, readiness state and any deficiencies are logged with the Operations Room. An unrecorded handover is a reportable breach.

SOP 02 — Equipment and Vehicle Pre-Use Checks

PURPOSE

To confirm the team's vehicles, communications and mission equipment are serviceable before deployment.

WHEN IT APPLIES

Before the commencement of every shift, and again after every task before returning to readiness.

RESPONSIBLE

2IC for equipment; assigned Driver/Operator for vehicles and craft; Team Leader confirms.

PROCEDURE

1. Complete and sign the daily vehicle pre-use checklist: fuel to full, tyres, fluids, lights, brakes, recovery points, tracking device, fire extinguisher and first aid kit. A vehicle with an unresolved defect shall not be deployed.
2. Check marine craft (where marine-tasked): certification, fuel, navigation lights, anchor, bailer, communications and one serviceable personal flotation device per intended occupant.

3. Issue and sign for a handheld radio per officer with spare batteries, plus the team satellite communications device.
4. Check the team trauma kit and individual first aid kits are complete and in date.
5. Check body-worn cameras and the team evidence camera are charged, formatted and recording correctly.
6. Account for restraints and any authorised defensive equipment; confirm the holder is trained and certified for each item.
7. Load incident notebooks, activation log forms (Annex A), scene-preservation materials, torches, water and rations for the planned duration plus a contingency margin.
8. Report any loss, damage or malfunction — particularly of communications, cameras or restraints — to the Operations Room immediately.

CAUTION Body-worn camera footage is Company evidence. It shall never be deleted or edited. Deletion or alteration of footage is a serious disciplinary offence.

SOP 03 — Declaring and Changing the Readiness State

PURPOSE

To keep every element at a known, correct notice-to-move that matches the threat picture.

WHEN IT APPLIES

On declaration by the PSM, at each shift handover, and whenever the threat picture changes.

RESPONSIBLE

PSM declares; Team Leader complies and confirms; Operations Room records and displays.

PROCEDURE

1. On receiving a state change from the PSM, read it back to confirm, and acknowledge the time.
2. Bring the team to the new notice-to-move: assemble, brief and load as required for the higher state.
3. Confirm the change and the new state to the Operations Room for logging and display.
4. Sustain the declared notice-to-move until formally changed; do not accept tasks that would reduce readiness below the declared state without PSM approval.

The readiness states and their notice-to-move are:

State	Meaning	Notice to move
READY (Alpha)	Assembled, briefed, equipped, vehicle loaded and running-check complete.	Immediate — 3 min
STANDBY (Bravo)	On location, equipment staged, personnel available and contactable.	5 min
ON-CALL (Charlie)	Resting within the camp footprint; recall by radio or siren.	15 min
COMMITTED	Deployed on task; a reserve or adjacent element assumes the readiness obligation.	Not applicable
NON-EFFECTIVE	Unable to deploy (fatigue, casualty, vehicle failure, below minimum strength).	Not applicable

SOP 04 — Declaring a Team NON-EFFECTIVE

PURPOSE

To ensure a team that cannot safely deploy is honestly reported so cover can be arranged.

WHEN IT APPLIES

Whenever fatigue, casualty, vehicle failure, communications loss or strength below the minimum makes safe deployment impossible.

RESPONSIBLE

QRT Team Leader; PSM arranges cover.

PROCEDURE

1. Identify the cause and confirm the team genuinely cannot deploy safely.
2. Notify the PSM and the Operations Room immediately with the cause and an estimated recovery time.
3. Provide a recovery plan: replacement personnel, vehicle repair or swap, rest period, or comms restoration.
4. Remain NON-EFFECTIVE until the cause is resolved and the team is re-confirmed available.

MANDATORY A NON-EFFECTIVE declaration shall never be concealed. No manager shall pressure a Team Leader to declare a team effective when it is not. Declaring NON-EFFECTIVE on safety grounds is supported, not penalised.

PART B — ACTIVATION AND DEPLOYMENT

SOP 05 — Receiving and Logging a Call-Out (Operations Room)

PURPOSE

To capture a complete, accurate first report and start the activation record.

WHEN IT APPLIES

On receipt of any report that may require a QRT response.

RESPONSIBLE

Operations Room Supervisor.

PROCEDURE

1. Answer, identify the reporting source, and stay calm and methodical.
2. Capture the minimum data set: location, nature of the event, persons involved, injuries, weapons observed, mood and numbers, and the reporting source.
3. Apply an initial incident classification (Level 1–4) using SOP 06 / the classification card at Annex F. Where in doubt, apply the higher level.
4. Open a QRT Activation Log (Annex A) and record the call-out time.
5. Alert the appropriate QRT element and notify the authorised activating officer.
6. Begin movement tracking and the check-in cycle (intervals of not more than 15 minutes).
7. Notify up the chain per the classification (Section 10 of the parent policy) — PSM, Security Operations Coordinator, GM ISS, client focal point and RPNGC as required.

SOP 06 — Authorising Activation

PURPOSE

To ensure every deployment is ordered by a person with the authority to order it.

WHEN IT APPLIES

Before any QRT deploys, routine or emergency.

RESPONSIBLE

Authorised activating officer (see table).

PROCEDURE

1. Confirm the activation falls within your authority for the classification and task type.
2. Issue the call-out to the Team Leader and state the authority for the activation.
3. Where self-activated by a Team Leader on a witnessed threat to life, report the activation to the Operations Room and PSM within five minutes.

RULE No QRT element accepts tasking from a client representative, contractor or third party directly. All tasking flows through the Operations Room to the Team Leader.

Officer	Routine	Emergency	Cross-site
Project Security Manager	Yes	Yes	Yes
Security Operations Coordinator	Yes	Yes	Yes, notify PSM
Senior Supervisor / Shift Commander	Own site	Own site	No
Operations Room Supervisor	No	Threat to life; notify PSM	No
QRT Team Leader (self-activation)	No	Witnessed threat to life; report within 5 min	No

SOP 07 — Rapid Orders and Mobilising

PURPOSE

To brief the team quickly and completely, and to depart cleanly with the time recorded.

WHEN IT APPLIES

On receipt of a confirmed call-out.

RESPONSIBLE

QRT Team Leader.

PROCEDURE

1. Deliver rapid orders in the SMEAC format (Annex C): Situation, Mission, Execution, Service support, Command and signals — closing with the ROE reminder.
2. State the route, order of march, actions on arrival, actions on contact, actions on roadblock, actions on vehicle failure, and the withdrawal plan.
3. Confirm team strength, equipment, communications and vehicle serviceability.

4. Confirm the medical and evacuation plan and the nominated casualty point of contact.
5. Depart and report “mobile” to the Operations Room; the time is recorded as time-to-move.

ROE REMINDER Unarmed posture; minimum force; de-escalation first; no entry to customary land without authority; everything is recorded.

SOP 08 — Movement and Check-In Discipline

PURPOSE

To keep the team tracked and safe throughout the movement.

WHEN IT APPLIES

From “mobile” until arrival on scene.

RESPONSIBLE

Team Leader and Operations Room jointly.

PROCEDURE

1. Comply with the Transport Policy and the approved journey management plan; there is no movement without Operations Room clearance.
2. Maintain convoy discipline: spacing, agreed speed, communications and actions-on drills.
3. Check in with the Operations Room at intervals of not more than 15 minutes, and on every phase change.
4. Adjust for road, weather and light conditions; a Team Leader may decline or amend a movement on safety grounds and shall be supported.
5. If communications are lost, apply SOP 28.

OVERRIDING RULE No response-time standard justifies unsafe speed, unsafe river transit, night movement on an unassessed route, or deployment into a situation the team is not equipped or authorised to manage.

SOP 09 — On-Scene Arrival and Situation Assessment

PURPOSE

To take control of the scene safely and confirm what is actually happening.

WHEN IT APPLIES

On arrival at the incident.

RESPONSIBLE

QRT Team Leader as on-scene tactical commander.

PROCEDURE

1. Stop short. Do not drive into a crowd, a blockade or an unassessed obstruction. Conduct a dynamic risk assessment before committing.
2. Establish a safe holding area and, where hostility exists, a cordon.
3. Protect life first, then contain the incident, then protect assets.
4. Identify a single community point of contact where one exists; do not deal with multiple spokespersons at once.
5. Report a situation assessment to the Operations Room and confirm or revise the incident classification.

6. Request CLO and PSM attendance where the matter involves grievance, land, benefits or community tension.
7. Act within the ROE and the use-of-force continuum (SOP 21) throughout.

COMMAND There is one tactical commander at an incident. If a superior arrives and assumes command, the transfer must be explicit, verbal and logged with the Operations Room.

SOP 10 — Stand-Down and Recovery

PURPOSE

To close an activation cleanly and restore readiness.

WHEN IT APPLIES

When the incident is stabilised, resolved or handed over.

RESPONSIBLE

Activating officer or PSM issues the stand-down; Team Leader executes recovery.

PROCEDURE

1. Receive an explicit stand-down instruction and confirm it; record the time.
2. Account for all personnel, equipment and any detained persons handed over.
3. Return to base and conduct an immediate hot debrief.
4. Restore equipment, refuel the vehicle, download and secure camera footage, and return to the declared readiness state.
5. Submit reports under SOP 29 within the required timeline.
6. Following any Level 3 or Level 4 activation, conduct a structured debrief within 24 hours and consider welfare stand-down (SOP 26 / policy Section 18).

PART C — TASK PROCEDURES

SOP 11 — Rapid Incident Response

PURPOSE

To contain and stabilise an escalating incident before it reaches personnel, assets or operations.

WHEN IT APPLIES

On emergency activation to an active or developing incident.

RESPONSIBLE

QRT Team Leader and team.

PROCEDURE

1. Deploy within the notice-to-move for the declared readiness state.
2. Conduct a dynamic risk assessment on approach and again on arrival; do not enter a scene that cannot be safely managed.
3. Secure personnel first, then contain the incident, then protect assets.
4. Establish a safe cordon and a single point of contact for any community representatives present.

5. Confirm the classification and report the threat level to the PSM.
6. De-escalate as the primary means; escalate on the continuum only where necessary and proportionate.

SOP 12 — Reinforcing a Static Post

PURPOSE

To relieve pressure on a static guard post confronted by hostility, crowding, intrusion or complex risk.

WHEN IT APPLIES

When a static post requests support or the Operations Room directs reinforcement.

RESPONSIBLE

QRT Team Leader; supported post supervisor.

PROCEDURE

1. Confirm the nature of the pressure: crowd, intrusion, threat, or grievance.
2. Approach and link up with the post supervisor; take a brief on the situation and layout.
3. Reinforce the perimeter and, where crowding exists, apply crowd-management support without confrontation.
4. Provide early-warning reporting to the Operations Room and request CLO support where the driver is community grievance.
5. Make no promises regarding employment, contracts, benefits or land; refer such matters to the CLO function.
6. Remain until the situation stabilises or a stand-down is issued.

SOP 13 — Convoy, Escort and Movement Support

PURPOSE

To move people and high-value cargo safely through the corridor.

WHEN IT APPLIES

On tasking to escort client representatives, fuel, plant, high-value cargo or sensitive equipment.

RESPONSIBLE

QRT Team Leader; assigned drivers.

PROCEDURE

1. Confirm an approved journey management plan and Operations Room clearance; do not move without both.
2. Conduct route reconnaissance and a hazard briefing before high-risk movements.
3. Set and brief convoy order, spacing, speed, communications and actions-on drills (contact, roadblock, breakdown, casualty).
4. Maintain continuous communications and 15-minute check-ins throughout.
5. On a threat or obstruction, halt short, establish a holding area, report, and follow SOP 14 if a roadblock is involved.
6. Never abandon an escorted vehicle or its occupants; recovery and personnel safety take precedence over cargo.

SOP 14 — Roadblock, Blockade and Protest Response

PURPOSE

To manage an obstruction or protest safely, lawfully and without escalation.

WHEN IT APPLIES

On encountering or being tasked to a roadblock, blockade, illegal toll or protest.

RESPONSIBLE

QRT Team Leader; CLO and PSM in support; RPNGC where an offence is involved.

PROCEDURE

1. Report immediately and accurately: location, numbers, mood, weapons observed, stated grievance, and any spokesperson.
2. Halt project movement short of the obstruction and establish a safe holding area.
3. Do not attempt to force, dismantle or drive through a blockade.
4. Request CLO and PSM attendance; grievance resolution is a community-affairs function, not a security function.
5. Where the situation involves an offence, violence or weapons, notify the RPNGC and await their primacy.
6. Maintain a factual, time-stamped record and, where safe and lawful, evidential imagery.
7. Do not argue about grievance, benefits or land; do not take sides; withdraw rather than escalate where life is not at immediate risk.

PROHIBITED Forcing a blockade, taking sides in a dispute, or making any promise to protestors. The QRT protects and reports; it does not negotiate the grievance.

SOP 15 — Community and Landowner Interface Support

PURPOSE

To provide protective presence for community engagement without becoming a party to it.

WHEN IT APPLIES

During CLO engagements, awareness sessions, negotiations or Development Forum-related activity, at CLO request and with PSM approval.

RESPONSIBLE

QRT Team Leader; CLO leads the engagement.

PROCEDURE

1. Coordinate with the CLO before the engagement on posture, positioning and visibility.
2. Provide a low-profile protective presence; escort CLOs and community-affairs personnel to and from the location.
3. Support, but never lead, peaceful negotiation; the QRT is a security enabler, not a negotiating party.
4. Reduce or withdraw visible presence where the CLO advises the posture is aggravating tension, subject to the safety of personnel.
5. Observe and report mood, numbers and any emerging risk to the Operations Room.

SOP 16 — Marine and Riverine Response

PURPOSE

To conduct waterborne response and wharf/cargo security safely.

WHEN IT APPLIES

On tasking at the Uramu Marine Base or on river logistics points, or for waterborne escort/response.

RESPONSIBLE

QRT Team Leader; qualified coxswain crews the craft.

PROCEDURE

1. Deploy waterborne only in craft that are certified, fuelled, equipped and crewed by a qualified coxswain.
2. Confirm every person on the water wears a serviceable personal flotation device at all times, without exception.
3. Confirm communications on at least two PACE tiers, including satellite for remote reaches.
4. Do not conduct river movement at night, in flood conditions, or outside the approved marine operating envelope without PSM authorisation.
5. Support wharf, barge, jetty and cargo security as tasked; report and record as for any activation.

NON-NEGOTIABLE No personal flotation device, no water movement. No night or flood-condition river movement without PSM authorisation.

SOP 17 — Medical Emergency and Casualty Evacuation Support

PURPOSE

To preserve life and support the safe evacuation of casualties.

WHEN IT APPLIES

On a medical emergency requiring escort, extraction or casualty-evacuation support.

RESPONSIBLE

Embedded Medical Responder; Team Leader coordinates.

PROCEDURE

1. Provide first aid and trauma care to the level of the responder's certification, without distinction as to the casualty's role.
2. Notify the Operations Room and PSM; request the medevac chain (road, river or air) as required.
3. Where air evacuation is used, secure and mark a landing site as directed and control access to it.
4. Arrange and record the casualty handover to the medical provider.
5. Preserve the scene where the injury may involve an offence, and secure evidence.

SOP 18 — Vehicle Accident and Breakdown

PURPOSE

To make a road accident or breakdown safe and recover the situation.

WHEN IT APPLIES

On a vehicle, plant or accident involving project personnel, or an overdue/immobilised vehicle.

RESPONSIBLE

QRT Team Leader; Driver/Operator.

PROCEDURE

1. Make the scene safe: control traffic, warn oncoming movement, and attend to any injured (SOP 17).
2. Report location, casualties, damage and hazards to the Operations Room.
3. Where the vehicle is recoverable, apply the vehicle recovery kit and standard recovery drills safely.
4. Where a criminal offence or serious injury is involved, notify the RPNGC and preserve the scene.
5. Record the event and arrange onward movement or recovery of personnel and cargo.

SOP 19 — Missing or Overdue Person or Movement

PURPOSE

To respond to a missing person, overdue vehicle or overdue river movement.

WHEN IT APPLIES

On a report of a missing person, or a vehicle/river movement overdue against its journey plan.

RESPONSIBLE

PSM directs; QRT Team Leader executes ground action.

PROCEDURE

1. Confirm last known location, time, route, persons, communications state and journey plan.
2. Notify the PSM immediately; a search response is directed and coordinated by the PSM.
3. Attempt contact on all PACE tiers and alert adjacent elements and static posts along the route.
4. Conduct route and area search as directed, within safe movement limits and daylight/weather constraints.
5. Maintain a time-stamped log of areas searched and persons contacted; escalate classification as warranted.

SOP 20 — High-Risk and Deterrent Patrol

PURPOSE

To deter threats and generate ground-truth reporting.

WHEN IT APPLIES

On the current patrol programme, or when directed by the threat matrix.

RESPONSIBLE

QRT Team Leader and team.

PROCEDURE

1. Plan the patrol against the current threat matrix; avoid predictable timings and routes.
2. Conduct vehicle, foot and perimeter sweeps, including of vulnerable infrastructure, laydown areas and fuel storage.
3. Verify the welfare, alertness and communications state of static posts visited.

4. Record and report suspicious activity, ground disturbance, unfamiliar structures, new access tracks and changes in community mood.
5. Return, debrief and submit the patrol report for the threat picture.

PART D — USE OF FORCE, DETENTION AND HUMAN RIGHTS

SOP 21 — Applying the Use-of-Force Continuum

PURPOSE

To keep any response lawful, necessary and proportionate, at the lowest effective level.

WHEN IT APPLIES

At every interaction; escalation and de-escalation are continuous.

RESPONSIBLE

Every QRT member; Team Leader accountable on scene.

PROCEDURE

1. Apply the governing principles at all times: legality, necessity, proportionality, precaution, accountability, preservation of life, and non-discrimination.
2. Use presence and verbal de-escalation first; treat force as the last resort.
3. Use only the minimum force necessary, and cease the moment the threat ceases.
4. Any use at Level 5 or 6 requires immediate notification and triggers SOP 22.

FIREARMS The QRT is an unarmed capability. Personnel shall not carry, handle, store or transport firearms or ammunition unless a specific, current, written and lawful authorisation exists under PNG law and is approved by the CEO. Improvised weapons are prohibited.

Operate at the lowest effective level and de-escalate as soon as circumstances permit:

Level	Response	Application
1 — Presence	Visible, disciplined, professional presence in uniform.	Default posture at all times.
2 — Verbal	Calm instruction, negotiation, warning, de-escalation.	Primary tool; most incidents resolve here.
3 — Withdrawal / containment	Reposition, cordon, controlled withdrawal, remove the trigger.	Preferred where life is not at immediate risk.
4 — Defensive physical control	Blocking, disengagement, escorting away, lawful restraint.	Only where necessary and proportionate; trained personnel only.
5 — Defensive equipment	Authorised defensive equipment where issued.	Immediate threat of injury, no lesser option; report immediately.
6 — Force to protect life	Force reasonably necessary to prevent death or grievous harm.	Absolute last resort; notify PSM and RPNGC immediately.

SOP 22 — Mandatory Actions Following Any Use of Force

PURPOSE

To protect life, secure evidence and ensure accountability after any use of force.

WHEN IT APPLIES

Immediately following any use of force at any level.

RESPONSIBLE

QRT Team Leader; every officer present.

PROCEDURE

1. Render or arrange first aid to any injured person, without distinction as to their role in the incident.
2. Notify the Operations Room and the PSM immediately; notify the RPNGC where an offence or injury is involved.
3. Preserve the scene and secure all evidence, including body-worn and vehicle camera footage — nothing is deleted or edited.
4. Record the names and contact details of witnesses.
5. Submit individual written statements from every officer present before going off duty.
6. Remove the officers involved from operational duty pending an initial review, as a precautionary and non-punitive measure.
7. The PSM refers the matter to the Head of Compliance, Risk and Human Rights for review against VPSHR and IFC PS4, and notifies the client security focal point.

SOP 23 — Detention, Search and Handover

PURPOSE

To ensure any detention is lawful, humane, brief and properly handed to the RPNGC.

WHEN IT APPLIES

Where a person is detained under citizen's-arrest powers pending RPNGC handover.

RESPONSIBLE

QRT Team Leader; a second officer maintains oversight.

PROCEDURE

1. Detain only where lawful under the Criminal Code Act, for the minimum period necessary, and only pending RPNGC handover.
2. Treat the person humanely, keep them in view of a second officer, and protect them from harm.
3. Log the detention immediately with the Operations Room and report to the PSM.
4. Search only where lawfully permitted and with consent where required; a female may be searched only by a female officer.
5. Use handcuffs only if trained and authorised, only where necessary to prevent injury or escape, and report any use.
6. For any person apparently under 18, detain only to prevent immediate harm and notify the PSM and a CLO immediately.
7. Hand the person only to the RPNGC, without delay, and record the handover.

LIMIT QRT personnel have no power of arrest beyond that of any citizen. Custody is transferred only to the RPNGC.

SOP 24 — Interface with the RPNGC and Public Security

PURPOSE

To cooperate lawfully with public security while staying within the private-security role.

WHEN IT APPLIES

Wherever an incident involves firearms, serious injury, an alleged offence, or exceeds the Company's lawful capacity.

RESPONSIBLE

PSM (or nominated delegate) is the sole liaison; Team Leader on scene.

PROCEDURE

1. Notify the RPNGC immediately through the PSM or delegate where the threshold is met; the RPNGC assumes primacy.
2. Do not direct, instruct or task public security personnel, and do not participate in any operation they conduct.
3. Where public security are transported in Company vehicles, ensure it is authorised in advance, recorded, and consistent with VPSHR commitments.
4. Record factually any use of force by public security that QRT members observe, and report it to the PSM and the Head of Compliance, Risk and Human Rights within two hours.
5. Surrender custody of any detained person only to the RPNGC, and record the handover.

SOP 25 — Handling a Community Grievance

PURPOSE

To route community complaints correctly without the QRT attempting to resolve them.

WHEN IT APPLIES

Whenever a community member raises a grievance about QRT conduct.

RESPONSIBLE

Any QRT member; CLO and PSM take the matter forward.

PROCEDURE

1. Do not attempt to resolve, discourage, settle or pay off the grievance.
2. Record the complainant's name and contact details.
3. Explain the grievance process courteously.
4. Refer the matter to the CLO function and the PSM the same day.
5. Ensure it is registered for the monthly security report and the Project grievance procedure.

SOP 26 — Vulnerable Persons and Welfare Stand-Down

PURPOSE

To protect vulnerable persons and to protect the team's own welfare after traumatic exposure.

WHEN IT APPLIES

In any interaction involving women, children, the elderly or persons with a disability; and after exposure to violence, serious injury or fatality.

RESPONSIBLE

QRT Team Leader; PSM and safeguarding focal point.

PROCEDURE

1. Take particular care in any interaction involving women, children, elderly persons or persons with a disability.
2. Report any suspected gender-based violence, sexual exploitation or abuse, or child-protection concern immediately to the PSM and the safeguarding focal point; do not investigate it yourself.
3. Do not transport unaccompanied minors except to preserve life, and report any such instance immediately.
4. After exposure to violence, serious injury, fatality or a traumatic scene, notify the PSM; the Company shall provide access to psychological support and shall consider stand-down from operational duty.

PART E — COMMUNICATIONS AND REPORTING

SOP 27 — Communications and the PACE Plan

PURPOSE

To keep every deployed team continuously contactable through layered means.

WHEN IT APPLIES

Throughout every deployment.

RESPONSIBLE

Every QRT member; 2IC accountable for communications.

PROCEDURE

1. Carry a working means from at least two PACE tiers; a team unable to do so shall not deploy beyond the camp footprint without PSM authorisation.
2. Conduct a radio check before departure and at intervals of not more than 15 minutes on task.
3. Keep radio language clear, professional and disciplined; no slang, emotional commentary, community members' names or speculation on open channels.
4. Distinguish observation from assessment when relaying incident information.
5. Pass sensitive information — casualty identity, client information, law-enforcement matters — only by secure or restricted means.
6. Do not use personal mobile telephones as the primary operational means, or to photograph or share operational material.

Tier	Means	Application
Primary	VHF/UHF radio on the assigned operational channel	All routine and incident traffic.
Alternate	Secondary radio channel or repeater	Where the primary is degraded or congested.
Contingency	Company mobile / cellular where coverage exists	Where radio is unavailable; not for sensitive traffic.
Emergency	Satellite telephone or messenger to the Operations Room	Remote areas, marine tasking, loss of all other means.

SOP 28 — Loss of Communications

PURPOSE

To recover contact quickly and safely when a deployed team goes silent.

WHEN IT APPLIES

When the Operations Room loses contact with a deployed team.

RESPONSIBLE

Operations Room and the deployed Team Leader.

PROCEDURE

1. Operations Room: at the 30-minute point, initiate the lost-communications procedure — attempt all PACE tiers, alert the adjacent element, notify the PSM, and prepare a search response.
2. Team Leader: apply the last lawful instruction and adopt the most conservative course of action consistent with the safety of life.
3. Team Leader: move to the nearest known communications point, avoid unnecessary risk, and re-establish contact as the first priority.
4. Where contact cannot be restored, return to base where safe to do so.

SOP 29 — Post-Activation Reporting

PURPOSE

To produce accurate, timely records that improve the threat picture and support accountability.

WHEN IT APPLIES

After every activation.

RESPONSIBLE

QRT Team Leader.

PROCEDURE

1. Complete the QRT Activation Log (Annex A) with the full minimum data set.
2. Complete the Post-Incident Report (Annex B): chronology, actions taken, and outcomes.
3. Attach individual written statements from every officer involved in any use of force, detention or injury.
4. Submit a Risk Assessment Update where the incident alters the threat picture, plus recommendations to prevent recurrence.

5. Submit within two hours of the closure of the activation and enter into the Security Incident Database; where ongoing operations prevent this, give an interim verbal report to the Operations Room and record the reason.

INTEGRITY Reports are factual and chronological, distinguishing observation from assessment. No report is altered after submission — corrections are made by numbered addendum. Falsification, omission or backdating is a serious disciplinary offence and may be a criminal offence.

PART F — GOVERNANCE OF THIS SOP

This SOP is reviewed on the same cycle as the parent policy — every six months, and immediately following any Level 3 or Level 4 incident, any substantiated human-rights allegation, any material change in Project status (such as a Final Investment Decision), any material change in PNG law, or any amendment to the QRT Policy.

The review is conducted by the PSM, endorsed by the Head of Compliance, Risk and Human Rights, and approved by the GM ISS. Lessons identified from debriefs, exercises, audits and client feedback are captured in a lessons register and closed out with named owners and due dates. Superseded versions are withdrawn and archived; only the current controlled copy is authoritative.

Approval

Role	Name	Signature	Date
Project Security Manager (Custodian)			
Head of Compliance, Risk and Human Rights			
General Manager — Integrated Security Solutions			

ANNEXES

Annex A — QRT Activation Log (Minimum Data Set)

Opened by the Operations Room on call-out; completed by the Team Leader on stand-down.

Field	Entry
Activation reference number	
Date and time of call-out	
Activating officer and authority	
Initial incident classification (Level 1–4)	
Location (grid / description)	
Team designation, Team Leader and strength deployed	
Vehicle / craft registration and odometer or hours	
Time mobile / on scene / stood down / returned	
Communications means used and check-in record	
Situation on arrival	
Actions taken	
Any use of force (Yes / No — if yes, attach statements)	
Any person detained (Yes / No — if yes, handover details)	
Injuries or damage	
RPNGC / client / CLO notified (time and person)	
Final incident classification	
Team Leader signature and time of submission	

Annex B — Post-Incident Report Structure

1. Header: reference number, date, location, classification, reporting officer.
2. Executive summary — no more than five lines.
3. Chronology of events with time stamps.
4. Persons involved (roles, not opinions) and witnesses.
5. Actions taken by the QRT, in sequence.
6. Use of force: whether used, level applied, justification, and injuries.
7. Community and landowner dimension, including any grievance raised.
8. Notifications made: internal, client, RPNGC, CLO.
9. Damage, loss and operational impact.
10. Assessment of cause and contributing factors.
11. Recommendations to prevent recurrence, with owner and due date.
12. Attachments: statements, imagery reference, sketch, grievance form.

Annex C — Rapid Orders Format (SMEAC) for QRT Call-Out

Heading	Content
Situation	What has happened, where, who is involved, mood and numbers, known hazards.
Mission	A single clear statement of what this team is to achieve.
Execution	Route, order of march, actions on arrival, actions on contact, actions on roadblock, actions on vehicle failure, withdrawal plan.
Service support	Vehicle, fuel, water, medical kit, recovery equipment, duration.
Command and signals	Who commands, channel and callsigns, check-in interval, PACE tiers, emergency word.
ROE reminder	Unarmed posture, minimum force, de-escalation first, no entry to customary land without authority, everything is recorded.

Annex D — Immediate Actions Aide-Mémoire

ON RECEIVING A CALL-OUT

- Confirm location, nature, injuries, and who is on scene.
- Confirm team strength, equipment, communications and vehicle.
- Deliver rapid orders (Annex C). Report mobile.

ON ARRIVAL

- Stop short. Assess. Do not drive into a crowd or an unassessed obstruction.
- Report the situation and confirm or revise the classification.
- Identify a single community point of contact where one exists.
- Protect life, then contain, then protect assets.

IF TENSION RISES

- Create distance and time. Reduce visible posture. Speak calmly.
- Request CLO and PSM. Do not argue about grievance, benefits or land.
- Withdraw rather than escalate where life is not at immediate risk.

IF FORCE IS USED

- First aid to all injured. Notify Operations Room and PSM immediately.
- Preserve the scene, secure footage, record witnesses.
- Written statements before going off duty. Nothing is deleted.

Annex E — Readiness States (Quick Card)

State	Meaning	Notice to move
READY (Alpha)	Assembled, briefed, equipped, vehicle loaded, running-check done.	Immediate — 3 min
STANDBY (Bravo)	On location, equipment staged, personnel available.	5 min
ON-CALL (Charlie)	Resting in camp; recall by radio or siren.	15 min
COMMITTED	Deployed on task; reserve assumes readiness.	N/A
NON-EFFECTIVE	Unable to deploy; must be reported with a recovery plan.	N/A

Annex F — Incident Classification (Quick Card)

Level	Description	Notification
1 — Minor	Contained; no injury; static guards with QRT advisory support.	Ops Room log; shift report.
2 — Moderate	QRT deployment; potential to escalate; minor injury or loss.	Ops Room; SOC; PSM within 1 hour.
3 — Serious	Significant threat to life/operations/assets; multi-element; external involvement likely.	PSM immediately; GM ISS; client; RPNGC as required; written report within 2 hours.
4 — Critical	Life-threatening; fatality; armed; mass disturbance; corporate/national significance.	PSM & GM ISS immediately; CEO; client crisis mgmt; RPNGC; CMT activated.

RULE Where classification is in doubt, apply the higher level. Under-classification is itself a reportable failing.

Annex G — Response Time Standards (Quick Card)

Zone	Time to move	Target on scene
Within camp or fenced facility footprint	3 min	10 min
Within 10 km by sealed/maintained road	5 min	30 min
Remote road corridor beyond 10 km	5 min	By risk assessment; Ops Room to advise ETA
Riverine or marine tasking	15 min	By risk assessment; craft/tide dependent
Night, adverse weather or flooded route	As above	Extended; movement subject to PSM approval

OVERRIDING RULE No response-time standard justifies unsafe speed, unsafe river transit, night movement on an unassessed route, or deployment into a situation the team is not equipped or authorised to manage.

— END OF STANDARD OPERATING PROCEDURES —
